## ABSTRACT

The latest in a series of publications celebrating the bicentennial of American independence, this annotated bibliography lists the Library of Congress holdings concerning America during the Revolutionary War. Listed are the Library's most important primary and secondary sources, including books, manuscripts, serials, maps, and atlases. There are 12 chapters (the first 9 in Volume 1, the rest in Volume 2) as follows: (1) Research Aids; (2) General Studies--Regional, State and Local; (3) The British Empire and the American Revolution; (4) The Colonies on the Eve of Independence; (5) The West during the Revolutionary Era; (6) The War for Independence, 1775-1783; (7) The Loyalists in America and in Exile; (8) Diplomacy and Other International Aspects of the Revolution; (9) The Confederation and the Consolidation of the Revolution in the States; (10) the Making of the Constitution; (11) Economic, Social, and Intellectual Life in Revolutionary America; and (12) Biographies and Personal Primary Sources. Also included is an essay, "The Preservation and Publication of Documentary Sources on the Revolution." Concluding the publication are an index and a listing of Advisory Committee names. (RM)

## PREFACE

SINCE ITS ESTABLISHMENT in 1800 the Library of Congress has become, through purchase, copyright deposit, exchanges, the acquisition of special collections, and the donations of benefactors, the largest repository of Americana in the world. As the Bicentennial of American independence approached, the Library began to plan a publication program that would reveal the breadth of its resources for the study of one of the major events in the American experience. When Congress approved the Library's general plan in 1968, several historians, all specialists in early American history, were added to the staff. Their task was to prepare guides to original sources, bibliographies, facsimile reproductions of historic prints and documents, exhibits, and other special programs. Since then, more than two dozen volumes have been published, among them *Manuscript Sources in the Library of Congress for Research on the American Revolution* (1975), *The American Revolution in Drawings and Prints; a Checklist of 1765-1790 Graphics in the Library of Congress* (1975), and *Maps and Charts of North America and the West Indies, 1750-1789; a Guide to the Collections in the Library of Congress* (1981).

*Revolutionary America, 1763-1789: a Bibliography* is a guide to the more important printed primary and secondary works in the Library's collections. Compiled over a ten-year period, the bibliography represents a comprehensive review of monographs, doctoral dissertations, collected works, festschriften, pamphlets, and serial publications in both general and special collections. It is intended to serve a wide audience, whether professional historians seeking new fields of inquiry, students examining various aspects of the Revolution for the first time, or librarians, journalists, and other interested readers searching for specific information on a limited topic. Because the Revolution has been variously treated as the culmination of the colonial experience, as the beginning of American national life, and as an event to be compared instructively with other revolutionary movements of the modern era, the selection policy was designed to encompass as many interests, needs, and approaches as space permitted. To introduce the user to the preserva-

tion and publication programs that have served as the bedrock of twentieth-century historiography, the compiler has included, at the end of volume 2, an essay entitled "The Preservation and Publication of Documentary Sources on the Revolution," which contains more than four hundred cross references to the major series of published primary sources listed in the bibliography. When compilation began, it was decided to include only materials published through December 1972. The establishment of a firm cutoff date ensured that the search and annotation procedures would not be interrupted by the continued need to update the files and that the user would have a well-defined starting point for further bibliographic investigation. Moreover, it was felt that the literature produced during the Bicentennial era would be voluminous and discrete enough to merit a separate publication.

**SEARCH AND SELECTION PROCEDURES.** To be certain that *Revolutionary America* would reflect accurately the Library's holdings, a three-year search of LC catalogs and bibliographies was undertaken, and two thirty-six-thousand-card working files (main entry and subject) were assembled. The compiler and staff members of the Bibliography Section reviewed thousands of trays or cards under appropriate subject headings in the Main Catalog, by classification categories from A to Z in the LC Shelflist, and through a variety of approaches in the special collection catalogs of the Law Library, Local History and Genealogy Reading Room, Geography and Map Division, Rare Book Collection, and Microform Reading Room. Library of Congress card stock was ordered for all potential entries selected. For doctoral dissertations, the staff surveyed and typed nearly two thousand cards for likely entries in Warren F. Kuehl's *Dissertations in History* (entry 520) and *Dissertation Abstracts International* and its antecedents (entry 519). The assembled files were then compared with listings in more than two hundred published bibliographies in the Library's collections, such as the *Writings on American History* (entry 63), that touch on some

phase of the American Revolution. Nearly fifteen thousand cards for additional monographs, pamphlets, and especially periodical articles were typed during the process. After the amassed subject file was arranged by call number, a four-year shelf search was undertaken to discover new material not identified in the review of catalogs and bibliographies, to verify the accuracy of the available bibliographic information, and to identify those entries that required annotation. During the process, 910 serials were sampled or searched volume by volume for relevant citations. Final selections were made from well over one hundred thousand separate items reviewed by the compiler and staff. Criteria such as research value, uniqueness of coverage, and historiographical significance were employed in making the selections. As compiled, *Revolutionary America* lists more than twenty thousand titles in 14,810 numbered entries.

Before the search and selection procedure began, certain exceptions were made in the coverage of material. Most of these relate to eighteenth-century publications. Given the large number of contemporary pamphlets, tracts, and broadsides in the Rare Book and Special Collections Division (over seven thousand for the period 1763–89) and the availability of comprehensive guides to eighteenth-century imprints (see entries 358 and 365), only about five hundred pamphlets of advocacy that were important in shaping political and constitutional thought during the Revolution were included. Second, because most early state records have been microfilmed (see entry 616), the bound journals, minutes, and proceedings or the session laws of the colonial and state assemblies, councils, and senates in the collections of the Rare Book and Special Collections Division and the Law Library were also excluded. The same was true of the eighteenth-century newspapers in the Serial and Government Publications Division and the rare book collection. A checklist of eighteenth-century newspapers at the Library of Congress (entry 470) was already available, and most early American newspapers have been widely distributed on either microfilm or microcard (see entry 471).

**ARRANGEMENT OF ENTRIES.** The arrangement of entries into twelve topico-chronological chapters is relatively straightforward. As the table of contents indicates, a listing of bibliographies, guides to eighteenth-century imprints and manuscript collections, and maps, atlases, and geographical aids serves as a starting point for inquirers. All general studies of the Revolutionary period, whether historiographical or

narrative, are grouped together in chapter 2. Since the writing of purely local history has passed out of fashion in the past half-century, information about Revolutionary events in many regions, counties, and towns can be found only in the local histories that appeared in great number between the Civil War and the First World War. These are arranged by place rather than author under each of the states from Maine to Georgia. Works that focus on Great Britain and the empire during the Revolutionary era, especially the imperial connection between the mother country and the North American and Caribbean colonies, can be found in chapter 3. The first of the chronological chapters, chapter 4 treats pre-Revolutionary events up to the Declaration of Independence. Chapters 6, 9, and 10 continue the sequence, dealing in detail with the War of Independence, the establishment of revolutionary governments in the states, the efforts of the Continental Congress to respond to events during the Confederation period, and the drafting and ratification of the Constitution. Works on the frontier and early developments in the territories of the Old Northwest and the Old Southwest are located in chapter 5, while studies of the Loyalists in the colonies and later in Canada, Great Britain, and the West Indies are in chapter 7. Although many treatments of Revolutionary diplomacy and international relations are linked directly to wartime events or internal politics in Europe and America, they are grouped together with general diplomatic histories in chapter 8. Chapter 11 includes material on nearly all aspects of Revolutionary life and culture, such as commerce and shipping, money and finance, slavery, law and legal institutions, demography, ethnic groups, religion, education, science, medicine, literature, and the fine arts. Chapter 12, which contains one-third of the titles in the bibliography, is a unique listing of works by and about 2,138 participants in the Revolutionary struggle. One of its notable features is a system of cross references in the headnotes to those persons for whom there is a biographical sketch in the *Dictionary of American Biography* (entry 12577), the *Dictionary of National Biography* (entry 12655), or both. The headnotes themselves were compiled primarily to identify the subjects by their geographical locations, occupations, and activities, and to provide terms that would make them more accessible through the index.

Under the topical headings in each chapter, entries are arranged alphabetically by author and title. Exceptions to this format occur in chapters 2 and 12. Because most users searching for regional and local histories

would be more likely to know the place names than the names of the authors, the secondary works in chapter 2, "Regional, State, and Local Histories and General Document Collections," are arranged alphabetically by the name of the region, county, parish, or town given in the title. In chapter 12, entries under the name of each individual figure are divided into two categories. Works written by the subject are listed first and are arranged alphabetically by title. Biographical studies about the subject are listed second and are arranged alphabetically by author.

**CONSTRUCTION OF ENTRIES AND BIBLIOGRAPHIC STYLE.** Entries in the bibliography are constructed according to the general rules established in *Bibliographical Procedures & Style; a Manual for Bibliographers in the Library of Congress* (Washington, 1954), as modified to accord with the 1967 *Anglo-American Cataloging Rules*. The purpose of this bibliographic style is to provide references that can be readily identified in Library of Congress catalogs and, by extension, in the many other institutions throughout the United States where Library of Congress catalog cards are used and where the Library's published catalogs are available. Authors' names are based on the form in which the Library's catalogers have established them. Long titles, particularly in eighteenth-century pamphlet literature, have frequently been shortened by the omission of subtitles or repetitious wording. The form of the publisher's name in imprints follows in general the practices recommended in the 1967 *Anglo-American Cataloging Rules*. In describing pagination, references to preliminary pages numbering fewer than five have been omitted. Call numbers have been included as a further aid to exact identification. Items in the Library's collections that were uncataloged at the time of compilation are indicated by the symbol DLC. Although many reprint notes have been included, no attempt was made to provide comprehensive coverage. The user should refer to the *Guide to Reprints* and other standard bibliographic sources for fuller or more recent information.

Brackets have been used in bibliographic entries to indicate information supplied by catalogers and bibliographers that does not appear on the recto of the title page or in the body of the work. For example, if the author of an anonymous or pseudonymous eighteenth-century pamphlet has been identified, the name, enclosed in brackets, will precede the title. Brackets have also been commonly used around series information or dates of publication not found on the

title page. In this bibliography bracketed call numbers indicate that the work cited is no longer available in printed form in the Library's collections but has been replaced by microfilm or microfiche. The Microform Reading Room call number invariably follows such a bracketed classification number. Finally, pagination figures derived from a source such as *Dissertation Abstracts International*, which is known to combine separately paged sections of the work it described, have also been placed in brackets.

**ANNOTATIONS.** Both bibliographic and descriptive annotations have been written to aid users in determining which works may best meet their needs. Because of the limitations of time and space, annotations were restricted to studies of unquestionable historiographic significance, to representative monographs or articles that provide a broad treatment of a particular subject, to interpretive works that present a unique point of view, and to studies with unclear or misleading titles. Annotations were also supplied to explain how works covering a far broader period are useful for the study of some phase of the Revolution. Slightly more than 40 percent of the entries in chapters 1-11 received annotations ranging in length from a single sentence to several paragraphs. Most often they were restricted to 125 words or less. These annotations and notes were not written as reviews; they are more nearly abstracts intended to reflect the author's own opinion or approach. To avoid the use of extensive quotations, they are in many cases a paraphrase of the author's words. The length of the annotation bears no direct relationship to the importance of the work annotated. The content of well-known studies may be self-evident, while less conspicuous books or articles may require more detailed description to place them in proper relation to the subject or subjects with which they deal.

**ACKNOWLEDGMENTS.** Throughout the preparation of this bibliography, the compiler benefited from the experience and knowledge of other Library of Congress staff members, especially those in the Shelflisting Section of the Subject Catalog Division, the Rare Book and Special Collections Division, the Law Library, the Geography and Map Division, the Manuscript Division, the Microform Reading Room, and the Loan Division. Within the General Reading Rooms Division itself (formerly the General Reference and Bibliography Division), many members of the staff, who were either permanently or temporarily

assigned to the Bibliography Section during the past ten years, contributed various amounts of time to searching, filing, translating, annotating, proofreading, and indexing. They are Donald Baskerville, Edward Cambio, Madlein Csiffary, Judith Farley, Judith Furash, Mary Jane Gibson, James Gilreath, Ted Johnson, Carolyn Larson, Jane Lindley, Anita Nolen, Diana Ramsey, Frances Reynolds, Stanley Rubenstein, Baiba Seefer, and Harry Wrenn. Those who typed, photocopied, and numbered the manuscript are Charlotte Bolton, Cheryl Bowser, Toni Carter, Patricia Garrison, Deborah Jones, Mary McSwain, Nathan Moore, Cheryl Powell, Teena Siggers, Pamela Smith, Richelle Tyson, Kim Wallace, and Joani Ward. The compiler is especially grateful for the contributions of eight others. Robert Land, former chief of the division, guided and supported the project through its

early stages. Ellen Hahn, the present chief, and Judith Austin, head of the Bibliography Section, expedited the final production. Richard Andress assisted diligently in the compilation of the original file of thirty-six-thousand working cards. Roy Thomas prepared most of the annotations for chapter 1 and drafted dozens of others for later chapters. Dr. Marguerite Bloxom, in addition to innumerable other tasks, researched the headnotes and arranged the entries for chapter 12. Dr. Marvin Kranz provided counsel on the organization of entries within the subject chapters. And Ruth Freitag, associate chief bibliographer, reviewed and edited every entry with respect to its technical bibliographic details.

## CHAPTER ONE

### Research Aids

#### BIBLIOGRAPHIES AND REFERENCE WORKS

**B**IBLIOGRAPHIC CONTROL of the books, periodicals, government documents, manuscripts, and maps available for the study of the American Revolution is fragmentary at best. What is more, research aids containing references to the Revolutionary era normally cover much broader periods, subjects, and interests. Because of the uneven quality of existing research tools and the difficulty in determining individual research needs, it was considered advisable to include in this chapter a number of general works more useful to the beginning student than to the specialist and as likely to be found in the collections of the college or public library of moderate size as in the collections of the large research library.

The arrangement of entries proceeds from the general to the particular; from larger geographic areas to smaller. Union catalogs of manuscript collections, for example, are listed before guides to single depositories. For additional leads to bibliographic sources, one should consult the footnotes or listings in specialized monographs, doctoral dissertations, and articles in the remaining chapters. The bibliographies of local history in chapter 1, for instance, may be supplemented by references included in state, county, and town histories in chapter 2. Many of the subject bibliographies may be similarly augmented by citations in secondary works in later chapters: Biography and Genealogy in chapter 12, Diplomacy in chapter 8, Military and Naval in chapter 6, and Religion in chapter 11.

#### *Historical Encyclopedias and Dictionaries*

- 1 Adams, James T., ed. *Dictionary of American history*; James Truslow Adams, editor in chief; R. V. Coleman, managing editor. 2d ed. rev. New York, C. Scribner's Sons, 1942-61. 6 v. E174.A43 1942

On title page of v. 6: *Supplement One*. Issued without edition statement.

Index volume. Rev. 1963, to include Supplement one. New York, C. Scribner's Sons [1963] 266 p. E174.A43 1942 Index 2

Representing contributions by more than 1,000 historians, this work contains over 6,000 articles, ranging in length from a paragraph to several pages, on all phases of American history to 1960. The section on the Revolution in volume 4 includes a six-page essay on its causes and conclusion, as well as shorter treatments of diplomacy, finance, the army and navy, Revolutionary committees, profiteering, and military campaigns. More information on topics from the period 1763-89 appears under headings scattered throughout the work. The entry for the Revolution in the index volume contains numerous citations under such sub-headings as Landing of the Debt, Indians, Distribution of Wealth, Enlistments, and Mobilization of the Army. The editor and his staff also prepared a one-volume *Concise Dictionary of American History* (New York, C. Scribner's Sons [1962] 1156 p.).

- 2 Boatner, Mark M. *Encyclopedia of the American Revolution*. New York, D. McKay Co. [1966] xviii, 1287 p. illus., geneal. tables, maps. E208.B68  
"Bibliography and short title index": p. 1253-1273.

Describes events, personalities, and concepts related to the Revolution in nearly 2,000 entries designed for quick reference. Emphasizing military campaigns and naval operations from the Battle of Alamance to Yorktown, Boatner treats American engagements in great detail without neglecting British, French, and German participation. Fragmented entries are linked by longer articles that cover broad subject divisions such as Royal Government in America or the Continental Congress. Cross-references to other pertinent information are provided in most entries. Maps and sketches scattered throughout the text are conveniently listed in a 13-page index to maps.

- 3 Burpee, Lawrence J., ed. *The Oxford encyclopaedia of Canadian history*. London, Oxford University Press, 1926. vi, 699 p. illus., maps (part fold.) (The makers of Canada series, [v. 12] ) F1026.M342, v. 12

Brief articles, arranged alphabetically, that treat the lives of important figures and events in Canadian history. Many sketches contain abbreviated bibliographic citations.

- 4 Johnson, Thomas H. *The Oxford companion to American history*. New York, Oxford University Press, 1966. vi, 906 p. E174.J6

A dictionary containing nearly 5,000 articles on lives, events, and places significant in the founding and growth of the nation.

- 5 Low, Sir Sidney J. M., and Frederick S. Pulling, eds. *The dictionary of English history*. New ed., rev. and enl. by F. J. C. Hearnshaw, Helena M. Chew, and A. C. F. Beales. London, New York, Cassell [1928] x, 1154 p. DA34.L9 1928

Reprinted in Ann Arbor, Mich., by Gryphon Books (1971).

Contains thousands of concise and some longer articles written by specialists on important subjects, events, and persons in English history. Many articles contain cross references and bibliographic citations.

Issued in parts, 1884-1928, with cover title: *The Oxford English Dictionary*.

Edited by Sir James A. H. Murray, Henry Bradley, Sir William A. Craigie, and Charles T. Onions.

Introduction, supplement, and bibliography. By W. A. Craigie [and] C. T. Onions. Oxford, Clarendon Press, 1933. xxvi, 542, 330, 91 p.

PE1625.N531 1888 Suppl.

"A list of books quoted in the *Oxford English Dictionary*": 91 p. at end.

A reprint from the original plates with the correction of typographical errors was published under the title *The Oxford English Dictionary; Being a Corrected Reissue With an Introduction, Supplement, and Bibliography of A New English Dictionary on Historical Principles* (Oxford, Clarendon

Press, 1933. 13 v. PE1625.N53 1933). Usually cited as N.E.D. or O.E.D.

Gives the history of each word included from the date of its introduction into the language after A.D. 1150. Alterations in meaning, spelling, pronunciation, and usage are shown, and each change is illustrated by quotations from the works of over 5,000 authors from all periods. Arranged chronologically (slightly more than one for each century), the quotations illustrate the forms and uses of the word, show the age of the word generally, and indicate its gradual separation from allied words or senses. The complete work has a total vocabulary of 414,825 words and includes 1,827,306 quotations.

For various regions special dictionaries have been compiled. *A Dictionary of American English on Historical Principles* (Chicago, University of Chicago Press [1938-44] 4 v. (2552 p.) PE2835.C72), edited by Sir William A. Craigie and James R. Hulbert, concentrates on those features that distinguish the English of the American colonies and the United States from that of England and the rest of the English-speaking world. Included are the names of plants, trees, and animals, and special terms from the fields of geography, medicine, law, business, education, and the like. Less comprehensive than Craigie is *A Dictionary of Americanisms on Historical Principles* (Chicago, University of Chicago Press [1951] 2 v. (1946 p.) PE2835.D5), edited by Mitford M. Mathews, which focuses upon words and expressions that originated in the United States, whether they are outright coinages, foreign words that first became English in the United States, or words used in senses first given them in American usage.

Reports books first issued in the United Kingdom on all aspects of the history of all nations. Providing abridged references, the compiler arranges the entries according to an outline that includes headings for intellectual, religious, and military history as well as for each of the continents. Sections on the years 1688 through 1815 in British history and on the colonial period in American history list works that relate to the Revolutionary era. Sesequent volumes in the series have been sponsored by London University's Institute of Historical Research under the title *Bibliography of Historical Works Issued in the United Kingdom* and were prepared by Joan C. Lancaster for the years 1946-56 (1957. 388 p. Z2016.L3) and by William Kellaway for the periods 1957-60 (1962. 236 p.

Z6201.K4), 1961-65 (1967. 298 p. Z2020.3.K4), and 1966-70 (1972. 322 p. Z6201.K42). Each of the volumes contains an index of names.

DA500.G5, v. 14

Contains references to over 6,000 published items available for the study of imperial developments, from the Treaty of Aix-la-Chapelle to the Declaration of Independence. Each of the nine chapters, arranged by geographic region, includes bibliographic aids, printed primary sources (government documents, contemporary writings, newspapers, and periodicals), secondary works grouped by topic, maps, and cartographic aids. Maintaining the focus of the series of which the bibliography is a part, Gipson emphasizes political, diplomatic, and economic studies, generally omitting secondary works on intellectual history and the fine arts. He also provides over 1,000 citations to contemporary books, pamphlets, and tracts reflecting the great debate over the nature of the first empire.

23

Historical Association, London. Annual bulletin of historical literature. no. 1+ 1911+ London. Z6205.H65

Reprinted in New York by B. Franklin (1971).

Lists 3,092 titles, classified, with index.

33

Mullins, Edward L. C. A guide to the historical and archaeological publications of societies in England and Wales, 1901-1933; compiled for the Institute of Historical Research. London, Athlone Press, 1968. xiii, 850 p. Z5055.G6M8

Lists the titles and authors of books and articles issued by more than 400 local and national societies in England and Wales—6,560 volumes in all. A general index (p. 491-788) and an index of authors (p. 789-850) form an essential part of the work.

Supplements to the *Guide*, originally scheduled to be published in the 1930's and to cover work produced before December 31, 1928, appeared as supplementary issues numbers 1-3 to the Institute's *Bulletin* in the years 1930-40, 1943, and 1948 (Z2016.L84 Suppl.). The terminal date of 1933 for the lists in the *Guide* is intended to coincide with the first volume for 1934 of the *Writings in British History*, edited by Alexander T. Milne.

34

Pargellis, Stanley M., and Dudley J. Medley. Bibliography of British history; the eighteenth century, 1714-1789. Issued under the direction of the American Historical Association and the Royal Historical Society of Great Britain. Oxford, Clarendon Press, 1951. xxvi, 642 p. Z2019.P3

Lists 4,558 reference books, primary sources, and secondary works according to a detailed subject outline that includes headings for the American Colonies and the Historical Manuscript Commission Reports. The compilers provide brief annotations for many entries and an index of

names and subjects that contains numerous references to material on the American Revolution.

35

Royal Historical Society, *London*. Writings on British history 1901-1933: a bibliography of books and articles on the history of Great Britain from about 400 A.D. to 1914, published during the years 1901-1933 inclusive, with an appendix containing a select list of publications in these years on British history since 1914. *London*, J. Cape, 1968-69. 5 v. Z2016.R85

Contents: v. 1. Auxiliary sciences and general works.—v. 2. The Middle Ages, 450-1485.—v. 3. The Tudor and Stuart periods, 1485-1714.—v. 4. The eighteenth century, 1714-1815.—v. 5. 1815-1914.

A comprehensive bibliography of important books and articles that excludes only items issued by British learned societies and listed in other publications, such as *A Guide to the Historical and Archaeological Publications of Societies in England and Wales, 1901-1933*, by Edward L. C. Mullins (*London*, Athlone Press, 1968. 850 p.). Volume 1 lists bibliographies and general histories, while volume 4, on the 18th century, contains references for political, constitutional, economic, social, ecclesiastical, cultural, and military history, plus foreign relations and the empire, including the mainland colonies, 1714-83. The series supplements an earlier one begun by Alexander T. Milne, *Writings on British History, 1934-45* (*London*, J. Cape, 1937-60. 7 v. in 8). The annual volumes for the years 1934-39 and those that cover the period between 1940 and 1945 are arranged in the same topical pattern used in the *Writings* for the years 1901-33. The volumes covering the period 1934-45 are, however, broader in scope, since they list works published by British historical societies. The individual volumes in both series contain indexes of names. The work has been published in the United States by Barnes and Noble (1968-71. 11 v.).

Baa, Enid M. Theses on Caribbean topics, 1778-1968. San Juan, Institute of Caribbean Studies, University of Puerto Rico, 1970. v, 146 p. (Caribbean bibliographic series, no. 1) Z1501.C33, no. 1

Lists 1,242 doctoral dissertations and masters' theses submitted, for the most part, to universities in the United States, England, and France. A geographic index is included.

41

Institute of Jamaica, *Kingston. Library*. Bibliography of the West Indies (excluding Jamaica). By Frank Cundall, secretary and librarian of the Institute of Jamaica. Kingston, Institute of Jamaica, 1909. 179 p. Z1501.I58

Reprinted in New York by Johnson Reprint Corp. (1971).

A list of 2,889 books and pamphlets on the West Indies, Central America, and Florida published between 1526 and 1910. The compiler arranges the titles under 36 geographic subdivisions and subjects by date of publication. Imprints from the years 1763 to 1789 and historical works on the

period appear in several sections, including those on Barbados; West Indies—General Works; Cuba; and Slavery. The work supplements Cundall's *Bibliographia Jamaicensis: A List of Jamaica Books and Pamphlets, Magazine Articles, Newspapers, and Maps* (Kingston, Institute of Jamaica [1902] 83 p.), which has been reprinted in New York by B. Franklin (1971). A supplement (Kingston, Institute of Jamaica. 38 p.), also compiled by Cundall, was issued in 1908.

42 Ragatz, Lowell J., comp. A guide for the study of British Caribbean history, 1763–1834, including the abolition and emancipation movements. Washington, U.S. Govt. Print. Off., 1932. viii, 725 p. Z1502.B5R22

Issued also as v. 3 of the *Annual Report of the American Historical Association*, 1930.

Reprinted in New York by Da Capo Press (1970).

The compiler briefly describes items he examined in 69 repositories in seven countries, including 33 institutions in the United States. He organizes the list by type of material: general reference works and guides, manuscript collections, government documents collections, legislative journals and papers, historical writings, and the topical literature, such as works on agriculture and commerce, religion, treaties, the press, and the antislavery movement. An author, title, and name index also contains entries for the Revolution and some other subjects.

## THE UNITED STATES

### 1. GENERAL

43 America, history and life. v. 1 + July 1964 + [Santa Barbara, Calif.] Z1236.A48

Summarizes articles appearing in more than 600 periodicals published in the United States and Canada. Arranged by subject, material on the Revolution is also found under the headings for regional, state, and local history. A cumulated index to volumes 1–5 has been published as a separate volume. Before 1964 American history was covered in sections of *Historical Abstracts, 1775–1945* (v. 1 + Mar. 1955 + Santa Barbara, Calif.); the annual indexes for volumes 1–5 and 6–10 are cumulated in two separate volumes. The American Bibliographical Center has recently published a *Guidebook & List of Periodicals*, 4th ed. (Santa Barbara, Calif., 1971. 38 p. Z674.5.A45A45) indicating the periodicals surveyed for *America, History and Life* and *Historical Abstracts*.

Z1236.G86

Reprinted in Detroit by Gale Research Co. (1966).

A list of publications of prominent historical societies from the late 18th century to 1905. Basing his work upon several fragmentary lists that appeared in such historical periodicals as the *Magazine of American History*, Griffin published his first extensive compilation in two parts in the American Historical Association's *Annual Report* for 1890 (p. 161-267) and 1892 (p. 305-619). It was reprinted with additions and revisions in the *Annual Report* for 1895 (p. 675-1236) and again as a separate volume of the *Annual Report* for 1905. The latter edition contains 7,537 entries arranged under national, state, and Canadian associations. The publications of each society are given in serial or chronological order, and the contents of each volume are listed. A 285-page author-subject index includes three pages of double-column entries for the Revolution. Griffin also includes a bibliographical index and an index to the historical societies.

E172.A60, 1906, v. 2

Part of the report of the Public Archives Commission, 1906.

Following an introductory section on general sources for the early colonial period, the compiler provides for each colony (state) two related lists of bibliographic citations. The first contains entries for collections of published archival records, such as *The Public Records of the Colony of Connecticut, 1636-1776*, the first five series of the *Pennsylvania Archives*, and *The Colonial Records of the State of Georgia*, and summaries of the contents of each volume of records in

the collections. The second list contains references to individual volumes of the collections cited in the first bibliography, plus references to other contemporary material such as session laws. Entries in the first bibliography are arranged alphabetically by collection title; those in the second appear in chronological order under such categories as executive, legislative, and judicial records. The index for the whole work includes the names of many Revolutionary figures, especially governors.

All published vols. covering 1902-57 are being reprinted in New York by Kraus Reprint Corp. Vol. for 1902 reprinted in Boston by J. S. Canner (1959).

A series of annual bibliographies intended to record the publication of every book and article that has any considerable value for study and research pertaining to the history of the United States from prehistoric times to the recent past. No volumes were published for the years 1904-5 and 1941-47. The scope and format of the individual works varies under successive compilers. The volumes for the years 1902-40 include entries for items on British North America. Those for 1948-59 are limited to the geographic areas that now make up the 50 states and the territories, plus the Philippine Islands, 1898-1946. The individual volumes are generally arranged in three parts: the writing and study of history, national history, and state or local history. The volumes for 1902-40 also have divisions for chronological periods, including the years 1763-39 under the heading National History. Each volume contains annotations for unclear titles, lists of periodicals cited, and an index of names. The indexes for the years 1902-40, augmented by subject entries, are cumulated in one volume.

Whitehill, Walter M. The arts in early American history; an essay. [With] a bibliography by Wendell D. Garrett and Jane N. Garrett. Chapel Hill, Published for the Institute of Early American History and Culture at Williamsburg, Va., by the University of North Carolina Press [1965] xv, 170 p. (Needs and opportunities for study series) 75961.U5W5

The introductory essay reviews the state of scholarship in the field, while the complementary bibliography lists what has been done and indicates, by its obvious gaps, areas that need further study. Limited to basic writings that cover the period from colonial beginnings to 1826, the entries are grouped under a wide variety of subject headings that include Architecture, Topography, Metals, Pottery, and Textiles; books on the Revolutionary period are scattered throughout. The compilers indicate, in a pithy summary, the significance and dependability of each work.

Kaplan, Louis. A bibliography of American autobiographies. Compiled by Louis Kaplan in association with James Tyler Cook, Clinton E. Colby, Jr., [and] Daniel C. Haskell. Madison, University of Wisconsin Press, 1961. xii, 372 p. Z1224.K3

Lists alphabetically by author 6,377 autobiographical accounts published before 1945 and indicates the location of at least one copy. Kaplan purposely excludes those relating to Indian captivities, military imprisonments, overland travel, and escaped slaves. The index is arranged by occupations, broad geographical areas, and a limited number of subjects. Under each of these major headings the autobiog-

ographies are usually subdivided chronologically with the designation "to 1800" marking the first section of most categories. The entry for the American Revolution contains 63 items.

Long Island Historical Society. *Library. Catalogue of American genealogies in the library of the Long Island Historical Society.* Prepared under the direction of the librarian, Emma Toedteberg. Brooklyn, N.Y., The Society, 1935. 660 p. Z5313.U5L8

Reprinted in Baltimore by the Genealogical Pub. Co. (1969).

Arranged under family name are the titles of 8,200 printed books and pamphlets, as well as the titles of 850 works in manuscript.

183

Matthews, William. *American diaries; an annotated bibliography of American diaries written prior to the year 1861.* With the assistance of Roy Harvey Pearce. Berkeley, University of California Press, 1945. xiv, 383 p. (University of California publications in English, v. 16, 1945) PE11.C3, v. 16 Z5305.U5M3

Reprinted in Boston by J. S. Canner (1959).

Arranging the works by the year of their earliest entries, the compiler lists diaries published in English, including those of immigrants, foreign visitors, missionaries at home, laymen abroad, and some Canadians. Matthews presents more than 75 pages of information on diaries that commence between 1763 and 1789. In a companion volume, *Canadian Diaries and Autobiographies*, he describes, in alphabetical order, manuscript as well as published works relating to British Canada and also includes material after 1754 from French Canada. Both books note the scope of each diary reported. *American Diaries* contains an index of names; *Canadian Diaries and Autobiographies* has an index of subjects ranging from the Loyalists and the Revolution to education and religion.

184

Matthews, William. *British autobiographies; an annotated bibliography of British autobiographies published or written before 1951.* Berkeley, University of California Press, 1955. xiv, 376 p. Z2027.A9M3

Reprinted in Hamden, Conn., by Archon Books (1968).

An alphabetical list of men and women, citizens by birth or naturalization, each of whom wrote about a significant portion of their life. Besides the title Matthews indicates briefly the topics covered in each autobiography and provides a subject index that contains references chiefly to professions, avocations, places, and wars, including the American Revolution.

185

Matthews, William. *British diaries; an annotated bibliography of British diaries written between 1442 and*

1942. Berkeley, University of California Press, 1950. xxxiv, 339 p. Z5305.G7M3

Reprinted in New York by P. Smith (1967).

Lists the diaries according to the date of the earliest entry in each and indicates the writer's vocation, the scope of the work, and its value for research. The compiler offers about 40 pages of information on diaries whose first entries fall between the years 1763 and 1789. The index of persons is supplemented by a special compilation of diaries that cover periods of a decade or more.

Bailyn, Bernard. Education in the forming of American society; needs and opportunities for study. Chapel Hill, Published for the Institute of Early American History and Culture at Williamsburg, Va., by the University of North Carolina Press [1963] xii, 147 p. (Needs and opportunities for study series) LA206.B3

"List of references": p. 117-136.

In two essays the author illuminates significant changes in the purpose and form of colonial education (p. 3-49) and presents a bibliographic review of scholarship in the field (p. 51-114). In the first Bailyn argues that education altered dramatically during the colonial experience from an informal, family-oriented institution attempting to preserve English traditions, relying heavily upon an apprenticeship system, and receiving little aid from either church or government, to a formally structured, state-oriented system funded by local government and supplemented by sectarian schools intent upon preserving cultural uniqueness and group loyalty. In his second essay he discusses bibliographic guides, collections of sources and documents, the English background, the transplantation of culture, the quality of colonial culture, apprenticeship, education and social complexity, the financing of education, and the impact of the Revolution upon the institution.

Hill, Frank P., comp. *American plays printed, 1714-1830; a bibliographical record*. Stanford University, Calif., Stanford University Press [c1934] xi, 152 p. facsim., plates. Z1231.D7H6

Reprinted in New York by B. Blom (1968) and B. Franklin (1970).

Provides full bibliographic data on 347 plays, including 44 published between 1763 and 1789, that were either written by Americans or by authors living in America. The compiler arranges the entries differently in each of three lists: by author or anonymous title, by title, and by year of publication. Several plays treat subjects drawn from the Revolutionary experience. Hill obtained the major part of his information from Oscar Wegelin's *Early American Plays, 1714-1830*, 2d ed., rev. (New York, Literary Collector Press, 1905. 94 p.), a compilation of biographical sketches and play descriptions arranged by playwright and preceded by John Malone's introductory essay on the theater during the period and by a list of anonymous plays.

234

Leary, Lewis G. *Articles on American literature, 1900-1950*. Durham, N.C., Duke University Press, 1954. 437 p. Z1225.L49

Presents, in two separate alphabetical lists, bibliographic citations for writings about American authors and 25 literary subjects, such as biography, the frontier, and newspapers, obtained from a survey of more than 50 periodicals. The work is a revision and extension of the compiler's *Articles on American Literature Appearing in Current Periodicals, 1920-1945* (Durham, N.C., Duke University Press, 1947. 337 p.). With the assistance of Carolyn Bartholet and Catharine Roth, Leary compiled a supplement, *Articles on American Literature, 1950-1967* (Durham, N.C., Duke University Press, 1970. 751 p.), that cumulates the quarterly checklists of "Articles on American Literature Appearing in Current Periodicals" in *American Literature* from January 1951 through January 1968. The supplement also includes items that appeared before 1951 and were omitted or erroneously reported in *Articles on American Literature, 1900-1950*.

## MEDICINE

249

Bibliography of the history of medicine. no. 1+ 1965+. Bethesda, Md., U.S. Dept. of Health, Education, and Welfare, Public Health Service; for sale by the Supt. of Docs., U.S. Govt. Print. Off., Washington. Z6660.B582

Annual, with quinquennial cumulations.

Lists material published since 1963 and examined during the year by the staff of the National Library of Medicine. Most citations refer to journal articles, but monographs and analytic entries for symposia, congresses, and similar composite publications, as well as historical chapters in general monographs, are also included. The entries are divided between two sections: part 1, biographies, and part 2, countries, periods (including the 18th century), and special topics within several medical and public health specialties. An author index also provides complete bibliographic data for each work cited.

Garrison, Fielding H. A medical bibliography (Garrison and Morton); an annotated check-list of texts illustrating the history of medicine [by] Leslie T. Morton. 3d ed. Philadelphia, Lippincott, [1970] 872 p. Z6658.G243 1970

Arranging the 7,534 entries according to a subject outline and by date of publication under each subject, Morton provides chronological lists of printed primary sources on a wide range of topics, representing the major contributions to medical knowledge and practice from ancient times to the present. The annotations explain the contribution of each work and its relation to those published earlier. Under the history of medicine there are subheadings for countries, medical specialties, diseases, biography, bibliography, lexicography, and topics in biology, zoology, astronomy, and physiology. There are separate indexes of names and subjects.

Guerra, Francisco. American medical bibliography 1639-1783. A chronological catalogue, and critical and bibliographical study of books, pamphlets, broadsides, and articles in periodical publications relating to the medical sciences—medicine, surgery, pharmacy, dentistry, and veterinary medicine—printed in the present territory of the United States of America during British dominion and the Revolutionary War. Preface by Lawrence C. Wroth. New York, L. C. Harper, 1962. 885 p. facsimis. (Yale University. Dept. of the History of Science and Medicine. Publication no. 40) Z6659.G8

Offers full bibliographic data on a wide range of colonial publications, most of which appeared between 1763 and 1789. Of the 719 books, pamphlets, and broadsides described, 384 were issued during the Revolution; 346 of 506 almanacs were published after 1762. The copious annotations for the 25 magazines and 199 newspapers listed include brief descriptions of individual articles and advertisements that relate to the field of medicine broadly conceived, including vital statistics. The compiler also provides a number of specialized indexes and tables, such as lists of colonial statutes, session laws, and city ordinances; other compilations note first editions and reprints published in America and abroad, including all known American editions to the present time of colonial medical works and the first American publication of European titles. A brief survey of the bibliographic sources uncovered in the preparation of the work was published by Guerra in the *Bulletin of the History of Medicine*, v. 35, Mar./Apr. 1961, p. 149-155.

Z6658.R88 Rare Bk. Coll.

Covering 103 volumes published between 1665 and 1813, the index lists 144 papers published between 1763 and 1789.

256

- U.S. *National Library of Medicine*. Early American medical imprints; a guide to works printed in the United States, 1668-1820. Washington, U.S. Dept. of Health, Education, and Welfare, Public Health Service, 1961. x, 240 p.  
Z6661.U5A44

Gives full bibliographic data for 2,170 books, pamphlets, theses, and broadsides, plus 36 periodicals. Interpreting the subject broadly, the compiler includes works in the fields of hygiene, psychology, faith cures, and astrological medicine. Brief annotations describe the contents of some works. A chronological index offers references for each year of publication, while an appendix lists entries from Evans not included in the compilation.

Z6834.H5A4 1972

Describes and evaluates books and Ph.D. theses on sea history written in English. The compiler arranges the entries under 72 diverse subject headings, including sections on the naval history of nations and states, and naval history by chronological periods. The *Bibliography of Maritime and Naval History: Periodical Articles During 1970* (Mystic, Conn., Marine Historical Association, 1971. 78 l.), compiled by Charles R. Schultz, supplements Albion and is intended to be the first in a series. Both works provide author and subject indexes that contain references for the Revolution.

Haywood, Charles. A bibliography of North American folklore and folksong. 2d rev. ed. New York, Dover Publications [1961] 2 v. (xxx, 1301 p.) maps (on lining papers) Z5984.U5H32

Contents: v. 1. The American people north of Mexico, including Canada.—v. 2. The American Indians north of Mexico, including the Eskimos.

First edition, published in New York by Greenberg (1951), was the author's thesis (Ph.D., Columbia University).

Arranged according to a subject outline that includes such subdivisions as Negro spirituals and work songs, as well as Pennsylvania-German and French-Canadian folklore, volume 1 contains, in a section on music from America's wars, more than 30 references to books, articles, and phonograph records that pertain to the Revolution. The compiler also provides for each state citations to regional bibliographies, periodicals, folktales, legends, and works on customs, traditions, superstitions, and witchcraft. The material in volume 2 is divided according to cultural area; there are sections on each Indian tribe in the northeastern woodland and southeastern areas of the United States. An index of names, subjects, and titles for both volumes is supplemented by an index of composers, arrangers, and performers.

Hixon, Donald L. Music in early America: a bibliography of music in Evans. Metuchen, N.J., Scarecrow Press, 1970. xv, 607 p. ML120.U5H6

Includes biographical sketches.

In two separate lists the compiler reproduces entries for every item in Evans' *American Bibliography* (entry 358) that contains printed musical notation, regardless of form. Periodicals, newspapers, and other serial publications, however, are excluded. The first compilation represents ti-

tles available in Readex Corporation's microprint edition of *Early American Imprints, 1639-1800*, while the second recognizes titles in Evans that are omitted from the microprint edition, including "ghosts." Both bibliographies are arranged by composer-editor-compiler; biographical information on each person is supplied in a third alphabetic list. There are composer-compiler, title, and Evans number indexes.

Reprinted, with a preface by Irving Lowens, in New York by DaCapo Press (1964).

First edition published in 1905.

Intended to be a complete collection of the titles of secular music and related books, pamphlets, essays, and other works written by native or naturalized Americans and issued by the American press before 1801. Musical imprints are listed alphabetically by title with full bibliographic data, extensive annotations, and locations of extant copies. Separate lists of articles and essays relating to music, composers, songsters, first lines, American patriotic music, and opera librettos identified in the work are included. Biographical sketches of composers not treated in basic works are contained in a list of composers. In addition to a general index, the compiler supplies a special index of publishers, printers, and engravers.

Reprinted in New York by P. Smith (1941-59).

A monumental guide to books, pamphlets, newspapers, journals, broadsides, and other items published in America before 1800. Evans completed 12 volumes before his death in 1935. The 13th volume, compiled by Clifford K. Shipton, was published in 1955. Between them they identify and describe a total of 39,162 items—12,978 spanning the years 1763 to 1789. Entries are arranged alphabetically under each year, and location symbols are given, where possible; to items held in U.S. libraries and archives. Roger P. Bristol contributed the index volume and followed it with a separate *Index of Printers, Publishers, and Booksellers Indicated by Charles Evans in His American Bibliography* (Charlottesville, Bibliographical Society of the University of Virginia, 1961. 172 p.). Bristol also updated Evans' work in his *Supplement to Charles Evans' American Bibliography* (Charlottesville, Published for the Bibliographical Society of America and the Bibliographical Society of the University of Virginia [by] University Press of Virginia [1970] 636 p.) by adding 11,262 citations (4,947 for the Revolutionary period) to the total of over 50,000 identified items published in America before 1800. The Readex Corporation, in cooperation with the American Antiquarian Society, included most of the items listed in Evans and in Bristol's *Supplement* in its microprint edition of *Early American Imprints*, first series, 1639-1800. Because bibliographic "ghosts" and occasional inaccuracies in authors' names, titles, or imprints were discovered in Evans, Clifford K. Shipton and James E. Mooney published their *National Index of American Imprints Through 1800: The Short-Title Evans* ([Worcester, Mass.] American Antiquarian Society, 1969. 2 v. 1028 p.)—a combined alphabetical index to Evans' bibliography, with corrections, and Roger Bristol's supplementary items. Ultimately, Evans' original scheme was completed by Ralph R. Shaw and Richard H. Shoemaker, who carried the effort

through 1820 in 20 volumes published between 1958 and 1964.

Tanselle, George Thomas. Guide to the study of United States imprints. Cambridge, Mass., Belknap Press of Harvard University Press, 1971. 2 v. (lxiv, 1050 p.) Z1215.A2T35

Presents nine separate bibliographies covering diverse sources of information in the field of American printing and publishing. Tanselle's largest compilations include a 360-page bibliography of works relating to individual printers and publishers, a 240-page list of titles about individual authors, and a 125-page survey of general studies. Under the heading "Genre Lists," the compiler offers a 94-page section containing bibliographies of 92 different kinds of publications, such as almanacs, serials, travel books, and political literature. A 90-page section on catalogs describes lists of exhibition, library, auction, and dealers' catalogs. A 67-page

inventory of imprint surveys is arranged by state and year. Tanselle also presents more selective bibliographies on copyright records, book trade directories, and checklists of secondary materials. There is a 141-page index of names.

370

Vail, Robert W. G. *The voice of the old frontier*. Philadelphia, University of Pennsylvania Press, 1949. xii, 492 p. Z1249.F9V3

Reprinted in New York by Octagon Books (1970).

A bibliography of 1,300 selected works written by those living on the frontier of the 13 mainland colonies or by agents interested in frontier lands, the first editions of which appeared not later than 1800. The compiler does not include literature on the voyages and travels of nonresidents; political, religious, and military writings are listed only if they illuminate frontier life. Arranging the entries by date of publication, Vail offers 252 titles from the years 1763–89. He provides for each item information about its author, printer, publisher, bookseller, collation, editions, content, relation to other publications, and, in the case of the copy examined, condition. The annotations also contain cross-references to Sabin, Evans, and other specialized bibliographies and the names of libraries that hold the work. The compilation is introduced by three lectures on the writings of pioneers, Indian captives, and land agents.

Watt, Robert. *Bibliotheca britannica; or, A general index to British and foreign literature*. Edinburgh, Printed for A. Constable, 1824. 4 v. Z2001.W34

Contents: 1–2. Authors.—3–4. Subjects.

Reprinted in New York by B. Franklin (1965).

Accumulating nearly 40,000 entries over a 20-year period, the compiler attempted to list all books and significant periodical articles written by British authors through 1810 and important foreign works in English translation. Arranged in alphabetical order by writer, each entry in volume 1–2 includes a biographical note followed by a chronological list of the author's works in their various editions. In a two-volume subject-index, v. 3–4, Watt arranged the same works by date of publication under topics drawn from religion, literature, medicine, political economy, and the

like. The entry for America includes numerous titles from the years 1763–89 focusing upon the debate over the status of the colonies.

— A consolidated index to the microfilm series of 18th century periodicals and to the first 10 years of the 1800–1850 series. Ann Arbor, Mich., University Microfilms, 1956. 19 p. Z6951.U712

The index lists approximately 600 serials in alphabetical order, gives the dates of publication, and indicates the reel of microfilm on which it appears.

- 450 Ayer, Mary F., comp. Check-list of Boston newspapers, 1704–1780. With bibliographical notes by Albert Matthews. [Boston, The Society. 1907] xvii, 527 p.

(Colonial Society of Massachusetts, Boston. Publications, v. 9, Collections) F61.C74, v. 9

Identifying 15 newspapers that appeared under 42 titles, the compiler points out which of the 14 libraries surveyed holds issues published during the period. In separate lists for each paper she also correlates issue numbers with dates of publication and, in the table of contents, indicates successive name changes over the years. The *Boston News-Letter*, for example, used 10 other related titles after its publisher began to issue jointly with the printer of the *Boston Post-Boy* a third paper, the *Massachusetts Gazette*. Information on such vagaries is supplied in the notes prepared by Albert Matthews, which were published separately as *Bibliographical Notes on Boston Newspapers, 1704-1780* (Cambridge, J. Wilson, University Press, 1907. [403]-527 p. Z6953.B75M2).

Index to early American periodical literature, 1728-1870. pt. 1. The . . . of periodicals indexed. New York, Pamphlet Distributing Co., 1941. 11 p. A13.I5, pt. 1

Lists the titles and inclusive dates of 339 periodicals indexed between 1934 and 1941 on nearly 650,000 cards, mostly handwritten, as part of a WPA project. Each card provides information about the author and content of a single article, short story, poem, book review, or song. The author, title, and subject or firstline cards are filed separately for each category of literature; the subject cards for articles make up about one-third of the whole index. Located at the

New York University Library, the card file has been reproduced on microfilm by the Readex Microprint Corporation and is further described in a pamphlet entitled *Index to Early American Periodicals* (New York, Readex Microprint Corp. [1962?], 12 p.).

U.S. Library of Congress. Periodicals Division. A check list of American eighteenth century newspapers in the Library of Congress, originally compiled by John Van Ness Ingram. New ed., rev. and enl. under the direction of Henry S. Parsons, chief, Periodical Division. Washington, U.S. Govt. Print. Off., 1976. vi, 401 p. Z881.U5

Z6951.U47 1936

Reprinted in New York by Greenwood Press (1968).

Lists publications from 22 states by state and city. The compiler provides the dates of establishment and final issue, gives the names of printers, publishers, and editors, identifies successor journals, and indicates the issues held by the Library. An index of printers, publishers, and editors supplements the index of titles. This is a revised and enlarged version of the 1912 edition and supersedes the entries for 18th-century material in *A Check List of American Newspapers in the Library of Congress* (Washington, Govt. Print. Off., 1921. 292 p.).

471

U.S. Library of Congress. Union Catalog Division. Newspapers on microfilm. 6th ed. Washington. Library of Congress, 1967. xv, 487 p. Z6945.U5N43 1967

Compiled under the direction of George A. Schwegmann, Jr., chief.

Arranges entries for nearly 17,100 domestic newspapers by state and city of publication and 4,640 foreign papers by country and city. For each title, the compilers provide information on the inclusive dates of the microfilmed issues, frequency of publication, and locations of positive and negative microfilm copies. Newspapers from the Revolutionary period appear mainly under the 13 original states and England. A new edition, to be entitled *Newspapers in Microform: United States* (now in press), will contain approximately 32,640 reports on domestic newspapers in some 980 pages, including a 148-page index. A compilation of some 8,370 reports for foreign newspapers will be published separately.

P25.S82, no. 2

Lists 2,099 items in seven categories: 1) bibliographies and bibliographical studies; 2) beginnings of the newspaper; 3) general studies; 4) individual newspapers and periodicals; editors, authors, and publishers; towns and counties; 5) special subjects; 6) European newspapers and periodicals; and 7) American newspapers and periodicals. In the last section the compilers arrange the titles of 315 works by geographic region, colony, or state.

## PAMPHLETS AND BROADSIDES

474

Adams, Thomas R. American independence: the growth of an idea; a bibliographical study of the American political pamphlets printed between 1764 and 1776 dealing with the dispute between Great Britain and her Colonies. Providence, Brown University Press, 1965. xxi, 200 p. facsim. (Brown University bicentennial publications; studies in the fields of general scholarship) Z1238.A4

First issued in the *Publications of the Colonial Society of Massachusetts, Transactions*, v. 43.

"Bibliographies cited": p. [xxii]

Lists 231 pamphlets chronologically by the date of the first edition. Although most were written and published by Americans, citations to some English pamphlets are included because they were reprinted in America or because they elicited an American reply. Besides providing the names of the author, printer, or bookseller, and the title, pagination, and format of the pamphlets, Adams notes the circumstances surrounding the publication of the first edition, the earliest newspaper advertisement of the American edition, the relation of later editions to the first, and the major libraries in which each item may be found. The index of authors and titles is supplemented by an index to 19 pamphlet exchanges, such as the one following the publication of *Common Sense*.

Contents: v. 1. Geographic shelflist catalog.—v. 2. Author/title catalog, A-M.—v. 3. Author/title catalog, N-Z.—v. 4. Chronological catalog.

A photographic reproduction of catalog cards that describe more than 28,000 domestic and foreign broadsides printed between 1527 and 1971. The work includes over 2,600 cards for broadsides published during the Revolutionary era. Since the Library's holdings are arranged chronologically within geographic categories, the shelflist contains for each of the 13 colonies a group of cards representing items that appeared from 1763 to 1789. Under Massachusetts, for example, there are 588 cards for the period; under New York, 466; under Pennsylvania, 258; and under Virginia, 118.

## Guides to Dissertations and Theses

519

Dissertation abstracts international; abstracts of dissertations available on microfilm or as xerographic reproductions. v. 1+ [Ann Arbor, Mich.] University Microfilms, 1938+  
Z5053.D57

Frequency varies.

Also varies: v. 1–11 (1938–51), *Microfilm Abstracts*; v. 12–17 (1952–60), *Dissertation Abstracts*. Subject varies.

Beginning July 1966 (v. 27), issued in two sections: A, *The Humanities and Social Sciences*, and B, *The Sciences and Engineering*.

A monthly compilation of abstracts (up to 500 words in length) made of all dissertations available on microfilm and in xerographic copies from the publisher. Since the dissertations are compiled by academic discipline, the abstracts are arranged by subject field, such as modern history, political science, economic history, and religion. Two indexes, author and key word-in-title, are included in the monthly issues starting with volume 30; each index is cumulated annually. These indexes, along with a nine-volume retrospective index for volumes 1–29, provide a means of retrieving information on specific topics or, usually names, from the period 1763 to 1789. Entries under the heading *Revolution in the key-word-in-title index*, for example, refer to all dissertations whose titles contain the word *Revolution*. Entries written in the English, French, Russian, or other languages; by contrast, entries under the term *Revolution* in the heading *Stamp* refer only to dissertations on the Stamp Act crisis.

Since *Dissertation Abstracts International* does not include all dissertations accepted, *American Doctoral Dissertations* (1953/56+ Ann Arbor, Mich.: University Microfilms, annual) constitutes the most nearly complete listing of these (Vols. for 1953/56–1964/65 were issued as *U.S. Dissertation Abstracts*). Before 1956, the list appeared under the title *Doctoral Dissertations Accepted by American Universities* (no. 1–22: 1933/34–1954/55. New York, H. W. Wilson Co.). More restricted in its scope than any of the foregoing publications, *A List of American Doctoral Dissertations Printed in [1912]–1938* (Washington, U.S. Govt. Print. Off., 1913–40. 27 v.) describes dissertations received in the Cataloging Division of the Library of Congress from 1912 to September 1939. For abstracts of selected master's theses, see *Masters Abstracts* (Ann Arbor, Mich.: University Microfilms, 1962+ semiannual).

Kuehl, Warren F. Dissertations in history; an index to dissertations completed in history departments of United States and Canadian universities. [Lexington] University of Kentucky Press, 1965–[72] 2 v.  
Z6201.K8

Volume 1 lists alphabetically by author 7,695 dissertations completed in the years 1873 to 1960; volume 2 reports 5,884 for the period 1961 through June 1970. The subject index in each volume lists numerous references under broad headings, such as American Revolution, Continental Congress, Loyalists, and frontier, as well as under the names of individual battles, Revolutionary figures, and places.

Issue for 1900 (type 1900) and 1902–8 (printed)

were circulated privately; published annually, 1909-41, and irregularly, 1947+. There were no lists for 1942-46. Title and compilers vary.

In the current list, covering May 1967-May 1970 (Washington, American Historical Association, 1970. 113 p.), John T. Appleby arranges references to 3,487 disserta-

tions in progress according to a subject outline that includes sections on Great Britain in the 18th century and on American history between 1763 and 1815. He also provides separate indexes for topics and authors. An appendix, prepared by Patricia M. Fox, supplies bibliographic data on previous issues of the list beginning with 1906.

Gipson, Lawrence H. A guide to manuscripts relating to the history of the British Empire, 1748-1776. New York, A. A. Knopf, 1970. xxii, 490, xxxvi p. (*His The British Empire before the American Revolution*, v. 15) DA500.G5, v. 15

A compilation of relevant citations from published guides to archival and manuscript sources in more than 235 depositories, from the Public Record Office to the Huntington Library. The compiler relies most heavily upon the guides to British, French, Canadian, and West Indian repositories sponsored by the Carnegie Institution, Crick and Alman's guide to manuscripts relating to America in Great Britain and Ireland, Manross' description of the Fulham Palace papers, and Hamer's guide to archives and manuscripts in the United States. Arranging the entries by country, state or county, and depository, Gipson provides a brief introduction for each of the major institutions; he discusses its history, the significance of its holdings, and the printed guides to its collections. He also notes the date, scope, and content of each group of manuscripts that relates to the period 1748-76. The selective index lists for the most part proper names.

Hale, Richard W., ed. Guide to photocopied historical materials in the United States and Canada. Ithaca, N.Y., published for the American Historical Association [by] Cornell University Press [1961] xxxiv, 241 p. Z6209.H3

Bibliography: p. xxi-xxv.

Presents a union-list of 11,137 manuscript collections available in photocopy, based upon reports of cooperating institutions, and arranged by fields of study in history, usually a time period, subject, geographical region, or country. The entries for each state of the United States and for Great Britain as a whole are further classified according to the type of papers described, such as government, county, and church records, business and personal papers, and institutional records. The compiler indicates the scope of each collection and the location of the microfilm negative, includes an index, and appends a bibliography of finding aids and materials.

Beers, Henry P. The French in North America; a bibliographical guide to French archives, reproductions, and research missions. Baton Rouge, Louisiana State University Press [1957] xi, 413 p. Z1361.F8B4

Bibliography: p. 279-350.

Traces the history of various research missions to French archives, from Jared Sparks' trip in 1828 to the beginning of the Virginia Colonial Records Project in 1955, and describes the difficulties encountered and the reproductions—transcripts, photostats, and microfilm—obtained. An introductory chapter gives brief histories of the principal French depositories containing public records, ecclesiastical records, and private manuscripts relating to the history of the United States, a major portion of which cover the Revolutionary period. The detailed accounts of copying activities in French repositories provide information concerning the availability of transcripts and photocopies in many American and Canadian institutions, including the Library of Congress.

Miller Surrey (Mrs. F. M. Surrey). Priv. print. Washington, D. C., Carnegie Institution of Washington, Dept. of Historical Research, 1926-28. 2 v. Z1251.M6C2

Volume 2 of this typescript guide includes more than 2,400 entries, arranged chronologically, for the years 1763-89. The compiler notes the date, scope, content, and location of each manuscript.

526

Fish, Carl R. Guide to the materials for American history in Roman and other Italian archives. Washington, D.C., Carnegie Institution of Washington, 1911. ix, 289 p. (Carnegie Institution of Washington. Publication no. 128) CD1408.U6F5

Surveys the major record groups in the Vatican Archives and depositories in Rome, Naples, Venice,

Turin, and Florence. The compiler describes individual documents found in samples taken from each group and notes which classes seem to hold little or no material relating to America. A 30-page analytical index contains several references to the Revolution.

527

France. *Archives nationales*.—French consuls in the United States: a calendar of their correspondence in the Archives nationales. By Abraham P. Nasatir and Gary Elwyn Monell. Washington, Library of Congress, 1967. xi, 605 p. E183.8.F8A45

Summarizes the content of documents that originated with consulates in Boston, Charleston, New York, Norfolk, Philadelphia, and Williamsburg between 1778 and 1792 and that are available on microfilm in the Manuscript Division of the Library of Congress. In addition to biographical sketches of the 14 consular agents and chronological indexes of each man's correspondence, the compilers provide lists of French officials, such as Ministers of Marine, 1774-1834, and diplomatic agents in America, 1776-97.

Zusammengestellt im Auftrag der Deutschen Gesellschaft für Amerikastudien.* [n.p.] 1967. 11 v. in 5. CD3021.G45

Contents: 1. Schleswig-Holstein.—2. Hamburg.—3. Bremen.—4. Niedersachsen.—5. Berlin (West).—6. Nordrhein-Westfalen.—7. Hessen.—8. Rheinland-Pfalz und Saar.—9. Bayern.—10. Baden-Württemberg.—[11] Register.

A monumental guide to West German archival records that contains over 200,000 entries. The index includes under the entry Kriege—Amerikanischer Unabhängigkeitskrieg approximately 200-page references for items that range from the voluminous letters and documents of Lt. Gen. Friedrich von Riedesel in the State Archives of Lower Saxony at Wolfenbüttel to the numerous Hessian troop rosters, journals, and diaries in the State Archives of Hesse at Marburg. Other material from the period 1763-89 not necessarily relating to the war is scattered throughout. Volume 11 contains a name as well as a subject index. The compiler indicates which documents are available in photocopy at the Library of Congress.

Hill, Roscoe R., comp. Descriptive catalogue of the documents relating to the history of the United States in the Papeles-procedentes de Cuba deposited in the Archivo General de Indias at Seville. Washington, D.C., Carnegie Institution of Washington, 1916. xliii, 594 p. (Carnegie Institution of Washington. Publication no. 234) CD1859.S3U5

Analyzing 2,375 bundles of documents, the compiler describes individual letters and other material related to

various phases of the Spanish administration in Louisiana and Florida, 1761-1821, including Indian relations; politics; finance; immigration; military, social, and religious matters; and the superimposition of Spanish rule upon the French system. Hill provides for each entry the bundle number, dates of communications, names of correspondents, and a brief summary of the contents of relevant papers. The 100-page analytical index lists subjects as well as names and includes over 150 direct references to the Revolution.

AS32.A5, no. 120

Supplements, corrections and new inventory lists. Made by the German staff of the European Historical Mission of the Library of Congress. [Washington] 1929-32. 2 v. E173.L4 Suppl. Typescript (partly carbon copy) with additions and corrections in manuscript.

Surveys relevant material found in more than 50 depositories in Prussia, Bavaria, Brunswick, and other states. Papers from the Revolutionary period include those relating to the use of auxiliary German troops, such as contracts between George III and German heads of state, regulations and instructions for recruiting, official reports on the condition of troops in America, and diaries and journals kept by German officers and men. Other documents from the years 1763 to 1789 concern such matters as the establishment of diplomatic relations with the new republic and postwar emigration.

Contents: 1. Libraries.—2. Archives of the Ministry of Foreign Affairs, by W. G. Leland, J. J. Meng, and Abel Doysié.

Lists sources relating to French activity in North America from the early-16th-century to the middle of the 19th. Based on research completed before the First World War, the work includes documents bearing upon the operations of the early trading companies, colonization in Canada and Louisiana, commercial relations between the French, Spanish, and English colonies, the American phase of the Seven Years' war, and French participation in the American Revolution. Volume 1 describes the holdings of the Bibliothèque nationale and 12 other depositories. For each volume or file

box held by the depositories, the compilers provide the official title in French and summarize briefly the content of relevant manuscripts. In volume 2 they survey record groups in the Archives of the Ministry of Foreign Affairs. The documents are organized in two major series, diplomatic correspondence and memorials or other papers prepared by or submitted to the ministry; subdivisions in both series are arranged alphabetically by country. The volumes are indexed separately.

Washington, D.C., Carnegie Institution of Washington, 1925. viii, 203 p. (Carnegie Institution of Washington. Publication no. 359) Z1237.M43 AS32.A5, no. 359

Covers the present United States and its dependencies, British North America, the West Indies, Bermuda, and the Bahamas.

Marteson presents verbatim excerpts in 14 languages from the finding aids of more than 150 libraries. Arranged alphabetically by city and, under each depository, by authors or titles of the catalogs, the entries describe manuscripts dated from the 16th through the 19th centuries. The index contains many references to the Revolution.

Andrews, Charles M. Guide to the materials for American history, to 1783, in the Public Record Office of Great Britain. Washington, D.C., Carnegie Institution of Washington, 1912-14. 2 v. (Carnegie Institution of Washington. Publication no. 90A) CD1048.U5A6

Contents: I. The state papers.—II. Departmental and miscellaneous papers.

A guide to record groups and special collections generated by major British administrative units, such as the State departments, Foreign Office, Home Office, Colonial Office, Admiralty, Audit Office, Commissariat, Custom House, Paymaster General, Treasury, War Office, and High Court of Admiralty. Arranging the entries according to offices and departments, the compiler offers lengthy annotations and introductory essays intended to acquaint the user with the nomenclature, organization, and performance of the British administrative system. He reviews in 30 pages, for example, the background, procedures, and records of the Board of Trade. An appendix to v. 1 provides the conversion table and key to the reclassification scheme for the Colonial Office papers; the analytical index contains some entries for subjects.

gic Institution of Washington, 1908. xiv, 499 p. (Carnegie Institution of Washington. Publication no. 90)

CD1048.U5A55

Lists collections held by the British Museum (now the British Library) and 25 other depositories, including the archives of the Privy Council Office, House of Lords, and Royal Society. Andrews and Davenport arrange the entries according to collection and depository and note briefly the history, scope, and content of the relevant material found at each institution. Based upon their personal searches, they describe the manuscripts individually, providing the identification number, date, and names of signatories, plus a synopsis of the content of each document. The analytical index is devoted almost entirely to names. A list of transcripts from the British Library and the Bodleian Library acquired by the Library of Congress appears on p. 431-445.

Ayscough, Samuel, comp. A catalogue of the manuscripts preserved in the British Museum hitherto undescribed: consisting of five thousand volumes; including the collections of Sir Hans Sloane, Bart., the Rev. Thomas Birch, D.D. London, Printed for the compiler by J. Rivington, Jun., 1782. 2 v. Z6621.B84 1782 Micro

Although it is now considered inadequate, Ayscough's was the first of nearly 200 printed and handwritten guides to the British Museum's (now the British Library's) manuscript collections prepared since the 18th century. Beginning with the Sloane Manuscripts (numbered 1 to 4100) purchased in 1753, Ayscough listed manuscripts acquired between 1754 and 1782 (numbered 4101 to 5017). Of the more important guides published thereafter, the *Index to the Additional Manuscripts . . . Preserved in the British Museum, and Acquired in the Years 1783-1835* (London, Printed by order of the Trustees, 1849. 514 p.) fills the gap between Ayscough's catalog and the *Catalogue of Additions to the Manuscripts in the British Museum*, a series begun in 1836 and continuing through the latest volume published in London in 1970. With slight variations in title, the *Catalogue of Additions* lists in 20 volumes manuscripts obtained from 1836 to 1945. Indexes published separately or as part of individual volumes contain numerous references to papers from the Revolutionary period, usually under the names of notable figures. For a description of guides to manuscripts in the Library, see Theodore E. Skeat's *The Catalogues of the Manuscript Collections*, rev. ed. ([London] Trustees of the British Museum, 1962. 45 p.).

Bond, Maurice F. Guide to the records of Parliament. London, H.M. Stationery Off., 1971. x, 352 p. facsimis.

CD1063.B63

Includes descriptions of 18th-century archival material preserved in Westminster Palace and available at the House of Lords Record Office. Arranged according to the governmental body that created the material, the entries cover records of both Houses of Parliament, all documents that have been presented to or purchased by them, and papers that have accumulated in various parliamentary and nonparliamentary offices of the palace. The volume also provides information on the provenance of each group of records, calendars available, and reference works relating to Parliament and its members.

Beales. [London] Published for the British Association for American Studies by the Oxford University Press, 1961. xxxvi, 667 p. CD1048.U5C7

The *Guide* was prepared by the Survey of Sources for American Studies in the United Kingdom, a subcommittee of the British Association for American Studies.

Provides a brief description of all papers that relate to the history and literature of the American colonies and the United States and that lie outside the scope of the Carnegie Institution guides to British depositories compiled by Andrews, Davenport, Paullin, and Paxson. The compilers describe the holdings of 250 depositories in England and 59 in Wales, Scotland, and Ireland. The *Guide* is based upon reports from archivists, visits by staff members, transcriptions made from manuscripts in private hands, and the publications of the Historical Manuscripts Commission. It lists the collections by depository and the depositories by county, indicating the type, content, and inclusive dates of groups of related manuscripts within collections. A 112-page index includes subjects as well as proper names. Lists of addenda to the *Guide* appeared in the *Bulletin* of the British Association for American Studies, new ser., no. 5, Dec. 1962, p. 47-63, and no. 7, Dec. 1963, p. 55-64.

Each volume is separately classified. The society is publishing copies of lists and indexes previously available, in manuscript or typescript, only to researchers in the Public Record Office or other British archives. Among the more than 60 volumes released to date are volume 8, *Public Record Office Gifts and Deposits, Chatham Papers* (1966. 212 l. CD1047.C45 1966), which contains in the first series lists of correspondents found in the 100 volumes of the papers of Lord and Lady Chatham; volume 10, *Gifts and Deposits* (1966. 212 l. CD1046.1966.A52), which includes a brief guide to the Cornwallis papers in the Public Record Office; and volume 27, *Records of the High Court of Admiralty* (1967. 369 l. LL), which contains prize papers listing the masters and national origins of ships captured during the Revolutionary War.

561

Manross, William W., comp. The Fulham papers in the Lambeth Palace Library; American colonial section

calendar and indexes. Oxford, Clarendon Press, 1965. xxii, 524 p. BX5881.M26

Represents the extensive correspondence between the Anglican clergy in the colonies and the Bishop of London and thus forms a basic source for the history of the church in America. The 40 volumes in the collection are described as they are organized, in two series: general correspondence and ordination papers. The volumes within each group are further organized according to colonies, including those in the West Indies. A 12-page introduction contains a comprehensive discourse on the provenance and use of the papers. The compiler provides a 66-page index of subjects and names for his annotations and a 98-page index of names for the documents themselves.

Baker, Edward C. A guide to records in the Leeward Islands. Oxford, Published for the University of the West Indies by B. Blackwell, 1965. x, 102 p. map. CD3985.L4B3

Chronological lists are arranged by archive and island. Documents from the years 1763-89 are found in government, church, and family archives on Antigua, Montserrat, Nevis, St. Christopher, and the British Virgin Islands. The compiler also provides information on the history of the islands and their archives, records from the islands held by depositories in Britain other than the Public Record Office, and the preservation, repair, and control of documents in the islands.

596

Baker, Edward C. A guide to records in the Windward Islands. Oxford, Published for the University of the

West Indies by Blackwell, 1968. xii, 95 p. map.

CD3985.W5B3

A chronological list of record groups by island. The compiler lists the holdings of public, church, and private archives from the period 1763-89 on the islands of Grenada, St. Vincent, St. Lucia, and Dominica. Baker also includes brief essays on the provenance of the records, microfilm programs, and records management practices.

Washington, D.C., Carnegie Institution of Washington, 1926. ix, 435 p. (Carnegie Institution of Washington. Publication no. 372) CD1048.U5B4

Reports, in detail, selected holdings of repositories located on both sides of the Atlantic. Beginning with the Colonial Office papers in the Public Record Office, the compiler describes the West Indian and allied record groups, including those relating to Bermuda, the Bahamas, British Guiana, and British Honduras. Bell then covers the often less comprehensive holdings of repositories situated in the Bahamas, Bermuda, and the British West Indian Islands. Based upon research completed before 1914, the work supplements portions of Charles M. Andrew's *Guide to the Materials for American History, to 1783, in the Public Record Office of Great Britain* (entry 539) by providing specific information about the classes and descriptions of individual documents and letters. The analytical index contains subjects as well as names.

Chandler, Michael J. A guide to records in Barbados. Oxford, Published for the University of the West Indies by B. Blackwell, 1965. xi, 204 p. col. map. CD3985.B3C5

Includes bibliographies.

Surveys records from the past three centuries. The compiler arranges the entries according to the several types of institutions that originated the documents and held them when he completed the survey in 1961, including central and local governments, educational institutions, military units, churches, businesses, and private organizations. Chandler also lists manuscript collections held by libraries, museums, and individuals. Four appendixes provide information about copies of Barbadian acts and laws, government serial publications, maps and plans, and newspapers. A fifth appendix advises the user about record groups available on microfilm. The index contains references only to the microfilmed items.

Arranged alphabetically by depository, the entries range in scope from general statements about a library's holdings to descriptions of individual items or groups of letters found in large collections. Material of interest for the Revolutionary era includes the Isaac Backus collection at the Backus Historical Society, the Ezra Stiles papers at the Yale University Library, and the John Ettwein papers in the Archives of the Unitas Fratrum, or Moravian Church, at Bethlehem, Pa.

607  
Beers, Henry P. The French & British in the Old Northwest; a bibliographical guide to archive and manuscript sources. Detroit, Wayne State University Press, 1964. 297 p. F478.2.B4

Offers four essays on the provenance and publication by American and Canadian institutions of records, mainly from the 18th century, created by British, French, and Canadian officials. The author describes administrative files; judicial, notarial, land, and ecclesiastical records; and the papers of traders and land companies when they include government correspondence or documents. Beers also explains the governance of the Old Northwest, the land grant system, and the organization of both Protestant and Catholic missions and churches. A 63-page bibliography includes guides to archives and manuscripts, printed journals and other contemporary sources, and secondary publications. There is a 41-page index of subjects and names.

Kirkham, E. Kay. A survey of American church records; for the period before the Civil War, east of the Mississippi River. Salt Lake City, Deseret Book Co., 1959-60. 2 v. CD3065.K52

Includes bibliographies.

Contents: v. 1. Major denominations.—v. 2. Minor denominations; including a special treatise on the Huguenots of France in America and religious migrations and immigrations in the United States.

Volume 1 lists records of 10 major denominations by state, county, and parish, indicating the type of record—baptisms, minutes, vestry books, etc.—with inclusive dates, and the repository where the records were found. No attempt is made to include all records for all localities, and for some states records are noted only in bibliographic references. Volume 2 is divided between surveys that note the recordkeeping activities of 30 minor denominations and chronologies and short bibliographies that relate to migrations of religious groups in America.

The National union catalog of manuscript collections. 1959/61+ Washington, Library of Congress. Z6620.U5N3 Z663.74.A43

At head of title, 1959/61+: The Library of Congress catalogs.

Vol. for 1959/61 published in Ann Arbor, Mich., by

J. W. Edwards; vol. for 1962 and index, 1959-62, published in Hamden, Conn., by Shoe String Press.

Describes 27,312 collections reported between 1959 and 1970 by 805 American repositories to the Descriptive Cataloging Division of the Library of Congress. Data sheets completed by the depositories, copies of their catalog cards, and published guides to their holdings provide information for the entries. There are no limitations on the time, place of origin, or nature of the collections recorded, but archival records are included only when they are located outside of the normal repository. Thus county records found in the county courthouse are not reported, although the same records outside the county government buildings could be included in the NUCMC. Besides the location of the repository and the inclusive dates of the manuscripts, the NUCMC indicates for each collection its physical description, scope, and content; entries for personal collections also contain a biographical note. The indexes to the nine volumes of entries published thus far cite more than 140,000 subjects, places, personal names, and corporate bodies, and are cumulated in three volumes covering successive portions of the entire work; 1959-62, 1963-66, and 1967-69.

U.S. National Historical Publications Commission. A guide to archives and manuscripts in the United States.

Philip M. Hamer, editor. New Haven, Yale University Press, 1961. xxiii, 775 p. CD3022.A45

Lists the collections held by some 1,300 depositories in the United States. Using information gleaned from mail surveys, published guides, and archivists' revisions of draft entries, the compiler reports for each depository the major emphasis, time span, and size of its holdings and lists the publications that describe them. The entries, arranged by city and state, indicate briefly the scope and content of the important collections, usually papers of persons listed in the *Dictionary of American Biography* or a comparable source. The index contains all proper names and subjects mentioned in the guide.

partment of History and Government of the University of Maine with funds provided by the Federal Emergency Relief Administration. Directed by Elizabeth Ring. Orono, Me., Printed at the University Press, 1938. xx, 427 p. (University of Maine studies. Second series, no. 45) Z1291.M27

The *Maine Bulletin*, v. 41, Aug. 1938.

Describes the content of letters, diaries, account books, local histories, church records, and similar material, some of which pertains to the Revolutionary era. The compilers surveyed manuscripts held by individuals and institutions throughout Maine and obtained by mail descriptions of documents relating to the state in other depositories, such as the Massachusetts Historical Society. Part 1 lists by county collections that have a geographic orientation. Part 2—a subject listing of the remaining material—was apparently never published.

665

Breton, Arthur J. A guide to the manuscript collections of the New-York Historical Society. Westport, Conn., Greenwood Press [1972] 2 v. (875 p.)

CD3409.N5B74

Contents: v. 1. Descriptive inventories.—v. 2. Index & chronological listing of entries.

Of 3,691 collections listed, more than 1,200 contain material dated before 1789. The compiler provides biographical data on the principals, information on the types of material—letters, journals, diaries, and account books—in each collection, and the inclusive dates of the manuscripts. Among the prominent figures represented are Horatio Gates, George Clinton, Joseph Reed, William Alexander, Lord Stirling, and John Jay. Breton also describes the papers of Alexander McDougall, John Lamb, Goldsbroow Banyar, and John Jones, as well as those of merchants like Solomon Townsend, Charles Nicoll, John and Henry Cruger, and Jonathan Lawrence. A 225-page subject and name index in volume 2 is complemented by a 47-page chronological index that contains nearly 4,000 entries, including more than 800 from the years 1763 through 1789. *The Survey of the Manuscript Collections in the New-York Historical Society* (New York City, New-York Historical Society, 1941. 96 p. Z1317.N654), compiled by Susan E. Lyman, describes many of the same collections.

The report is accompanied by three chronological lists, each with separate half title: 1. Calendar to the Holland documents in the office of the Secretary of State at Albany; transcribed from the originals in the Royal Archives at The Hague and in the archives of the city of Amsterdam (16 volumes covering the period 1603-62). 2. Calendar to the London documents—transcribed from the originals in the Queen's State Paper Office; in the office of the Privy-

Council; in the library of the British Museum; and in the library of the Archbishop of Canterbury (47 volumes, 1614-1782). 3. Calendar to the Paris documents . . . transcribed from the originals in the archives of the "Ministère de la marine et des colonies," of the "Ministère de la guerre," and in the "Bibliothèque du roi" (17 volumes, 1631-1778).

The 80 volumes of transcripts were published, with a general index, in O'Callaghan's *Documents Relative to the Colonial History of the State of New York* (entry 1748).

Q11.P612, v. 66

Provides brief content and biographical notes for 692 manuscript collections held by the society's library and 12 record groups found in its archives. The papers of scientists and members of the society predominate among the manuscript collections, some of which are in microform. An analytical index contains references to the Revolution under a variety of subheadings, including Accounts, Canada, Music, and Orderly Books. The *Catalog of Manuscripts in the American Philosophical Society Library, Including the Archival Shelflist* (Westport, Conn., Greenwood Pub. Corp. [1970] 10 v.), which includes an introduction by Whitfield J. Bell, is a photographic reproduction of individual catalog cards, most of which provide data on single manuscripts within the several collections. The shelflist is arranged chronologically; more than 325 cards describe institutional correspondence and committee reports from the years 1763-89.

First edition published in 1940.

Surveys 1,611 manuscript collections then held by the society and provides varying amounts of information about the scope, content, provenance, and research value of each. A 62-page analytical index includes numerous references to subjects associated with the Revolution, such as the British and American armies, battles, the Declaration, and the Constitution. Index entries relating to Pennsylvania are subdivided by decade; 14 collections, for example, contain material on economic conditions between 1770 and 1780, while 30 bear upon politics in the colony during that decade.

Describes the holdings of the state archives at Annapolis for the years 1636-1827: 8,747 letters, petitions, lists, proceedings, drafts, council proposals, depositions, statements of account, and their enclosures, of which 5,640 are dated 1763 through 1789. Arranging the entries within each volume in chronological order, the compilers provide a generous synopsis of the contents of each document and list the names of the signatories and others mentioned therein. The annotations contain material on a wide range of topics in political, constitutional, military, economic, and social history. The covers of the individual volumes of the *Calendar*, known familiarly as the Rainbow Series, are the same color as the bindings on the set of documents they describe. Since the manuscripts were bound over the years without regard to date or subject, each entry includes a cross-reference indicating the location of a particular document within the bound set.

U.S. Dept. of State. Catalogue of manuscript books; being records of the Proceedings of Congress; the domestic and foreign correspondence thereof; military letters; reports of the Boards of War, Finance, Admiralty, &c.; with miscellaneous letters and papers relating to the War of the Revolution, and of the Confederacy; from 1774 to 1789. Deposited in the Archives of the Department of State, by act of Congress, approved September 15, 1789. Washington, Printed by Blair and Rives, 1835. 24 p. CD3031.1835

Reprinted, with addenda, in Washington by A. O. P. Nicholson, Public Printer (1855. 72 p.).

Surveys the records of the Continental Congress that were transferred from the Department of State to the Library of Congress in 1903 and thence to the National Archives in 1952. While the records are in 518 separate bindings, the *Catalogue* describes them in a numerical sequence of 194 series called "item numbers," a nomenclature still used today. The *Catalogue*, for example, lists under item no. 1 the contents of the 39-volume *Journal of Congress*, 1774-89. The first *Bulletin* of the Bureau of Rolls and Library of the Department of State (Washington, Dept. of State, 1893. 45 p.) repeats in less detail the information found in the *Catalogue* and adds a 77-page index, complete only through the entry for "Loyalists." The *Bulletin* also provides a "documentary history" of the Constitution, 1786-87. Herbert Friedenwald's *Journals and Papers of the Continental Congress* (Philadelphia, 1898. 60 p.), reprinted from the *Pennsylvania Magazine of History and Biography* for 1897, compares the manuscript papers with copies printed by order of Congress during the Revolution.

These earlier works have been supplemented by a pamphlet guide entitled *Papers of the Continental Congress, 1774-1789* (Washington, 1971. 67 p.), issued by the National Archives to accompany the microfilm of the papers, M247. The compilers discuss the provenance of the manuscripts, explain their arrangement, and offer a roll-by-roll description of the documents. Besides item numbers 1-194, the microfilm also contains no. 195, oaths of allegiance, 1776-89, and no. 196, records of ships' bonds required for letters of marque and reprisal, 1776-83. A comprehensive index to the Continental Congress papers has been prepared by the National Archives.

U.S. Library of Congress. Quarterly journal. v. 1+ July/Sept. 1943+ [Washington] illus., facsim., maps, music, plates, ports. Z881.U49A3  
Z663.A5

Title varies: 1943-63, *Quarterly Journal of Current Acquisitions*.

"Published as a supplement to the *Annual Report* of the Librarian of Congress."

The October issue regularly contains an article describing the significant acquisitions of the Manuscript Division from the previous year. Until 1964 this information appeared in the May issue. Beginning in 1968 the narrative report was supplemented by a list of manuscript acquisitions classified according to subject and time period, including the

colonial and Revolutionary era, *An Index to References to Manuscripts and Reproductions Thereof in the Library of Congress Quarterly Journal of Current Acquisitions, Volume 1, Number 1 to Volume 8, Number 8, Inclusive, 1943-51* ([Washington] 1951. 45 l. Z663.A52) has been compiled.

Reports for the fiscal years 1898 through 1943 contain varying amounts of information regarding the significance, provenance, content, and scope of notable acquisitions by the Manuscript Division. The descriptions are usually grouped according to period and subject, such as colonial, Revolution, or military. References to some collections are found in the index to each volume. Annual accessions lists of manuscripts, broadsides, and British transcripts acquired by the division were included as appendixes to the reports for the years 1900/1901-1919/20, issued separately (Washington, Govt. Print. Off., 1922-26. 5 v.) during the period July 1920/21-25, and then discontinued. There are several cumulations of these annual lists (see entry 758). Beginning in 1943 articles about the division's acquisitions and holdings appear in the Library's *Quarterly Journal*.

U.S. Library of Congress. Manuscript Division. A guide to manuscripts relating to American history in British depositories reproduced for the Division of Manuscripts of the Library of Congress. [By] Grace Gardner Griffin. [Washington] Library of Congress, 1946. xvi, 313 p.

CD1048.U5A35 1946  
Z663.34.G8

Intended to be used in conjunction with the guides to British depositories prepared by Andrews, Davenport, Paullin, and Paxson, the work lists Library of Congress holdings of transcripts, facsimiles, films, and photostats made from papers in government archives, libraries, societies, and other institutions in England, Scotland, Wales, and Ireland. Griffin's descriptions are based on the guides to the original documents published by the depositories and conform to the system of classification used by each. She provides the class or volume number, inclusive dates, and title or brief contents note for each whole volume reproduced and describes individual manuscripts only when the copies represent less than the complete volume. The analytical index of names also contains subject entries.

758

U.S. Library of Congress. Manuscript Division. Handbook of manuscripts in the Library of Congress. Washington, Govt. Print. Off., 1918. xvi, 750 p.

Z6621.U55  
Z663.34.H2

A classic guide that offers for each collection then held by the Manuscript Division a history of its acquisition, a biographical note, a paragraph or more describing its scope, content, and size, the names of important correspondents,

and titles of other published sources of information about the papers. The *Handbook* also contains a list in which the collections are grouped under 24 broad subject headings, such as Colonial, Revolution, States, and Constitution. A 205-page index includes entries for subjects as well as names. The *Handbook* largely supersedes the lists published earlier, including Herbert Friedenwald's *Historical Manuscripts in the Library of Congress* (Washington, Govt. Print. Off., 1899. 10 p.) and *The Manuscript Collections in the Library of Congress* (Washington, Govt. Print. Off., 1916. 9 p.).

Two compilations describe the Manuscript Division's important accessions between 1918 and 1938: Curtis W. Garrison's "List of Manuscript Collections in the Library of Congress to July, 1931," published in the American Historical Association's *Annual Report* for 1930, v. 1 (Washington, 1931), p. 122-249, and C. Percy Powell's "List of Manuscript Collections Received in the Library of Congress, July 1931 to July 1938," in the American Historical Association's *Annual Report* for 1937, v. 1 (Washington, 1938), p. 113-145. Both lists were reissued separately the following year by the U.S. Government Printing Office. The two differ in that Garrison includes in his work most of the collections found in the *Handbook* and provides cross-references to it and to manuscript acquisitions described in the annual *Report* of the Librarian of Congress, while Powell limits the scope of his list to new acquisitions. Both compilers divide the entries according to six periods of American history, very briefly identify the principal, indicate the scope, content, and size of the collections, and provide an index.

Since no single published source describes all of the Library's manuscript holdings for a given historical period, the staff of its American Revolution Bicentennial Office has prepared a comprehensive guide to manuscripts and reproductions from the Revolutionary era. For other descriptions of primary source material in the Library's collections, see entries 540, 615, 618, 748-750, 752-753, 755, 757, 759, and 763-764.

U.S. Library of Congress. Manuscript Division. Naval records of the American Revolution, 1775-1788. Prepared from the originals in the Library of Congress by Charles Henry Lincoln, of the Division of Manuscripts. Washington, Govt. Print. Off., 1906. 549 p.

Z6621.U58N3  
Z663.34.N3

Describes, in chronological order, individual manuscripts relating to naval history found in the papers of the Continental Congress, the letterbooks of the Marine Committee and its successors, 1776-80, the George Washington papers, and other collections. A second and longer list, titled "Bonds of the Letters of Marque," contains entries arranged in alphabetical order by ship and provides information regarding the type of ship, number of guns and crew members, amount of bond, and the names and addresses of the master, owners, bondor, and witness. There is one index of names for both lists.

Z6620.G7U5  
Z663.7.B7

Reprinted in New York by Greenwood Press (1968).

A checklist of the contents of 2,652 reels of microfilm that reproduce nearly five million pages of manuscripts in some of the major public and private collections of England and Wales. Most valuable for the Revolution are collections in the British Museum and the Public Record Office, including the Colonial Office papers on each colony, the American Loyalist Claims in the Treasury, and the Amherst papers in the War Office. The Amherst papers are annotated with the names of signatories. Positive copies of the microfilm are available through the Library of Congress.

U.S. *National Archives*. Guide to the records in the National Archives. Washington, U.S. Govt. Print. Off., 1948. xvi, 684 p. (Its Publication no. 49-13)

CD3023.A46 1948

Supersedes the *Guide* of 1940.

Surveys the contents of 224 record groups, places in historical perspective the governmental agencies that created the records, and describes the provenance of the files. Arranged in numerical order by record group, the entries indicate the type, subject, chronological span, quantity, arrangement and completeness of the documents. An analytical index contains numerous references to subjects from the years 1763-89. A new edition is in press. Subsequent acquisitions are reported in the *National Archives Accessions* and, beginning with the spring 1969 issue, in its successor, *Prologue, the Journal of the National Archives*. The *List of National Archives Microfilm Publications*, first issued in 1947 and reissued periodically, lists by government department or bureau and record group the microcopy number and price for thousands of reels produced since 1940.

U.S. *National Archives*. Preliminary inventory of the War Department collection of Revolutionary War records (record group 93). Compiled by Mabel E. Deutrich. Rev. by Howard H. Wehmann. Washington, 1970. vii, 29 p. (Its Preliminary inventories, no. 144)

CD3026.A32, no. 144 1970

First published in 1962, the guide describes the contents of the ledgers, journals, orderly books, account books, and card files that make up Record Group 93. The bulk of the material relates to the military service of individual soldiers and officers, the activities of various military units, and the acquisition and distribution of supplies and stores by the Quartermaster General's Department.

Other preliminary inventories contain references to caches of records from the years 1763-89. For example, the *Preliminary Inventory of the Records of the Supreme Court of the United States (Record Group 267)* (Washington, 1962. 20 p.) describes, under the heading Records of the Court of Appeals in Cases of Capture, Revolutionary war prize case

files, 1776-86, miscellaneous case papers, 1772-84; and miscellaneous court records, 1777-89. A two-volume, looseleaf, typescript guide to pre-Federal records in the National Archives is available to readers in the Search Room.

CD3024.V3 1907

First edition published in 1904.

A general survey of administrative records and manuscripts held in 1907 by the originating departments and primary source material in the Library of Congress and the Department of State. Organizing the volume by department and agency, the compilers sketch the background of each administrative unit, explain its filing methods, describe the size, scope, and content of the individual collections within its archival holdings, and provide an index of subjects and names. The sections that pertain to the Library of Congress and the Department of State were reprinted separately in 1907 by the Press of the New Era Printing Company, Lancaster, Pa. The 40 pages that describe material in the Manuscript Division of the Library of Congress were largely superseded by the *Handbook* (see entry 758).

Bibliography: p. [289]-304.

Dividing the book into three parts, the author describes the treatment accorded public records in the colony, the role of 19th-century historians in collecting and publishing documents, and the work undertaken by state and local historical societies. The normal hazards of war were compounded in North Carolina by the breakdown of royal government between 1774 and 1776 and by the peripatetic nature of the state government until 1794; as a result, many valuable records were lost during the Revolution.

Provides summaries of the contents of 12 collections that contain material relating to the state. The compiler arranges the entries for individual manuscripts in chronological order within each collection. Of interest for the Revolutionary period are the David L. Swain papers (1772-89), Emmet manuscripts (1757-89), proceedings of court martial and trial of Col. Charles McDowell (1782), Dartmouth manuscripts (1720-83), Hayes collection (1748-89), and miscellaneous papers dated between 1755 and 1789. A 42-page index includes several references to the war.

guide to manuscripts, by Susan Sokol Blosser and Clyde Norman Wilson, Jr. Chapel Hill [1970] [251], 48, [17] p. Z6621.N8S65

Describes over 3,000 collections, most of which relate to some phase of Southern life. Arranged by accession number, the entries provide information on the type of the material, its inclusive dates, topics covered, important correspondents, states prominent in the collection, and restrictions on use. An index of names and subjects includes references to collections that contain manuscripts from the Revolutionary period, such as the papers of Thomas Burke, Richard Caswell, William Lytle, and Edmund Pendleton. An earlier guide, published as an Historical Records Survey project (Chapel Hill, University of North Carolina Press, 1941. 204 p.), describes in greater detail the first 809 accessions, some of which are omitted entirely from the 1970 guide.

Each vol. issued in portfolio.

Maps and plates hand colored.

"The *Atlantic Neptune* was the first great marine atlas of views and charts covering the east coast of North America from the St. Lawrence River southward to the Mississippi River. . . . In many instances the charts were the earliest published detailed surveys of the areas shown and were of such a quality that they were in general use as the standard charts of the east coast for over fifty years. . . . [The atlas] is divided into four series: Nova Scotia, New England, the River and Gulf of St. Lawrence, [and] New York southward. . . . The original charts and views from which these plates have been reproduced are in the collection of Augustus P. Loring."

The *Neptune* was based largely upon the surveys conducted under Des Barres' direction between 1764 and 1775. During the Revolution he supervised a staff of over 20 specialists, at his London headquarters, in compiling from the survey data some 250 charts and in engraving copper plates to reproduce them. These charts were used extensively by the British Navy during the later years of the war. Because bound volumes of the *Neptune* were usually assembled according to the order of a particular ship's captain, no two extant volumes are identical in content. Moreover, the revision of individual charts ensured even greater variation among subsequent volumes. The noted collector Henry N. Stevens has identified upwards of 800 separate states of the original charts—see his *Catalogue of the Henry Newton Stevens Collection of the Atlantic Neptune, Together With a Concise Bibliographical Description of Every Chart, View and Leaf of Text Contained Therein, as Also of Certain Other States Observed Elsewhere*, corr., rev. & augm. by Henry Stevens (London, H. Stevens, Son & Stiles [1937?] 2 v. [xii, [43], 338 l.) GA369.D43S74 G&M). The Geography and Map Division of the Library of Congress has 20 *Atlantic Neptune* sets, each comprising from one to three volumes. The division also has a number of individual *Neptune* charts (see Walter W. Ristow's "Maps of the American Revolution: a Preliminary Survey," in the *Quarterly Journal of the Library of Congress*, v. 28, July 1971, p. 200-202).

Wheat, James C., and Christian F. Brun. Maps and charts published in America before 1800; a bibliography. New Haven, Yale University Press, 1969. xxii, 215 p. maps. Z6027.A5W68

Bibliography: p. 187-297.

Attempting to describe all known cartographic works published in America before 1800, the compilers list 915 maps and charts that were either published separately or appeared as part of a larger work—in atlases, gazetteers, almanacs, and magazines or as illustrations in books and pamphlets. Classified by geographic and political area and arranged within these divisions by date of publication, the entries contain information on the author, appearance, scale, content, history, and later editions of each map, as well as location of copies in major collections in the United States and Great Britain. More than 225 of the maps described appeared during the Revolutionary era. The compilers also provide a list of 552 works that they consulted while preparing the guide and an index of engravers, cartographers, publishers, and others mentioned in the annotations.

Karpinski, Louis C. [Manuscript maps, prior to 1800, relating to America; photographic facsimiles made from originals in various libraries and archives in Paris, Spain and Portugal. 1927-28] 986 maps. G&M

During the course of his research in European archives, Karpinski secured photographs of manuscript maps relating to the early history of America. Sets were distributed among cooperating depositories in the United States, principally the Clements, New York Public, Newberry, and Huntington libraries and the Library of Congress (see the brief notice in the *American Historical Review*, v. 33, Jan. 1928, p. 328-330). The 986 photographs at the Library of Congress have been arranged by geographic region and dispersed throughout the collections of the Geography and Map Division. The division has prepared its own typescript list of the reproductions, which include charts, drawings, and maps of the

routes of the French fleet under D'Estaing, 1778-79, the camps and marches of Rochambeau, 1780-82, and the Battle of Yorktown.

Vols. 1-4 compiled under the direction of Philip Lee Phillips, chief, Division of Maps and Charts; v. 5+, by Clara E. Le Gear.

A catalog providing full bibliographic data on more than 10,000 atlases held by the Library of Congress. The entries are arranged according to an outline that contains major geographic headings, such as World, Western Hemisphere, North America, United States, Canada, and so on, through South America, Europe, and the other continents. Under each geographic heading are subject headings for maritime, military, ecclesiastical, historical, and general atlases, and the like. The section on the United States also contains subheadings for the individual states and their counties and cities. In their annotations for atlases published before 1870, the compilers list the titles of the individual maps found in each work. Of particular interest for the Revolutionary era are the Atlantic Neptune charts, the manuscript maps of Rochambeau and Hills, the published atlases of Jefferys, Faden, Le Rouge, and Kitchin, and the survey of U.S. roads by Christopher Colles. The general index for each volume includes references to individual maps within each atlas; the several items that make up an index entry are arranged by date. Author lists are found in all volumes. Volumes 1-4 treat atlases acquired before 1920; volumes 5-6 report accessions, 1920-55, of world atlases

and those covering the Eastern Hemisphere. Two more volumes relating to the Western Hemisphere are planned. Meanwhile, the two volumes of Le Gear's *United States Atlases* (entry 983) records without annotation or general index the Library's accessions to 1952, including those described in volumes 1-4 of *A List of Geographical Atlases in the Library of Congress*.

982

U.S. Library of Congress. Map Division. A list of maps of America in the Library of Congress, preceded by a list of works relating to cartography. By P. Lee Phillips, chief of the Division of Maps and Charts. Washington, Govt. Print. Off., 1901. 1137 p.

Z881.U5

Z6027.A5U5

Reprinted in New York by B. Franklin (1967?) and in Amsterdam by Theatrum Orbis Terrarum (1967).

Describes maps of the Western Hemisphere, including those in manuscript and those published in books and atlases. The compiler arranges them in one alphabetical list according to the specific name of the place they represent, whether it be a continent, country, state, or town, an ocean, lake, or river, or some other geographic entity such as a mining district. Maps from the Revolutionary era, including those in Faden, Rochambeau, and Force collections, are scattered throughout the whole work; under Yorktown, Va., for example, there are 33 items that relate to the war. The list of maps is preceded by a 90-page bibliography of cartography.

983

U.S. Library of Congress. Map Division. United States atlases; a list of national, State, county, city, and regional atlases in the Library of Congress. Compiled by Clara Egli Le Gear, Division of Maps. Washington, 1950-53. 2 v.

Z881.U5 1950at

Subtitle of v. 2 varies slightly.

Vol. 2 issued as suppl. to the Library of Congress catalog.

Vol. 1 reprinted in New York by Arno Press (1971).

The first volume reports title and collation of 3,571 atlases held by the Library in 1949, while volume 2, a union list of atlases, describes 3,123 others; works accessioned by the Library between 1949 and 1952 and those held by 132 cooperating libraries. Entries in both volumes are arranged by topic or by state, county, and city; atlases from the Revolution appear under the headings for each of the 13 original states. *A List of Geographical Atlases in the Library of Congress* (see entry 981) provides annotations and an index for accessions before 1920.

984

U.S. National Archives. Pre-Federal maps in the National Archives, an annotated list. Compiled by Patrick D. McLaughlin. Washington, 1971. ix, 42 p. facsim. (*Its* Special list, no. 26)

G&M

Lists 166 atlases and maps, more than 125 of which pertain to the Revolutionary period.

## CHAPTER TWO

### *General Studies; Regional, State, and Local*

*This chapter includes those general primary and secondary works that do not fall within a specific topic-chronological category and local histories that are not confined to a particular event or subject.*

#### HISTORIOGRAPHY

IT HAS BECOME a commonplace that each generation reinterprets the past. For the American Revolution this statement is especially appropriate. No two scholars working independently and using the same sources have reached identical conclusions regarding the causes and consequences of the Revolution. Patriot and Loyalist views were substantially recast by 19th-century nationalist historians such as George Bancroft and John Fiske. Their interpretations, in turn, have been challenged in the 20th century by the writings of the imperial, Namierite, progressive, and neo-Whig schools (see the introduction to *Periodical Literature on the American Revolution: Historical Research and Changing Interpretations, 1895-1970*, entry 48). Fortunately, the path of Revolutionary historiography has been well charted in historiographical essays, collections of selected writings, and biographies of historians, many of which are listed in this section. It should be pointed out, however, that only general treatments appear here. Historiographical writings concerning particular aspects of the Revolution, such as the Stamp Act, western settlement, military affairs, loyalism, diplomacy, or the Constitution, will be found in the appropriate subject chapters.

Vol. II [1778-1779]

Though bearing different titles, these volumes actually constitute one work, of which the first part is not numbered and the second and third are called "first volume" and "vol. II," respectively. The work is one of several histories largely plagiarized from the *Annual Register*. Pages 3–69 of the first part appear to have been copied from William Russell's *History of America* (London, 1778), v. 2, p. 425–457. The remainder of the first part and practically all of the second and third parts apparently are reprinted from *An Impartial History of the War in America* (London, 1780).

The author's multivolume history, published to widespread acclaim between 1834 and 1885, appeared in many editions. The "last revision" of 1883-85 has been reprinted in Port Washington, N.Y., by Kennikat Press (1967).

Using extensive quotations from contemporary speeches and documents, Bancroft emphasizes in his last three volumes the democratic as well as the heroic aspects of the Revolutionary era. The Declaration of Independence and

the Constitution evolved from the necessities of the times rather than from abstract speculation; thus, American independence, in his view, was not a break in tradition, but a step forward in Western civilization's progress toward mastery over nature.

Scholarship of the past 25 years has shown that 18th-century Americans drew heavily upon English libertarian theory in creating a unique and pervasive attitude toward society and government. Although they disagreed vigorously over ends and means, those who espoused the new republican ideology generated institutional change that moved American society from deference to democracy.

"Appendix: Amendments to the Constitution of the United States, with dates of adoption": p. [363]-367.

Sixty-two documents, each preceded by a historical introduction, that focus upon imperial protest and the problems of political organization in America. In addition to the Declaration of Independence, the Articles of Confederation, and the Constitution, Morison includes the more important royal instructions, acts, resolves, and state constitutions that indicate constitutional shifts throughout the Revolutionary era. Nonofficial letters, pamphlets, petitions, and debates that reflected and influenced public opinion are provided for balance.

1180

Morris, Richard B., comp. *The American Revolution, 1763-1783; a Bicentennial collection*. Columbia, University of South Carolina Press [1971, 1970] xix, 361 p. E203.M87 1971

Includes 78 documents arranged chronologically under 20 headings, each with a brief introduction, intended to highlight the major themes of the period, from the growth of anti-imperial sentiment indicated by James Otis' speech against the Writs of Assistance in 1761 to the appraisal of revolutionary social change made by David Ramsay in 1789.

1181

Niles, Hezekiah. *Principles and acts of the Revolution in America; or, An attempt to collect and preserve some of the speeches, orations, & proceedings, with sketches and remarks on men and things, and other fugitive or neglected pieces, belonging to the Revolutionary period in the United States*. Baltimore, Printed and published for the editor, by W. O. Niles, 1822. viii, 495 p. E203.N69

Reprinted in New York by B. Franklin (1971).

A pioneering compilation of documents by the publisher of *Niles' Weekly*. The volume's confusing arrangement, only partially relieved by a brief index, was corrected to some degree by Niles' grandson, Samuel V. Niles, who prepared a new edition for the centennial of independence. Considered more convenient to use, the *Centennial Offering; Republication of the Principles and Acts of the Revolution in America* (New York, A. S. Barnes, 1876. 522 p.) contains all the documents from the first edition arranged chronologically for each colony or under six other headings, together with a brief index. In *Chronicles of the American Revolution* (New York, Grosset & Dunlap [1965] xxiii, 342 p.), Alden T. Vaughan has selected over 120 documents from Niles' 1822 edition and arranged them in nine subject categories, each with an introductory statement, from the Stamp Act crisis to the Philadelphia Convention.

Andrews, Charles M. The American Revolution: an interpretation. *American historical review*, v. 31, Jan. 1926: 219-232. E171.A57, v. 31

Considers the Revolution to have been fundamentally a political and constitutional struggle between two societies—one static, the other dynamic—separated by an ocean and bound only by legal ties. It began early in American history with the first signs of resistance to administrative and commercial control.

In the last quarter of the 18th century the nation tested the right of opposition that had been legitimized by the Revolution. The transfer of power from the Federalists to the Jeffersonian-Republicans in 1800 ensured that dissent and debate, within the framework of "a common allegiance," would serve as the foundation of American institutions.

Contents: The laws of nature and of nature's God.—The ideology of independence.—The ideology of parental authority.—The psychology of revolution and repression.

After first describing the ideological and psychological basis of imperial authority and colonial dependency, the authors argue that the Revolution involved a twofold process: the conscious, calculated rejection of a constraining ideology in favor of one that permitted national autonomy, and the inner, emotional revulsion against colonial inferiority and subjection.

"Bibliographical notes": p. 375-421.

Concentrating upon the similarities among the colonists, Boorstin interprets selected aspects of life in 17th- and 18th-century Massachusetts, Pennsylvania, Virginia, and Georgia; surveys colonial thought in science, higher education, popular literature, and other fields; and comments upon the significance of the citizen-soldier in American history. He suggests that the pragmatic bent of 20th-century Americans evolved from the outlook of their 18th-century forebears, who eschewed theory and abstraction in favor of a practical approach to everyday problems.

Includes bibliographic references.

Stressing the complexity, multiplicity, and contradiction within the colonial experience, the author traces the interplay of two major themes: attempts by government officials to win acceptance of their authority, and the search for stability in the midst of an ever-broadening cultural and ethnic pluralism. In his chapter on the ambiguities of the Revolution, Kammen argues that differing interpretations of the period arose among historians because contemporaries themselves could not agree on the origins, meaning, and consequences of the war. He cites such examples of obvious contradictions as the tension between aristocratic and democratic elements embodied in the Constitution and the dual legacy that praised the civilian soldier while expressing pride in the regular army.

Traces the emergence of distinctly American patterns of life during the colonial period and describes the effect upon the colonies of three major revolutions—the ascendancy of Parliament over Crown and the rise of a commercial and industrial class in Great Britain, the diplomatic realignment in Europe that led to the French rapprochement with the English colonies in America, and the political, economic, and cultural maturation of the provinces. These changes required by 1763 a major adjustment in the relationship between Great Britain and the American provinces that was not forthcoming. During the course of the Revolution, two centuries of colonial experience was examined, redefined, and elevated to the status of principle in the Declaration of Independence, the state and national constitutions, and the Bill of Rights.

Alden, John R. A history of the American Revolution. New York, Knopf, 1969. vii, 541, xvi p. illus., maps, ports. E208.A38

"Essay upon authorities": p. 525-541.

Avoiding tangled historiographical issues, Alden presents a fast-paced narrative of the Revolutionary era emphasizing military campaigns and strategy, the struggle on the western frontier, and the tragic fate of the Loyalists, while devoting less space to the postwar period. On the whole, he believes that the Declaration of Independence was politically and morally justifiable and that the real achievement of the Revolutionary generation was the establishment of a strong American union in 1789.

Bibliography: p. 284-297. Bibliographic references included in "Reference notes" (p. 279-283).

The second volume in a Marxian survey of American history begun with *The Colonial Era* (New York, International Publishers, 1959. 158 p.). Aptheker views the period as a struggle for dominance between a "rising" American middle class and a "restraining" English middle class on the one hand and an internal conflict between the colonial working classes and the local aristocracy on the other. He contends that an overwhelming majority of Americans supported democratic changes in a unified struggle against British imperialism.

In a fast-paced narrative the author describes the progress of a diverse people toward national unity in the face of British shortsightedness and self-interest. Channing believes that the Revolutionary struggle had its origins in economic incompatibility: while British prosperity resulted from colonial exploitation, American commercial expansion depended upon increased profits from land and trade. Once free from economic restraints, Americans entered a period of social and political reform.

Egerton concludes that the undefined relationship between England and the colonies precipitated the War of Independence; indeed, it was inevitable, because English statesmen could not imagine an empire in which the component parts retained complete local self-government.

"Bibliographical note": p. 158-166.

In a brief survey touching upon most of the important

aspects of the period, Morgan sees the Revolutionary era as a quest for the principles of freedom that bred unification rather than division. The break with England stemmed from irreconcilable differences of opinion over the nature of government, the limits of authority, and the rights of man—theories that were clarified and safeguarded by the new state constitutions. Rather than symbolizing a triumph of conservative interests, the federal Constitution both consolidated Revolutionary gains and provided a framework for the further exploration of republican principles.

In a general account the author emphasizes the social context in which a scattered agricultural people, who had little experience with central governments, learned to unite in opposition to British imperial measures and formed a

Wright, Esmond. *Fabric of freedom, 1763–1800*. New York, Hill and Wang [1961] xiii, 298 p. maps. (The Making of America) E208.W9

"Bibliographical essay": p. 255–288.

A study of Revolutionary and Federalist America that traces the painful emergence of a national spirit amidst the strain of war and internal upheaval. Wright succinctly surveys provincial society and parliamentary politics before the war, concluding that the Revolution was "the product of executive weakness; not tyranny; of parliamentary, not royal vacillation; and of chronic irresolution before pressure groups" both in England and in the colonies. Although it began as 13 separate movements, the war proved a "forcing-house" of nationalism. Federalists and Anti-Federalists shared enough in common at the Philadelphia Convention to create a strong government even though compromises made it "as weak and divided as could safely be managed." The new nation was at once "preindustrial, prenational, and predemocratic," but it had raised, in the words of Freneau, the "fabrick of freedom."

*Study of Eastern Maine During the American Revolution*, was submitted to Boston University in 1962 (Micro AC-1, no. 62-4534).

Offers details on political and military activities in the Sagadahoc region from 1775 to 1783, especially on John Allan's efforts to rally local Indian tribes to the American cause in order to capture Loyalist Nova Scotia. Without aid from either Congress or Massachusetts, isolated by geography and by British seapower, and unable to persuade the Indians to abandon their neutrality, the rebels did not attain their main objective, but they did manage to hold eastern Maine for the United States.

F37.D26

Bibliography: p. 241-254.

The author's thesis (Ph.D.), *New Hampshire Politics and the American Revolution, 1741-1790*, was submitted to Harvard University in 1964.

Dividing the period into three phases, the author traces the rise and decline of the Wentworth oligarchy from the appointment of Gov. Benning Wentworth in 1741 to the collapse of royal government in 1775, explores the vicissitudes of political authority and the problems of state government during the war years, and examines the process by which republican principles gained acceptance. Daniell concludes that the labels "radical" and "conservative" have little relevance in New Hampshire politics: Family ties, sectional interests, personal ambition, constitutional beliefs, irrational fears, frustrated expectations, and the desire for social order all combined to influence political behavior.

Bibliography: p. [298]–306.

The author's thesis (Ph.D.), with the same title, was submitted to Columbia University in 1948.

Contending that economic geography, especially the Champlain Valley's need for a trade outlet through the Lawrence waterway, was a major influence upon the state's history, the author describes the policies and intrigues of the Allen brothers and others during their attempts to develop commercial and political ties between Canada, Great Britain, and an independent Vermont. The interests of the Champlain Valley, however, did not coincide with those of

other areas in Vermont, where people looked toward the Hudson River, Albany, or the Connecticut River for access to world markets. Little interested in trade with Canada, most Vermonters favored the patriot cause and voted in 1781 to join the Union.

Reprinted in New York by Russell & Russell (1971).

The author's thesis (Ph.D.), with the same title, was submitted to Columbia University in 1948.

Focusing upon three western counties, Worcester, Hampshire, and Berkshire, Newcomer examines the thought, activities, and influence of farmers and tradesmen. These "typical" Americans, usually more opposed to domination by Boston merchants than by royal authority, became incensed when the Coercive Acts restricted their town meetings. Most clergy, professionals, merchants, and successful farmers became Whigs; kinship was often a decisive factor. Once begun, the war enjoyed support according to the threat felt locally; when it ended, resentment against easterners reappeared.

E263.M4T19

Bibliography: p. [208]-216.

After years of conservatism and loyalty to the crown following the Great Awakening, Hampshire and Berkshire counties supported the war even though they continued to oppose political domination by the eastern seaboard. During the 1780's westerners pursued a militant radicalism that led to Shays' Rebellion on the one hand and opposition to the Constitution on the other. Throughout the Revolutionary era they were able to unite against two enemies: a general court that failed to respond to the popular will and an elite centered in Boston.

Describes politics, religion, society, and Indian relations in the Shenandoah Valley before the war, examines the sentiment for and against the patriot cause, and investigates the effects of the struggle: economic difficulties, extension of religious liberty, and changes in commerce and markets. Zealous military support of the rebels waned in time, and the valley, unlike other frontier areas during the 1780's, generally favored payment of British debts, repudiation of paper money, and ratification of the federal Constitution.

The author's thesis (Ph.D.), with the same title, was submitted to the University of Wisconsin in 1953.

Describes in detail the political, military, economic, diplomatic, and social history of the period. Before 1775 the colony was preoccupied with physical and economic growth. Although Georgians resented imperial measures, no continuing popular party developed. Gov. James Wright

ably carried out his instructions while attempting to guide change along acceptable lines. Left to themselves, Georgians would not have rebelled, but their strong sense of identification with South Carolina and the other mainland colonies led them into revolution. Such new political leaders as the frontiersmen Elijah Clarke and George Walton emerged during the war, while the Anglican church declined before the advance of backcountry Methodist and Baptist preaching. The Revolution prompted democratic innovations in almost all areas of Georgia life.

# CHAPTER THREE

## *The British Empire and the American Revolution*

THE EMPHASIS in this chapter is on British politics and the formation of imperial policy as it affected the American colonies. Only more general works are included for other aspects of British life such as agriculture and internal trade or fine arts and aesthetics. Moreover, works on the implementation of British

policy in the mainland colonies, the role of British arms in the Revolutionary War, the flight of the American Loyalists within the empire, and Anglo-American diplomatic relations during and after the war will appear in chapters 4, 6, 7, and 8, respectively.

Reprinted in New York by AMS Press (1968).

First edition published 1878–90.

In volumes 3 and 4 of this monumental literary treatment of British history, the author summarizes events after 1763 in America and England that led the colonies to revolt, describes the conduct of individual military campaigns and the formulation of British policy in London, and evaluates the effectiveness of ministries from Grenville to Shelburne. Lecky dwells upon George III's shortcomings, especially his failure to appoint Chatham—whom Lecky considers the English statesman best able to conduct the war—as his minister in Britain's darkest hour, when France joined the Americans in 1778 and England stood alone against the European powers. The chapters on the Revolutionary period have been edited by James A. Woodburn and published separately under the title *The American Revolution, 1763–1783; Being the Chapters and Passages Relating to America From the Author's History of England in the Eighteenth Century* (New York, D. Tracing the evolution, zenith, and decline of the imperial constitution between 1578 and 1783, the author describes the development of imperial constitutional law and the centralization of authority to 1689, analyzes the colonial constitutions and the instrumentalities of imperial control, such as the Board of Trade and commissioners of the customs, and discusses the failure of the imperial system during the French and Indian War and the challenge to constitutional authority after 1763.

Kemp, Betty. King and Commons, 1660-1832. London, Macmillan; New York, St. Martin's Press, 1957. vi, 167 p. JN331.K44

Examines the framework of 18th-century government,

especially the period of equilibrium between king and Commons from 1716 to 1783 and the relationship between the House of Commons and the king's servants. Kemp demonstrates that the Septennial Convention placed the onus of working together on the royal ministers. Failure to manage the Commons usually led to their dismissal rather than to the dissolution of Parliament.

May, Sir Thomas Erskine, Baron Farnborough. The constitutional history of England since the accession of George Third, 1760-1860. Boston, Crosby and Nichols, 1863. 2 v. JN216.M3 1863

Judging men and events by the degree with which they advanced or retarded the evolution of 19th-century parliamentary institutions, the author contends that a system of government had emerged during the reigns of George I and II that was marked by ministerial responsibility to Parliament rather than to the king. May therefore views George III's actions as an effort to reverse the development of cabinet and party government and enhance the influence of the crown. He considers the king's reign to have been a dangerous retrogression that carried with it disastrous consequences for the first empire.

"Bibliographical appendix": p. 471-483.

In the fourth part of his work (p. 301-430) the author characterizes the period 1720-1801 as the age of conservatism and emphasizes the fact that Englishmen venerated their political institutions in the belief that they had been rendered virtually perfect by the Glorious Revolution. Reviewing the structure of government in the 18th century, Thomson briefly considers the American Revolution as a challenge to the sovereignty of Parliament.

A history of parliamentary representation from the 13th century that emphasizes the changing relations between patrons and members, electors and members, and the crown and Commons. Porritt observes that the American Revolution stimulated movements for political reform and that local agitation forced concessions such as the exclusion of contractors.

Discussing in chapters 3 and 4 the triumph and influence

of the theory of mixed and balanced government, the author concludes that the House of Lords, unlike the House of Commons, suffered few proposals for its abolition, its reform, or limitations on its power in the 18th century. Weston finds that Whigs and Tories were united in their appreciation of the equilibrium among kings, lords, and commons. Because of its power as a unique branch of government and the positions and talents of individual peers, the House of Lords served as the equipoise of the constitution.

Finds that the practice of submitting laws passed by the colonial legislatures to the king through the Board of Trade and Privy Council for review was neither unconstitutional nor designedly oppressive. Because of time and distance, however, the system worked poorly and colonies often evaded the requirement by passing temporary laws that continued in force for only one year.

Examining the judicial procedures and personnel of the King in Council, the author concludes that it was a tribunal well adapted to the adjudication of colonial appeal cases. Of 59 cases considered by that body between 1735 and 1776, 22 were dismissed for nonprosecution, 15 decisions of the colonial courts were reversed, 11 were affirmed, and 11 others received varying consideration.

Studies the procedures followed and actions taken by the Privy Council in reviewing the legislative enactments of the royal and proprietary colonies. By and large Russell finds that the council acted responsibly and with substantial forbearance in the exercise of its power, disallowing only 469 or 5.5 percent of the 8,563 acts submitted to it. In some cases the colonies were spared the effects of ill-advised and harmful legislation. The average delay of more than three years between passage and disallowance, however, created considerable uncertainty. The colonists regarded the process as particularly vexatious when their attempts at economic and political self-development were obstructed and their special interests subordinated to the needs of the mother country.

The appellate jurisdiction of the King in Council provided for the colonist a means of relief from arbitrary pro-

ceedings of colonial courts and preserved for the crown a means of preventing important changes in colonial law, especially those that might prove disadvantageous. Checking 265 cases that reached the Privy Council from the American continental colonies between 1680 and 1780, Schlesinger finds that the King in Council reversed the colonial courts 76 times, affirmed their decisions 57 times, discharged 45 cases for nonprosecution, and heard 11 cases *ex parte*. No decisions were recorded in 77 cases.

Analyzes the Privy Council's exercise of appellate jurisdiction by considering 1,452 cases from 35 different jurisdictions filed in the period 1696-1783. A majority of the 795 American cases came from the West Indies, and most of those from the thirteen colonies came from Rhode Island, Massachusetts, and Virginia. Except for Rhode Island, which had nearly three-fourths of its appeals reversed, affirmances and reversals were almost evenly divided. The author concludes, however, that appeals to the council were not an important part of the Revolution and that its decisions were relatively unimportant in shaping colonial judicial procedures. The decisions, in fact, were not available in printed reports, and the council's decrees did not carry a provision for mandatory enforcement.

Describes the evolution of the Cabinet Council from its origin as the foreign committee of the Privy Council under James I through the form that it assumed during the reign of George III. In the second volume Turner begins with 1717, the year the sovereign ceased to preside over meetings of the Privy Council, and details the structure, organization, and work of the cabinet—an indefinable group of the more active and influential council members, but with no fixed personnel or status.

Focusing on organization, procedures, and changing structure, the author studies the Privy Council and its evolving relations with king and Parliament from the reign of James I to the latter part of the 18th century when the council lost to the cabinet and various departments of government, such as the admiralty and treasury, many of its earlier activities and powers. In the second volume Turner treats the vast and miscellaneous business which the council transacted after 1679, especially through its subsidiary councils of war, trade, and foreign plantations.

"Bibliographical note": p. [233]–235.

Focuses on the relationship of the board to other departments of government, especially the secretary of state, and explains alterations in its function and influence. Basye finds that the unstable political atmosphere resulting from the frequent changes in ministry that followed the resignation of the Earl of Halifax as first lord in 1761 not only affected the board's work but contributed to the vacillation and procrastination that marked British colonial policy in the 18th century. Nonetheless, he concludes that the board played a significant role in the formation and execution of that policy despite its lack of real power. As the only agency that reviewed in detail colonial legislation, administration, and commerce, the board consistently attempted to reconcile individual and royal prerogatives and to correlate the economic welfare of the colonies with the commercial interest of Great Britain.

After examining the board's organization, personnel, and relations with other departments, the author reviews the administrative problems it encountered while attempting to keep the colonies properly dependent upon the mother country. Dickerson concludes that the board was alert to the rising power of the colonial assemblies; it used every means at hand, from threats to reprimands, to free executive and judicial officers from interference by colonial legislatures, but repeated compromises necessitated by war allowed the colonists to increase their power. When an effective remedy—a fixed civil list—was finally enacted by Parliament, Americans resorted to armed resistance.

Emphasizing the essential unity of the office regardless of the number of secretaries serving at one time, the author considers military and naval duties, foreign and domestic affairs, the secret service, and the publication of the *Gazette* in describing the nature and operation of the secretaryship. Thomson finds that the 18th-century secretaries were almost always representatives of the aristocracy and that most of them were reasonably successful in conducting their affairs. Not until the first 20 years of the reign of George III, he concludes, did the office near political bankruptcy.

An analysis of the roles played by the secretaries to the five administrative departments—Admiralty Board, Board of Trade, Customs Board, Treasury, and Southern (later American) Department. Wickwire first describes the organization of the various departments and the work performed by the subministers within them, whether arranging the agenda for board meetings, drafting official correspondence, or seeking the ear of a ministerial patron. He then studies the influence of individual subministers upon particular policies and their conduct in prosecuting the war itself.

In tracing the clashes in constitutional principle between George III and the Whigs from 1760 to 1783 and during the two administrations of Pitt the Younger, Barnes not only finds that the king's political principles were constant throughout, but that the balance of power between king and minister remained virtually unchanged.

During a period of heightened political conflict, the North ministry faced rebellion in America, a semirevolutionary crisis in Ireland, a Franco-Spanish invasion threat, and agitation by the Yorkshire Association for parliamentary and economic reform. Before the extraparlimentary forces could prevail, news that the Gordon riots in London

had ended and that Charleston had fallen to British forces saved the ministry and enhanced the king's prestige.

Closely analyzing North's strength in Parliament from the general election of 1780 to the crisis that followed Yorktown, Christie finds that the American war and the movement for economic reform had hardened party sentiment outside and bred disillusionment within the cabinet. Defeat at Yorktown revealed the extent of the opposition. The Commons veto in February 1782 of any further attempt to reconquer America ended after 12 years a government that had brought "unparalleled disaster" to the British Empire.

Offers a detailed analysis of parliamentary opposition before 1760, summarizes broadly events during George III's reign, and traces the development of party spirit. With the onset of the Revolution, Whig politicians reversed their stance on foreign affairs. Previously, they had argued for even greater efforts to defeat foreign enemies; now they supported those in revolt against the crown.

The author reviews the adjustment of Whig and Tory principles to historical developments in the century before 1760 and clarifies the American constitutional issues that confronted the Rockingham and Chatham Whigs between 1760 and 1783. He then describes the fundamental cleavage that developed between the conservative and radical factions, finally splitting the Rockingham group in 1794. Describes the early development of "oppositionism" in British politics from its establishment as a normal part of the parliamentary process to the end of Pitt's first sessions as prime minister. A major portion of the work deals with events in Revolutionary America that became or affected political issues in England. The author notes a temporary decline in domestic opposition to the government in 1775-76, linking it to an expanding export trade that was making England independent of American markets. He attributes subsequent opposition largely to public hostility toward multiplying war taxes after 1779.

Contents: The social foundations.—Government and Parliament under the Duke of Newcastle: prolegomena to 1760. Old bottles, new wine and the general election. The Parliament of 1761. The House of Commons and America. Bute and Newcastle.

In six essays, the author reviews the English social structure in 1760, studies the political disputes that followed the accession of George III, analyzes the Parliament of 1761 and American interests in the House of Commons, and recounts the growing animosity between Bute and Newcastle through the fall of Newcastle's ministry in 1762. In his introductory essay, Namier argues that Parliament represented English soil as well as men, hence those without votes were "virtually" represented through the land upon which they lived. Virtual representation did not extend to Englishmen abroad, however, and the failure to recognize this limitation contributed to the disruption of the empire.

Viewing 18th-century political behavior within the context of the time, the author analyzes the electoral structure of England, describes the type of men who stood for Parliament and assesses their motives, explores the maze of county,

Namier concludes that Parliament, in 1760-61, was a composite of personal ambition, interest, and connection, rather than an institution directed by political parties adhering to fixed constitutional principle.

Expanding upon ideas first presented in the *Transactions of the Royal Historical Society*, 5th series, v. 1, 1951, p. 127-151, the author illuminates the alteration in British political forms between 1740 and 1830, especially as they affected the relative power of king, Lords, and Commons. He assesses the qualities of royal leadership and probes the interplay of factions within the government. Pares finds that although George III attempted to reduce the untoward influence of the nobility and thereby to restore constitutional balance, he proved increasingly impotent in the face of mounting professionalism, the decline of personal government, and the influence of patronage.

Traces the course of British politics from the Grenville reforms of 1763 to the collapse of the Carlisle Commission in 1778. While he recounts the day-to-day alterations in ministerial policy and the shifts in political allegiance, the author focuses upon two major themes: (1) the evolution of imperial thought from Grenville's classic view of a mercantilist empire of "supreme center and subordinate parts" to the embryonic federalist or commonwealth concept embodied in the Carlisle Commission's proposals, and (2) the revolution in political patterns from the loose coalitions of the early 1760's to the nascent party system that took form in the next century. To Ritcheson, George III was a thoroughgoing Whig who carved out a position at the center of

politics using patronage and suasion to exert political control. Being an active agent in domestic politics, he was unable to serve as a symbol of imperial union as colonial leaders asked. Reconciliation on American terms was therefore impossible.

Analyzes the thought of three generations of British religious and political dissenters, including 17th-century republicans like James Harrington, Henry Neville, and Robert Molesworth; such mid-18th-century divines and teachers at Cambridge and Glasgow as Francis Hutcheson; and late 18th-century radicals, including Richard Price and Joseph Priestley. These Commonwealthmen influenced the American Founding Fathers by keeping alive in their commentaries the revolutionary tradition that emerged from the Whig classics of the Glorious Revolution.

Describes the social atmosphere of London and investigates the impact of this radical reformer upon all classes, especially the urban population, from the onset of his notoriety in the *Briton* affair to his becoming lord mayor of London and member for Middlesex. Besides his astute personal and political acumen, Wilkes' appeal derived from his outside his control, such as disputation following Pitt's resignation and the promotion of Bute, and discontent among the lower classes over steeply rising food

prices. Five appendices provide data in tabular form on Wilkes' supporters.

"Bibliographical note": p. 187-215.

Juxtaposing elements of continuity and change, the author surveys the permanent features of 18th-century politics—the social bases, electoral and administrative structure, competitive economic groups and interests, and royal influence and patronage. He analyzes three new elements that combined in the latter part of the century to transform the old structure—the growth of a royal opposition, the emergence of political parties, and the development of public opinion as an influence on the government. Smith concludes that the American war accelerated the orientation of English politics along party lines by sharpening the differences between ministry and opposition, and by temporarily uniting the two opposition parties.

First published 1898-1907.

The present work, which extends only to 1778, is continued and concluded by the author's *George the Third and Charles Fox* (see entry 13372).

A classic literary treatment of British and American history from the decline of the Rockingham ministry to the fall of Lord North. Providing a full treatment of the rebel cause, the author makes clear that many Englishmen abhorred the coercion that led to the war. To Trevelyan, the myopic George III was determined to exercise the full extent of his power, but "he met his match" in the Americans, whom the author portrays as living in an idyllic society. In his one-volume abridgment, *The American Revolution* (New York, D. McKay Co. [1964] 580 p.), Richard B. Morris omits much of Trevelyan's account of military affairs and concentrates upon politics, manners, and ideas, areas in which Morris believes Trevelyan made his most enduring contributions.

Surveys the activities of radical societies, legislative debates, manifestoes, petitions, and repressive acts of government from 1756 to 1832 as they affected efforts of commercial and industrial interests to increase their representation in a Parliament weighted toward agricultural interests. Veitch submits that toleration of the status quo depended upon such factors as the ability of the system to produce qualified leaders, the widespread acceptance of corruption, the concern for private interest rather than public good, and the nature of British society. In his essay introducing the reprint edition, Ian Christie notes that recent studies have focused most intensely upon the last factor.

A study of English politics and local government as they affected or were influenced by attempts to organize and reform the militia. During the reign of George III, concern for maintaining the separate existence of the militia and for keeping the militia free from royal influence diminished. The quasi-civilian character of the militia was altered when the wars of the late 18th century reduced the opposition of the gentry to ties between the militia and the regular army.

Explores the tortuous course of politics from the formation of Chatham's ministry in 1766 to the collapse of the Whig opposition in 1771 during the ministry of Lord North. While the opposition attempted to keep alive the concept of parliamentary supremacy that was embodied in the settlement of 1689, the king acted to strengthen royal authority. He succeeded because Whig factions led by Pitt, Rockingham, and Grenville failed to master the political skills necessary for victory.

A narrative of the struggle for political supremacy between George III and the Whigs from the king's accession to the downfall of the first Rockingham ministry. Winstanley attributes the crown's success to Pitt's impolitic refusal to support the Whig party in 1766, thereby creating a royal authority that led eventually to constitutional abuses and revolution.

Analyzing such factors as weather, harvests, war, trade, building and construction, and financial crisis, Ashton finds that the years of general prosperity from 1763 to 1765 were followed by a period of depression lasting until 1769. A cyclical pattern was evident during the years 1769-74 and 1774-81 when two years of recovery were followed by a boom, and this, in turn, by crisis and depression. The gradual postwar recovery was marked by several brief recessions.

Bibliographic footnotes.

Defined as the economic policy of the European states from the Middle Ages to the age of laissez faire, mercantilism is discussed first as a unifying system in controlling economic affairs—internal trade, the regulation of industry, and foreign trade and business organization. In the second volume the author treats mercantilism as a system of power, a system of protection, a monetary system, and a conception

of society. In dealing with British mercantilism, Heckscher examines economic expansion in the late 17th and early 18th centuries, the role of London and the joint stock companies in the unification of foreign trade, and England's leadership in economic and technical reforms that led eventually to the elimination of the mercantile system.

Bibliography: p. [162]-164.

Explains how radical changes in technology, capital, and labor, as well as drastic alterations in popular attitudes and public policies, transformed a nation of cultivators and craftsmen into a mobile, industrial society. Ashton considers the creation of new instruments of production and methods of administering industry as dramatic innovations that made it possible to deal with overpopulation, a critical social problem in the late 18th century.

Bibliography: p. 135-153.

Finds that Britain's efforts to substitute colonial iron for that imported from its rivals and to restrict colonial iron manufacturers failed mainly because England was too far away from America to obtain sufficient knowledge of conditions and to exercise strict control there. Since the blast furnaces then turned to making ordnance and utensils for the colonial militia, Bining contends that the expansion of the iron industry prepared the way for the Revolution.

Explores the complex relationships that developed between government policies and internal company affairs from 1760 to 1784, culminating in Pitt's India Act. The company supported the crown and ministry to ensure the renewal of its charter while the government increasingly looked to the company as a source of revenue; the result of this interdependence was a succession of government interventions beginning with the Tea Act of 1773. Places in historical perspective the role of Negro slavery and the slave trade in providing the capital that financed the Industrial Revolution in England and the function of mature industrial capitalism in destroying the slave system. The American Revolution exploded the fallacy that British manufactures would not be sold without a monopoly of the colonial market. Moreover, by diminishing the number of slaves in the Empire and shifting the imperial center of gravity from the Caribbean Sea to the Indian Ocean, the Revolution greatly enhanced the abolitionist movement. Reprinted in New York by Octagon Books (1968). The author's thesis (Ph.D.), *The English Novel, 1760-1800, and the American Revolution*, was submitted to Harvard University in 1935.

Analyzes 450 novels to determine the impact of the Revolution on the content of contemporary English fiction and the postwar concept of America depicted in these works. Heilman concludes that British novelists were predominantly pro-American during and shortly after the war. He notes the amount of space devoted to critical commentaries on British policy and the war itself as well as the large number of novels after 1783 with main plots or minor episodes drawn from the Revolution. Novelists became increasingly skeptical of American manners, institutions, and culture with the development of a less romantic view of the primitive frontier and a deep suspicion of democracy prompted by the events of the French Revolution.

Describes the system of land ownership and the growth of the large estates and analyzes the role of the great landlords in the social, political, and economic life of the nation. The author concludes that well-arranged marriages and income from lucrative government offices were key elements in the building of large holdings and that the enclosure movement was not necessarily harmful to the villagers or responsible for the decline of the yeoman. Mingay also contends that new taxes for the Revolutionary War led the small gentry and farmers to intensify their criticism of the government's agricultural policy and war management and produced considerable sympathy for the plight of the Americans.

Explores the motivation and describes the attitudes, activities, and reactions of American tourists, students, ministers, emissaries, and politicians who visited or took up residence in England before the Revolution. In contrast to early visitors who tended to praise things British, those who came during the 1760's and 1770's were inclined to look critically at the English political and social structure. They shared a growing belief that England was decadent and

American society was more wholesome and better ordered, without the extremes of wealth and poverty that they encountered in the mother country.

Reprinted in New York by P. Smith (1949) and, with a new preface by Crane Brinton, by Harcourt, Brace & World (1963, 1962).

In a comprehensive review of British intellectual life, the author focuses in the first volume on the challenge presented to traditional Christian cosmology by the new sciences. In Stephen's opinion, the attack upon orthodoxy, first by the deists and later by the skeptics of David Hume's school, so devastated their contemporaries that intellectual leadership degenerated into speculative sterility and the masses were abandoned to the resurgent emotional orthodoxy advanced by Wesley and the Evangelicals. In volume 2, Stephen extends his analysis of the 18th-century climate of opinion to moral philosophy, political theories, economic views, and general literature. He includes chapters on the writings of Burke and such revolutionists as Richard Price and Joseph Priestley.

The author's thesis (Ph.D.), with the same title, was submitted to the University of Indiana in 1950.

From his study of newspapers, periodicals, pamphlets, broadsides, and satirical prints, the author describes the methods used by political leaders and printers to create public opinion and traces the emergence of a new concept of liberty of the press. Rea contends that the charge of seditious libel brought against John Wilkes in 1763 and the other cases stemming from the publication of *North Briton*, number 45, launched a movement that eventually altered the use of general warrants, affected the judicial process in cases of libel, and curtailed parliamentary privilege. In 1771, for example, proceedings in Parliament were made public for the first time as a result of pressure from the public and the press. By 1775 the voice of the opposition had been so strengthened by the London press, which reflected radical sympathy for the American cause, that even the crown was compelled to respond to public opinion.

The author's thesis (Ph.D.), *The Science of Man in the*

*Eighteenth Century as Exemplified in the Scottish Moral Philosophy*, was submitted to the University of California at Berkeley in 1930.

Examines the attitudes and assumptions of leaders of the Scottish Enlightenment: David Hume, Francis Hutcheson, Adam Smith, Thomas Reid, Adam Ferguson, Dugald Stewart, Lord Kames, and Lord Monboddo. Although there were lingering theological overtones in their analyses of human nature and social institutions, they developed empirical procedures that presaged the emergence of the separate social sciences. Bryson finds that the writings of the Scottish school were a stimulating influence in both continental and American colleges and universities of the late 18th and early 19th centuries.

In a study of imports and re-exports, the author shows that the war seriously disrupted the patterns of Glasgow and Greenock trade, especially with the tobacco colonies. Long-established mercantile firms weathered the setback, however, and by the late 1780's had adjusted and even expanded their trade as West Indian and Irish markets replaced American.

Includes an analysis of the impact of the American Revolution on the Irish economy and the movement for parliamentary reforms. While the war increased trade in Irish products, the resulting rise in prices and rents coupled with direct military costs imposed serious hardships on the general population. Analyzes issues of free trade, constitutional independence, and religious discrimination in Ireland and describes the relationship between these conflicts and the American

War for Independence. The author concludes that there was significant popular support for America among the Anglican ruling class as well as the Presbyterians of Ireland who are said to have accepted the American view of the causes of the rebellion. With the entry of France into the war, however, Irish concern shifted to matters of defense and the serious economic problems created by the disruption of trade with both France and America. Vigorous demands for changes in restrictive imperial economic, political, and religious policies were successfully raised, but no serious thought was given to the use of violence or to separation from England.

A concise narrative, written from the perspective of the British ministers who had the responsibility of realigning the administrative and military structure of the empire after the Seven Years' War. While Grenville's policies were reasonable and defensible, he overlooked the need for colonial

assent. The real failure of statesmanship lay in Townshend's inept and obstinate attempt to raise revenue in America. Thereafter, efforts at conciliation foundered on two fears, both unwarranted, that led ultimately to armed conflict: the colonists' belief that British measures foreshadowed attempts at total subjection and England's foreboding that American independence would result in the loss of its great-power status.

A monumental study of the British Empire, especially in its American setting, from the Peace of Aix-la-Chapelle to the outbreak of the American Revolution. In the first eight volumes Gipson appraises the old empire in a state of equilibrium at midcentury, explains the problems generated by expansion all along the frontiers of the empire, and recounts the decisive struggle with France that secured British possessions in North America. The next four volumes focus upon the new policies regarding colonial defense and taxation formulated by British ministers in their effort to realign imperial priorities after the war and the strained relations that developed between England and the 13 older North American colonies as a result. Ultimately, the American colonists revolted not to create a new social order but simply to free themselves from continued interference by the gov-

ernment of Great Britain. In volume 13, Gipson studies developments in those parts of the old empire that did not rebel, provides a summary of the entire series, together with an analysis of the more important trends within the empire from 1748 to 1776, and presents a series of historiographical sketches in which he analyzes the writings of 62 British, Canadian, and American historians. A history of the changing uses and meaning of the word "empire" from ancient Rome to the Napoleonic imperium that focuses on British imperialism in the 18th century. Analyzing the contribution of key American colonials to the development of the concept, the author finds that Benjamin Franklin, James Otis, Gov. Francis Bernard, and Thomas Jefferson were among those who sought to redefine the relationship between the mother country and its colonies in order to preserve the territorial empire. The inadequate English response to the call for reform led to the American separation.

McIlwain, Charles H. *The American Revolution: a constitutional interpretation.* New York, Macmillan Co., 1923. xi, 198 p. E210.M16

Arguing that the central issue between 1760 and 1776 was the nature of the British constitution, McIlwain discusses and supports Samuel and John Adams' contention that Americans were subjects of the king, not Parliament. After examining constitutional precedents within the empire, he concludes that Parliament usurped authority over the dominions during the Puritan Revolution when it passed the act establishing the commonwealth in 1649. In *Parliament and the British Empire; Some Constitutional Controversies Concerning Imperial Legislative Jurisdiction* (New York, Columbia University Press, 1929. 279 p.), Robert Livingston Schuyler takes issue with McIlwain's theory of usurpation and argues instead that authority over the dominions has been an integral part of the character of parliaments since their origin in sessions of the medieval royal councils. In fact, when Restoration lawyers defended Parliament's right to legislate for Ireland, the closest parallel to the American case, they cited lawful descent and inheritance, rather than revolutionary Puritan innovations. Surveys the regions of empire, political and economic tensions within them, Pacific expansion from 1763 to 1790, and the background for British maritime and imperial dominance in the 19th century. In a chapter on the American Revolution, the author focuses on problems of imperial reorganization after 1763 and concludes that the Revolution produced no fundamental change in British policy.

Andrews, Charles M. The colonial background of the American Revolution; four essays in American colonial history. Rev. ed. New Haven, Yale University Press, 1931. x, 220 p. E210.A55 1931

First edition published in 1924.

Viewing the Revolution as a colonial rather than an American problem, the author surveys the founding and development of the colonies, reviews British mercantilist policy, 1713-63, summarizes conditions before 1763 that led to revolt, and reflects upon historical interpretations of the period. Andrews contends that the Revolution was not fought to secure democracy, since Americans enjoyed a greater measure of self-government than did their countrymen in England. Instead, the war was an uprising against an inflexible system that could not allow mature dependencies to retain responsible self-government.

The author examines in detail England's colonial and commercial policies from 1660 to 1775 and describes the functioning of three institutions responsible for their implementation: the Board of Trade, the Customs Service, and the Vice Admiralty Courts. In practice, the enforcement of trade regulations varied as the colonies grew in number, wealth, population, and strength. However, England's determination to centralize authority at Whitehall and Westminster, to dominate the colonies politically and economically, and to place her prosperity and security before that of the outlying provinces were important factors in the coming of the Revolution.

Finds that the ineffectiveness of the system before 1763 was attributed by agents in America to the inherent weakness of British political authority in the colonies. Proposed reforms, generally in terms of a colonial civil list and an increased revenue, were inevitable.

The author's thesis (Ph.D.), *The Colonial Customs Service, 1660-1775*, was submitted to Harvard University in 1961.

After surveying the origin and development of the customs service, Barrow explores its influence upon the formulation and execution of colonial policy, investigates the attitudes of Americans toward the Navigation Acts, and measures the effectiveness of British commercial regulations.

The colonists opposed the Navigation Acts from the beginning and, after a lapse in their enforcement during the Seven Years' War, resisted even more strongly British attempts to increase the efficiency of a department that was always unequal to its task.

Reviews the economic foundations of British colonial policy from the 16th century, examines the administration of the trade laws, 1660-1763, and outlines the consequences of the change in 1763 from a policy based upon mercantilist principles to one dictated by political considerations. The author concludes that British policy before 1763 encouraged the growth of shipbuilding but caused a drain of specie. Since one offset the other, commercial policy contributed little to the rift that developed later.

Assesses the impact of British trade regulations upon the production of specific colonial manufactures and commodities, surveys American attitudes before 1763 toward these laws, and describes the influence of new British trade policies upon relations with the mother country between 1763 and 1775. The author finds that before 1763 Americans were generally satisfied with the navigation laws, that enumeration benefited colonial production (except for hats, woolen goods, and iron), that Americans made few attempts to evade the statutes, and that trade regulation helped advance the colonies economically. Opposition to the Sugar, Stamp, and Townshend acts arose because these laws were enacted to raise money rather than to regulate trade, and violated, in the colonists' view, the English constitution. Thus, the Navigation Acts were a cause of the Revolution only in the sense that the British ministry used American protests over the constitutional issue to justify policies that led to war.

Within the conceptual framework of modern social and economic planning, the author investigates the origins, administration, enforcement, and effects of statutes that were enacted by Parliament from 1660 to 1849 and were intended to foster all elements of English shipping. Harper finds that the laws were decidedly successful: while British trade in general increased after 1660, shipping prospered even more. He also concludes that smuggling, often seen as a major flaw in the system, was not as widespread as enforcement officers imagined.

Studies the role and changing powers of interest groups in British politics, 1660-1800, and their effect on Anglo-American relations. The author concludes that a dramatic and rapid transformation of interest groups in the years

1748-63 made the North American bloc a relatively weak entity, especially in Parliament, at a time when such groups were becoming the very matrix of politics in the British Empire. The decline of their ability to protect their interests within the conventional political processes contributed to the Americans' acceptance of a revolutionary solution.

Surveying developments and conflicts in British opinion concerning the establishment and maintenance of colonies, the author finds that only a small minority of Englishmen opposed the colonial system before 1776. After the American Revolution such anti-imperialist spokesmen as Adam Smith were much more articulate than their opponents but had far less influence politically. Proponents of a second empire implemented more restrictive political controls over the colonies, but at the same time new industrial developments made the old system economically more favorable to the colonies.

Discovering, among other things, that furs accounted for less than three percent of the total value of all colonial exports to England in the period 1722-75, Lawson concludes that the importance of the fur trade in the imperial economy and in the regulation of colonial Indian affairs has been greatly exaggerated.

Evaluates attempts by the crown to develop New England forests into a reliable source of ship masts, pitch, tar, and turpentine for the Royal Navy. Despite British economic inducements, New Englanders did not favor the program because it threatened their carrying trade with the Carolinas in these products and because the trees, when sawed into boards, brought a premium at the West Indies markets. The mercantilist experiment failed, in Malone's view; only 4,500 masts from New England's virtually unlimited supply reached Britain, the amount of naval stores produced was not significant, and the policy intensified the growing bitterness between the colonies and London.

political relations, 1675-1775. Edited by Alison Gilbert Olson and Richard Maxwell Brown. New Brunswick, N.J., Rutgers University Press [1970] p. [140]-154. E195.A55

In an era of political instability and dramatic shifts in the configuration of competing interest groups, the North American interest became increasingly isolated, its political influence nominal in comparison to its economic importance. As a result, it drifted after the Stamp Act crisis into the role of constitutional protagonist, thereby inviting ministerial hostility and retaliation.

Includes bibliographic references.

The author's thesis (Ph.D.), *The Colonial Agents, English Politics, and the American Revolution*, was submitted to Harvard University in 1964.

Explores the institutional aspects of the agents' relationship, 1756-75, with their American clients as well as with groups in Britain—merchants, the press, the colonial bureaucracy, and British politicians—and explains the decline of the colonial agency after the Stamp Act controversy. The agents' influence diminished, according to Kammen, because of fundamental disagreements over political theory, the instability of British politics after 1763, and the quality and character of both royal officials and colonial agents. Ultimately the agency splintered over the American question. Agents who favored the rebel cause sought out like-minded men and communicated their growing distrust of the British ministry to their employers, the colonial assemblies, thus increasing American alienation from British authority. The author's article "The Colonial Agents, English Politics, and the American Revolution" appeared in the *William and Mary Quarterly*, 3d ser., v. 22, Apr. 1965, p. 244-263.

Lilly, Edward P. The colonial agents of New York and New Jersey. Washington, D.C., Catholic University of America, 1936. ix, 238 p. JK57.A5L5 1936

Thesis (Ph.D.)—Catholic University of America, 1936.  
"Bibliographical essay": p. 227-231.

Considers the advocate nature of the institution and traces the evolving responsibilities of the representatives for New York (1637-1775) and New Jersey (1723-75). Although the agents were supposed to protect at court the

interests of all segments of the colonial government, the New York and New Jersey assemblies were unique in gaining complete control over their representatives. Lilly concludes that just as the agencies reached their full development, the increasingly inflexible positions taken by the British and colonial governments on the eve of the Revolution made representation in England of little use.

An institutional study that investigates the development of regular and special agencies, the selection, duties, and financial rewards of agents, and their successes and failures. Essentially liaison officers between colony (or assembly) and the British political and mercantile communities, the agents fostered intercolonial cooperation but usually failed to satisfy the colonial assemblies whose members were too partisan or too ignorant of imperial problems to appreciate simple justice.

Studies the origins and development of the agencies in the 17th and early 18th centuries, the appointment of new agents by island colonies that came into the empire during the second half of the 18th century, and the disappearance of the agencies in the 19th century. Penson examines the personnel of the agencies (merchants, lawyers, politicians, and absentee planters), their duties and functions, and their dealings with Parliament and various departments.

Sosin, Jack M. Agents and merchants; British colonial policy and the origins of the American Revolution, 1763-1775. Lincoln, University of Nebraska Press, 1965. xvi, 267 p. ports. E270.S73

Bibliography: p. 235-250.

Investigating the influence of American colonial agents and British merchants upon imperial policy, Sosin discovers that rather than holding conflicting views the agents and merchants agreed that British prosperity was in large part dependent upon the well-being of the colonies. Because they pursued the same objectives, the ministry tended to accept advice from both groups. The agent-merchant lobby scored its greatest success in 1765-66 by organizing in England the protest that led to the repeal of the Stamp Act. With the passage of the Townshend Duties, however, some agents became increasingly caught up in the radical agitation against parliamentary authority. As the ministry began taking a firmer line toward the colonies, the community of interest dissolved to the point that after 1774 neither the agents nor the merchants had sufficient influence to modify governmental policies that ultimately led to war.

Beer, George L. British colonial policy, 1754-1765. New York, Macmillan Co., 1907. x, 327 p. JV1011.B5

Reprinted in New York by P. Smith (1933).

Reviewing the course of English policy during the de-

cade of the Seven Years' War, the author concludes that the origins of the Revolution lay in the problems of imperial defense. The colonies generally acquiesced in the mercantile system before 1763, even though they criticized particular aspects. But the reforms of 1763-65, designed to check illegal trade, raise revenue for defense, and increase the efficiency of the imperial administrative system precipitated a struggle, ostensibly for civil and political liberty, that was in reality a movement for national independence. Beer continued his study of the first empire by examining *The Origins of the British Colonial System, 1578-1660* (New York, Macmillan Co., 1908. 438 p.) and *The Old Colonial System, 1660-1754* (New York, Macmillan Co., 1912. 2 v.). Among several factors instrumental in the passage of the Currency Act were the "hard money" bias of the Board of Trade, the demand of London merchants for protection of their Virginia investments through the exclusion of paper money as legal tender in all sterling transactions, falling tobacco prices in Europe after 1759, and the sharp rise in the sterling exchange rate that accompanied the financial crisis in Great Britain at the end of the Seven Years' War.

The author's thesis (Ph.D.), *British Contemporary Opinion of the American Revolution, 1763-1783*, was submitted to Yale University in 1924.

Finds that attitudes about the proper relationship between the mother country and her colonies varied widely from class to class. Guided largely by self-interest, merchants, country gentlemen, and crown officials tended to measure the efficacy of government programs such as the Sugar Act or the Townshend Duties by the probable effect they would have upon commerce, land prices, or the power of the state. English radicals, on the other hand, found that support of the American cause furthered their own political objectives at home. Despite these differences, a "spirit of imperialism" provided a common touchstone.

While colonists and English radicals may have believed that a coterie of the king's friends were conspiring to deprive them of traditional British liberties, ministers and members of Parliament viewed colonial challenges to parliamentary supremacy as natural, spontaneous, and unorganized. In-

different to ideology for the most part, British politicians showed little interest before Lexington in the nature of colonial resistance.

Surveys news dispatches, editorials, and letters of opinion that appeared in 20 British newspapers and magazines and examines changing English attitudes toward the American cause. Analyzing various social classes, the author finds that landed interests and their ecclesiastical allies strongly opposed colonial claims. The mercantile and manufacturing class, on the other hand, recommended that the Americans be treated more sympathetically. Printers, who were part of the rising urban middle class, and nonconformist groups, who shared a common Puritan heritage with their brethren in America, were generally friendly. Even though contemporaries viewed the contest as a civil war, the American cause received a surprising amount of support in the British press.

The author's thesis (Ph.D.), with the same title, was submitted to Columbia University in 1960 (Micro AC-1, no. 60-3112).

Presents a chronological account of the war as described and interpreted in the columns of major London and provincial newspapers and magazines. Considering the opinion, rumor, and propaganda endemic to the era, Lutnick concludes that although English press coverage was often inaccurate and biased, the battle reports were so disheartening that taxpayers and soldiers alike usually guessed the truth.

Discusses in eight lectures the effects of the war upon the development of the empire, 1775-93, and upon 19th-century imperial policy. Contrary to the usual interpretation of British history, the author contends that the complex process that led to the second empire began with Great Britain's commanding position in North America, India, and at sea following the Seven Years' War and not with her defeat in the American Revolution, which merely signaled the collapse of the first empire. Focusing on commerce and defense, the author surveys the transformation of Great Britain's 18th-century mercantilist empire into the free-trading realm of the 19th century. In the opening essays Schuyler considers the old colonial system in both theory and practice, assesses the part played by commercial regulation in the outbreak of the American Revolution, traces the rise of anti-imperialism, and describes the relatively minor changes made in imperial policy following American independence. Although Canada seemed to many British statesmen to be little more than a conquered French province after 1763, the loss of the American colonies and the weight of prevailing mercantilist doctrine led imperial administrators to attempt to substitute Canada for New England and the middle states as a source of supply for the West Indies and timber for the Royal Navy. Despite the ultimate failure of their policy, the province was thrust into a place of prominence in British diplomacy.

Places the Revolution within the context of an imperial struggle among European powers for control of North America that lasted from the 17th to the 19th century.

Following a review of the Quebec Act and its consequences for Canada and the American colonies, the author concentrates upon the details of the American invasion of 1775 and its aftermath, including plans to renew the attack with the help of the French. The small Anglo-American community favored the Revolution, but the seigneurs as well as most of the clergy opposed it. Ordinary Canadians remained neutral and listened neither to their leaders nor to the blandishments of the invaders. Developing a new political consciousness, Canadians would never again be totally subservient to religious or secular authority. Lancôt concludes, therefore, that the American invasion marked a turning point in Canadian history.

A detailed review of the issues and personalities—British, Canadian, and American—that joined to produce the American Revolution. Covering the period 1763-83, the author treats such diverse topics as French-Canadian culture, Pontiac's Conspiracy, social and economic conditions in England and America, the political system under George III, the administrations of Gov. James Murray and Grey Carleton, the Quebec Act, the abortive American invasion, and the tribulations of 60,000 Loyalist exiles during and after the war. Wrong finds the ultimate cause of the Revolution in the maturation of the American colonies: British victory would only have postponed the inevitable outcome.

Argues that there existed in Canada in 1759 an autonomous, nationalistic French-Canadian community based on ethnicity and language that was betrayed after the British conquest by the open collaboration of the French elite, especially the church leaders, with the new rulers. Under such "conqueror-generals" as Murray and Carleton who were dependent upon the political support of the elite, the average French-Canadian entered into a permanent state of passive resistance despite some defections by merchants who traded with new English immigrants or women who married Englishmen. The conquerors, according to the author, founded an English society in the St. Lawrence Valley on the ruins of the old French colony by quickly monopolizing commerce, especially the fur trade, and by preying on the self-interest of the masses, thereby creating an uneasy state of coexistence.

Explains why Canada, Britain's most recently conquered province, remained loyal when the American colonies revolted. Coupland argues that the Quebec Act, by recognizing French-Canadian nationalism, the Catholic religion, and the French language, kept the allegiance of the seigneurs and they, together with the priests, persuaded the habitants to follow the English king.

The author's thesis (Ph.D.), the *Toleration Clauses of the Quebec Act*, was submitted to the University of Michigan in 1930.

Provides examples of virulent anti-Catholic sentiment found in colonial newspapers, sermons, political tracts, the minutes of town meetings, the debates of Congress, and

popular ballads before and after the passage of the Quebec Act of 1774. Britain's grant of religious toleration to Canadian Roman Catholics released a torrent of bigotry in the 13 colonies, a reaction that contributed, Metzger feels, to the coming of war.

Concentrating upon the way in which the law was actually administered in Old Quebec from 1775 to 1791, the author presents an exhaustive study of the confused legal situation that resulted from Parliament's attempt to provide Canadians with the benefits of the divergent French-Canadian and English legal systems. Efficiency and equity nearly disappeared, Neatby concludes, because unclear laws were applied by untrained men who were susceptible to political influence in a factious community.

Concentrating on public policy and political controversy, the author studies the problems faced by Canadian authorities Murray, Carleton, and Haldimand from 1760 to 1791 and their attempted solutions. Burt treats such subjects as the Proclamation of 1763, the Quebec Act, the American invasion, the Loyalist migration, the negotiations over Canadian boundaries in 1782–83, the intricacies of Indian diplomacy, and the agitation over the frontier posts. He is especially critical of Carleton's application of the Quebec Act with its disastrous effect on the relations between the French and English settlers and his failure to judge accurately the French *habitants'* attitude toward the American Revolution.

The author's thesis (Ph.D.), with the same title, was submitted to Cornell University in 1893.

In his study of the composition and political attitudes of the population, the nature of the provincial administration, and the implementation of British imperial policies in Quebec from 1760 to 1775, the author concludes that Americans erroneously linked the Quebec Act with the so-called Coercive Acts, despite the fact that all its important provisions had been decided upon before 1770, and none was significantly affected by conditions in colonies other than Quebec. On the other hand, British officials misjudged the Canadian temper in drafting the act, and the restoration of the French feudal system in Quebec, while pleasing to the clergy and old ruling classes, fostered opposition among the bourgeoisie and the *habitants* or common people who thus became more susceptible to revolutionary arguments. Canada, he adds, remained in the empire only because of the vigor and ability of its English defenders and the mismanagement of the American offensive. Coffin's article "The Quebec Act and the American Revolution" appeared in the American Historical Association's *Annual Report* for 1894 (Washington, 1895), p. 273-279. A lengthy defense of his thesis against a hostile critic appeared in the *Canadian Magazine*, v. 9, May 1897, p. 56-67.

Considers British attempts to govern the conquered French Catholic province during a 30-year period of war and revolution when Quebec was under either military occupation or threat of armed invasion. Since the first responsibility of the military governors was security, governmental policies were almost always formulated in response to changes and pressures outside the province, whether from actions associated with the American Revolution or from the continuing duel between Great Britain and the Bourbon powers. Neatby contends that the harsh interpretation placed by Carleton and Haldimand on the generally humane and tolerant principles of the Quebec Act radicalized elements of the English and Canadian populations and encouraged the development of a strong and vigorous nationalism.

Explores the reasons three colonies remained loyal. Nova Scotians from England maintained close ties there, while the more numerous immigrants from New England had no quarrel with the concept of empire. Competent leadership in the colony made certain that no complaint arose and easily squelched the trouble caused by a minority who sympathized with the Revolution. Farther north, St. John's (Prince Edward) Island and Newfoundland were largely unaffected by the war.

Despite social and economic discontent, Newfoundlanders remained loyal to the crown out of a strong sense of British nationalism.

Traces the transition of the island from a pure mercantilist dependency to a self-governing colony. The author examines trade relations with the United States; the influence of the United Empire Loyalists, immigration from Ireland, and competition among American, French, British, and local fishing interests as factors contributing to rapid change in Newfoundland's colonial status.

Summarizes the economic, political, social, and ecclesiastical antecedents of the revival, reviews the life and teaching of Henry Alline, and describes the influx of Loyalists after the Revolution. Poverty and isolation on the frontier, accompanied by divided loyalties after the onset of war, caused 12 of 18 dissenting churches, mainly Congregationalist, to lose their ministers. Indigenous leadership filled the void. Alline's impassioned preaching, according to Armstrong, destroyed the New England worldliness in the Nova Scotian character and replaced it with a lasting piety.

Studies the colonization of Nova Scotia by New Englanders during the period 1760 to 1774 and attempts to explain why these transplanted Yankees remained loyal to the crown during the Revolution. The author concludes that the Loyalist tendencies of the province were strengthened by its economic dependence upon London, commitments made to effect the removal of an unpopular official (Gov. Francis Legge), and the apathy of the Yankee settlers that derived from their geographic isolation and fear of losing their lands should the rebellion fail.

The authors attempt to throw light upon the perspective of some 12,000 Nova Scotian farmers and fishermen, recent immigrants from New England who chose not to join fellow Yankees in the struggle against British authority. The war produced an acute disorientation in the traditional loyalties and value systems of the Yankees in Nova Scotia. During the religious revival that swept the colony between 1776 and 1783, however, they created a new ideology and a new sense of identity under the leadership of the Reverend Henry Alline, who preached that Nova Scotians, as conservators of the true faith, enjoyed a moral superiority over their corrupted brethren in New England.

The author's thesis (Ph.D.), *The Transfer of Florida from Spanish to British Control, 1763-1765*, was submitted to the State University of Iowa in 1964 (Micro AC-1, no. 64-7919).

Studies the property transactions, population movements, religious transformations, and changes in Indian relations that accompanied the transfer of Spanish East Florida and Franco-Spanish West Florida to British control. Evacuating and resettling the entire Spanish population of Florida facilitated the changeover; but French delays at Mobile led to a number of conflicts with England.

The author's thesis (Ph.D.), *East Florida under British Rule, 1763-1783*, was submitted to the University of Minnesota in 1939.

Recounts events during the colony's growth under the constructive leadership of Gov. James Grant, the two years of inept rule by Lt. Gov. John Moultrie before the Revolution, and the successful struggle by Gov. Patrick Tonyn to keep Florida loyal to the crown, only to see it revert to Spain by treaty. Most Englishmen, old settlers and refugees, and whites and Negroes preferred to leave rather than remain under an alien government which might, it was feared, impose Catholicism.

Bibliography: p. 195-199.

Describes the struggle of Greek settlers against malaria, Indians, and the wilderness in their effort to establish a colony near St. Augustine, Fla., after 1767. The settlement ultimately foundered on the issues that led to the American Revolution and the rivalry that developed between Dr. Andrew Turnbull, the land agent who enticed the colonists to the New World, and Patrick Tonyn, the British governor. Turnbull accused Tonyn of usurping the rights of British subjects; Tonyn, perceiving a threat to royal authority, retaliated by enrolling all able-bodied men of New Smyrna in his Rangers. No longer protected from Indian raids, the other inhabitants of the colony deserted their town and moved to St. Augustine where they remained until the end of the war. Electing to stay in Florida after 1783, the Greeks prospered under Spanish rule. The author's thesis (Ph.D.), *The Foundations of British West Florida: A Study of a Royal Colony After 1763*, was submitted to the University of California in 1933.

Summarizes briefly the responses of the British army, royal governor, council, and assembly to administrative problems involving the change from Roman law to common law, land speculation, trade with Indians, and the economic exploitation of the tropical wilderness acquired from Spain in 1763. Howard believes that officials in West Florida and London performed conscientiously and that royal government admirably served the needs of the new colony. In a 57-page appendix, he provides a tabular analysis of land granted by the council.

An institutional study of internal politics, imperial relations, legislative privilege, land distribution, westward expansion, and the social aspects of the labor system. Except for a parliamentary grant for the maintenance of civil government, the colonial administration of West Florida was typical of royal colonies established from imperialist and mercantilist motives. Remote from the centers of war and influenced by favors from the crown, the people remained loyal during the Revolution and the colony became a refuge for those of similar persuasion.

The author's thesis (Ph.D.), *The Decline of the British West Indies, 1763-1833: A Study in the Fall of the Planter Class*, was submitted to the University of Wisconsin in 1925.

In the chapters on the sugar islands during the Revolutionary era, the author describes the crisis that occurred when food and other supplies could not be obtained from the mainland colonies during the war and provides data to illustrate the reduced basis on which trade with the United States was resumed after 1783.

Although Bermudans chose not to share the fate of the rebellious colonies, only an estimated one-third were firmly loyal to the crown. During the war the maritime interests that dominated the colony supplied gunpowder to the Americans in exchange for provisions; as a result the Continental Congress excluded Bermuda from the nonintercourse provisions of the Association of 1774 and declared Bermudan ships exempt from capture by American privateers. The behavior of the island's business community nearly led to a rupture in imperial relations.

Bibliography: p. 442-447.

Reviewing the social, economic, and political history of Bermuda in its imperial setting, the author includes three chapters (p. 340-437) on the turbulent years between the

governorships of George James Bruere and William Brown, 1764-85. Although Bermudans were sympathetic to the American cause, the vulnerability of the island and the obvious benefits of the imperial tie outweighed considerations of independence.

Bibliography: p. [239]-245.

Studying Jamaica within the context of the old colonial system, the author focuses on the reaction of the islanders to imperial controls and restrictions, the political conflicts between the royal governors and the legislature, and the rivalries among various local factions, notably the planters of

Spanish Town and the merchants of Kingston. Metcalf finds that such successful governors as Sir William Trelawny (1768-72), Sir Basil Keith, (1774-77), and Sir Archibald Campbell (1782-85) were able to keep the desires of Whitehall and the interests of the assemblies from clashing. Although Jamaica shared many of the problems of the mainland colonies, the island's inherent weakness and vulnerability and the presence of over 200,000 slaves precluded open resistance to British authority during the Revolution.

"Bibliographies and guides to sources": p. 339-351.

A study of the political, economic, and social organization of slave society in the West Indies, the interrelationship among component groups in the society, and the effect that dependence on the institution of slavery had upon them. The author demonstrates that because of its contribution to the disastrous rise in the cost of production, slavery was the most important cause of the decline of West Indian agriculture in the 18th century. Rather than pricing itself out of existence, however, the institution was perpetuated until 1850 because of its very pervasiveness and its role in sustaining white prestige and political power on the islands.

## CHAPTER FOUR

### *The Colonies on the Eve of Independence: From Resistance to Rebellion*

THE FOCUS OF this chapter is the state of the mainland colonies within the old empire, their constitutional and political histories to 1775, and their responses to British legislation from the Pistole Fee controversy to the Coercive Acts. Works on the First and Second Continental congresses and the Declaration of Independence, the symbolic end to British rule, are

included in this chapter, but those studies that treat the transition from colonial to state government, especially the formation of extra-legal committees and conventions after 1774, are in chapter 9. Works on legal, economic, and social affairs during the provincial period will be found in chapter 11.

Bailyn, Bernard, ed. *Pamphlets of the American Revolution, 1750-1776*. Edited by Bernard Bailyn, with the assistance of Jane N. Garrett. Cambridge, Belknap Press of Harvard University Press, 1965 + facsim. (The John Harvard library) E203.B3

Includes bibliographic references.  
Contents: v. 1. 1750-1765.

Drawn from a total of more than 400 works on the basis of their contemporary fame, representative character, literary distinction, and originality of thought, the 72 selection to be presented in four volumes are said to represent the dominant ideas of the period. The 14 included in the first volume range from Jonathan Mayhew's *Discourse Concerning Unlimited Submission* (1750) to John Dickinson's *The Late Regulations* (1765). An introductory note for each item sketches the life of the author, establishes the context of the document, provides interpretation, and evaluates its influence. The editor's opening essay for the series, "The Transforming Radicalism of the American Revolution," was later enlarged and published as *The Ideological Origins of the American Revolution* (entry 3904). All pamphlets to be included in the series are listed by volume in an appendix.

Bibliography: p. lxxi-[lxxii]

A collection of 17 pamphlets and newspaper essays chosen from among some 400 tracts that appeared in the

colonies between 1763 and 1776. In an extensive introduction, Jensen explains that his choice encompasses the basic arguments used by Americans in their opposition to British measures and policies after 1763 and as they debated the merits of independence with one another between 1774 and 1776. Such less well-known pamphleteers as Martin Howard, Jr., Daniel Leonard, William Hicks, and Samuel Pemberton are included among the more conspicuous choices—Thomas Jefferson, John and Samuel Adams, John Dickinson, and Thomas Paine.

3777

Labaree, Leonard W., ed. Royal instructions to British colonial governors, 1670-1776. New York, D. Appleton-Century Co. [1935] 2 v. (xxv, 937 p.) E187.L62

Reprinted in New York by Octagon Books (1967).

The author's thesis (Ph.D.), *Commissions and Instructions to Royal Governors in America and the West Indies*, was submitted to Yale University in 1926.

Includes in 1,076 articles the entire body of instructions from 1670 to 1776 for all the royal colonies from Nova Scotia to Barbados. Arranged according to subject, articles for the most part contain cross references to others on a related topic. The commission and instructions issued to each governor—the chief agent of royal authority—comprised a written constitution for that colony.

E215.5.D541 Rare Bk. Coll.

First edition. The letters were first published in the *Pennsylvania Chronicle*, December 2, 1767-February 15, 1768. Many other editions of Dickinson's letters have been published. For example, the reprint of Mein & Fleeming's 1768 Boston edition (New York, Outlook Co., 1903), with a scholarly introduction by Richard T. H. Halsey, has been

reprinted in St. Clair Shores, Mich., by the Scholarly Press ([1969?]).

For an appraisal of the letters, see Carl F. Kaestle's "The Public Reaction to John Dickinson's *Farmer's Letters*" in the *Proceedings of the American Antiquarian Society*, new ser., v. 78, Oct. 1968, p. 323-359. Kaestle compares the content of the letters with various laudatory statements about them and traces the publication history of both the letters and the responses.

The Farmer's letters have also been published together with those of "The Monitor," Authur Lee. The Virginia Independence Bicentennial Commission has issued a facsimile reprint of William Rind's 1764 edition (Williamsburg, Va.), *The Farmer's and Monitor's Letters to the Inhabitants of the British Colonies* ([Richmond, Printed by Whittat & Shepperson] 1969), with a new introduction by William J. Adams, John. Novanglus, and Massachusettensis; or, Political essays, published in the years 1774 and 1775, on the principal points of controversy, between Great Britain and her colonies. The former by John Adams, the latter by Jonathan Sewall. To which are added, a number of letters, lately written by President Adams to

the Honourable William Tudor: some of which were never before published. Boston, Printed and published by Hews & Goss, 1819. 312 p.

E211.A195

Reprinted in New York by Russell & Russell (1968).

Over the Signature Novanglus, John Adams published a series of articles in the *Boston Gazette* between January and April 1775 in answer to essays appearing in the *Massachusetts Gazette* and *Boston Post-Boy* over the signature Massachusettensis. Both series were afterwards republished at different times in separate form, the Novanglus letters under the title *History of the Dispute With America, From Its Origin in 1754; Written in the Year 1774*. While the Massachusettensis papers were attributed at first to Jonathan Sewall, it is now well established that they were written by Daniel Leonard.

To Gipson the American Revolution was a legacy of the "great war for the empire." The removal of belligerent powers from the borders of the English colonies lessened their dependence on the mother country and heightened their growing sense of autonomy. When British ministers, faced with vast territorial acquisitions and an alarming war debt, attempted to devise a more efficient system of administration for the North American empire and to compel the colonists to contribute to their own defense, American leaders began to reexamine the implications of the imperial system, then to challenge parliamentary supremacy, and finally to claim that the colonial assemblies alone could determine the extent of authority that the crown and Parliament would exercise over them. The crisis only accentuated the emergence of a distinctly American civilization.

A detailed narrative of the conditions and developments that led, step by step, to revolution. In addition to chapters on obvious points of contention from the Parson's Cause to the Coercive Acts, the author also includes discussions of the mercantile system, political conditions at the end of the French and Indian War, the Anglican episcopate, the emergence of the West as a factor in American life, and the case of the Loyalists. Although the war was not caused by direct or conscious oppression, according to Howard, the evolution of unique political and economic institutions in America and the failure of the British government to understand or adapt to these developments made it almost inevitable.

final clash. By focusing on the interplay of factions and parties Jensen finds that local political battles often took precedence over resistance to British policies; despite the clear presentation of the issues in the Stamp Act crisis, there was no inevitable progress toward revolution. Instead, independence came only through the efforts of a small group of American leaders who, in the face of chronic public indifference and constant opposition from their fellow politicians, won enough support to make it possible. Because British policymakers failed to appreciate the complexity of differing interests, passions, and loyalties that lay behind the facade of American unity, they did much to defeat the policies they tried to enforce.

Labaree discusses the political power of the ruling families, the nature of class differences, the views of established churches on issues such as the Great Awakening, the nondemocratic tendencies of colonial education, the aristocratic social and political theories common among the classes in power, and the outlook of typical Loyalists during the Revolution. He concludes that conservatives preserved the best of the Old World heritage for the raw, new land and avoided the destruction of much that Americans would later hold dear.

A colony-by-colony survey of instances wherein Americans failed to give a full measure of cooperation to the crown and Parliament. The examples cited range in scope from the Connecticut assembly's decision in 1756 to furnish recruits only in proportion to the numbers supplied by other colonies to disputes between North Carolina's governor and assembly concerning the distribution of funds. The author concludes that the extent of opposition varied widely, that obstinacy increased as restrictions upon the colonies became more severe, and that proprietary colonies were the most recalcitrant.

The author's thesis (Ph.D.), *From Resistance to Revolution; American Radicals and the Development of Intercolonial Opposition to Britain, 1765-1776*, was submitted to Harvard University in 1968.

Concentrating upon the men in the forefront of American opposition to Britain, the author analyzes the stages of political awareness and tactical maneuver through which the colonists progressed as their loyalty of 1765 dissolved and their rejection of English authority took form. When colonial leaders found that uninhibited popular violence was counterproductive, they organized a disciplined resistance movement for the purpose of controlling disorder that progressed from the Sons of Liberty in 1765 to the associations and committees that sprang up after 1773. Participation in associations based upon social compacts gradually popularized self-rule, Maier asserts, and contributed to the American tradition of republican government.

In a lively rehearsal of events from 1763 to 1776 the author concentrates upon the emergence of a distinctly American consciousness. Although he finds the source of the Revolution in the ideological conflict over the nature of the British constitution, Miller contends that American political thought "was largely an exegesis upon Locke." Ultimately separation from England represented a victory of radical Whigs over conservative Whigs even though the participation of the latter ensured a "revolution of gentlemen, by gentlemen, and for gentlemen."

An investigation of mercantile responses to British imperial legislation and the differences in outlook that developed among merchants in various sections of the mainland colonies. Intent upon restoring commercial relationships that existed before 1764, merchants throughout the colonies led the opposition to the Sugar and Stamp acts. They grew increasingly cautious, however, when it appeared that the popular violence that had been aroused was becoming a greater threat to orderly commerce than parliamentary enactments. During the crisis over the Townshend Duties merchants renewed their protests by supporting nonimportation agreements, but radical ascendancy during the tea controversy finally convinced many that their interests lay with England. When the Boston Port Bill changed efforts to achieve commercial reform into a contest over the right of government to punish disorderly conduct, merchant north

of Maryland generally supported the crown's stand against violence while southern merchants and planters, whose argument with Britain more closely resembled a dispute over civil liberty, continued to support the radicals.

Considers the origin and growth of an independent spirit among Americans by examining the conditions of colonial government, the conflicts generated by imperial problems and attempted British solutions, and the unifying resistance of colonials to restrictions imposed by Parliament. The author gives special attention to the social, intellectual, and religious differences between England and America that produced the inevitable separation. Although Van Tyne feels that the Revolution was one of the glories of British history, he attributes the final break to Parliament's failure to heed the warnings of Britain's great Whig statesmen: Burke, Pitt, Fox, Camden, and Barré.

Examining the colonial origins of American federalism, the author maintains that the basis for intercolonial unity during the American Revolution lay in the repeated attempts of the individual colonies to supplement earlier proposals and plans emanating from Whitehall for cooperation in such areas as legal and monetary practices, wartime supplies, and Indian affairs. Although most of these efforts failed, Ward contends that they proved useful in themselves by creating working relationships among colonial politicians, providing common policies in some limited areas such as the postal service, and heightening public awareness of the imperative need for cooperation.

First published in *Perspectives in American History*, v. 1, 1967 ([Cambridge] Charles Warren Center for Studies in American History, Harvard University), p. 7-120.

Surveying in three lectures the differences between the political culture of 18th-century England and America, the author explains why many colonials enthusiastically adopted a radical Whig ideology that commanded little attention in Great Britain. Bailyn contends that the English dissenting tradition, embracing as it did a fear of power, desire for liberty, and suspicion of authority, fit the American situation better than any contemporary ideology for at least two reasons: colonists expected the same constitutional restraints to apply in America as in Great Britain, yet in practice royal governors were given a greater degree of authority than that exercised by English rulers; and the governors lacked the patronage needed to secure political stability, thus giving rise to factional politics and corruption. This atmosphere lent credence to growing fears that a widespread conspiracy threatened English liberties throughout the empire.

In a classic study, Labaree analyzes colonial institutions, especially the functions of the governor, council, and assembly, as they evolved in America after 1675. He describes British colonial policy and its formulation, the machinery and operation of government in the royal colonies, and the colonists' reaction to the whole. Because the popular assemblies could initiate legislation, control finances, and look to Parliament's independence as an example, they enjoyed an advantage over the governors, who were hampered by the static character of their commissions and instructions and often lacked influential support in London.

The author's thesis (Ph.D.), with the same title, was submitted to the University of Pennsylvania in 1920.

Paying particular attention to the views of John Adams and James Wilson, the author discusses three basic concepts of imperial relations—colonial dependency, imperial confederation, and commonwealth of nations. Out of the pre-Revolutionary debate over the constitutional nature of the British empire, according to Adams, emerged one of the most significant contributions to modern political theory—

the idea of federalism. Unable to apply the concept at the time, however, Britain provoked a revolution by insisting that it was impossible to divide imperial authority and still retain sovereignty. In his introduction to the third edition, Merrill Jensen elaborates upon the significant issues of the debate: the rights of Englishmen; taxation and representation; the relationship between the Crown, Parliament, and the colonial governments; and the theory of natural rights. "The Britannic Question and the American Revolution," an extensive review of Adams' work by Robert L. Schuyler, appears in the *Political Science Quarterly*, v. 38, Mar. 1923, p. 104-114.

An enlarged version of "The Transforming Radicalism of the American Revolution," the general introduction to the author's *Pamphlets of the American Revolution* (entry 3767).

From a study of ideas expressed in over 100 pamphlets on the Anglo-American controversy published through 1776, the author concludes that the Revolutionary mind was less influenced by classical, Puritan, and Lockean thought than it was by the outlook of early 18th-century English radical publicists and opposition politicians. These latter-day Commonwealthmen developed a particular variety of antiauthoritarianism based upon a pessimistic view of human nature; to them, liberty was constantly threatened by aggressive power—a conspiracy involving standing armies and excessive taxes as well as bribery and other unlawful influences. Bailyn asserts that these precepts, embodied as early as 1730 in a colonial revolutionary ideology, had assumed by 1750 an importance in America they never enjoyed in Great Britain, and above all else propelled the colonies into revolution after 1763.

Focusing upon the contemporary use of historical interpretation by the colonists, Colbourn submits that American political conduct toward England in the pre-Revolutionary crisis was strongly influenced by the Whig view of English history. Such British writers as Thomas Gordon, Catherine Macaulay, and James Burgh, who looked upon the past as a continual struggle between liberty and arbitrary power, virtue and corruption, characterized 18th-century British government as politically irresponsible and morally degenerate. Convinced of the historical reality of these arguments, American leaders adopted political, constitutional, and even moral positions that transformed a rebellion into a revolution.

Examines the work of an aggressive minority whose use of propaganda in the form of broadsides, pamphlets, speeches, songs, and plays not only crystallized ideas that had been germinating for years but provided the impetus behind colonial opposition to specific British measures, the creation of a war psychosis, and the development of national sentiment in America. In a study of more than 530 published satires, the author explains the perspectives of the satirists and illustrates their handling of American and British personalities and issues. Granger concludes that even though the works examined were predominantly personal invectives of little or no literary merit they reflected the flow of political argument and influenced public opinion as evidenced by their frequent appearance in colonial newspapers. The satirical writings of Benjamin Franklin, Francis Hopkinson, Philip Freneau, and John Trumbull receive special attention as exceptional contributions retaining both artistic and historical value.

Reviews arguments embodying the concept of a higher law—variously called the law of God, natural law, or law of reason—advanced by American pamphleteers during the pre-Revolutionary debate and identifies the sources of their ideas. The author discusses three levels of opposition to British policy—self-taxation, internal legislation, and imperial status—and notes that many colonists shifted from one

constitutional position to another with little regard for logical consistency. Pointing out that Locke's influence was less significant than historians once believed, Mullett credits the Europeans Grotius, Pufendorf, and Montesquieu and the Englishmen Coke, Bacon, Harrington, Milton, Sidney, Hoadly, Blackstone, and Robertson with having the greatest impact upon American publicists.

A study of the sources, character, and development of the political ideas of the American colonials from 1607 to 1776. In the first section the author describes colonial government, religion, economy, and society on the eve of the Revolution in terms of his central theme, the growth of liberty. Rossiter then considers the writings of six representative thinkers: Thomas Hooker, Roger Williams, John Wise, Jonathan Mayhew, Richard Bland, and Benjamin Franklin. In a third section he analyzes the dynamic evolution of American political theory in the years 1765-76, concluding that the major characteristics of Revolutionary ideology were individualism, toughmindedness, optimism, idealism, pragmatism, and morality. The author's thesis (Ph.D.), *The British Army in North America, 1760-1775*, was submitted to Princeton University in 1961 (Micro AC-1, no. 61-4834).

After summarizing the activities of British troops and colonial militia before 1760, the author analyzes the decision to station regulars in America after 1763, describes relations between officers and royal governors, and weighs the army's performance of its mission, 1760-75. Shy concludes that it was a mistake for the British to attempt a consolidation of diverse military forces under a single command after 1763. Politicians in London demanded efficiency but were ignorant of the army's problems and could not agree upon its capabilities or precise mission. Colonists came to believe that the British government was acting meanly and grew suspicious of its motives. The occupation of Boston confirmed the colonists' worst fears, giving substance to increased American alienation.

Bibliography: p. [215]-228.

The author's thesis (Ph.D.), *The Vice-Admiralty Courts of British North America, 1763-1776*, was submitted to the University of Wisconsin in 1954.

Analyzing changes instituted after 1763 in the organization and jurisdiction of the vice admiralty courts, the author considers the legitimacy of colonial fears and objections. Of the four principal complaints registered by the colonists, Ubbelohde finds that the method of payment for judges was converted from commissions to fixed salaries, most of the judges were capable and intelligent appointees, the new jurisdiction over the regulatory acts was rarely exercised, and the absence of trial by jury in these courts was not a departure from established practice. He concludes that the courts were a minor but persistent cause of the Revolution despite the fact that the protests against them were largely without foundation.

Bibliographic footnotes.

Presenting the familiar events of 1764-66 from the perspectives of officeholders and other participants, the Morgans show how the Stamp Act—a calculated attempt to deprive the colonists of their rights as British subjects—led to the emergence of a determined revolutionary minority whose use of violence nearly brought about the collapse of colonial government. As a result of the crisis, colonists not only learned the value of organization and unity but also posited the constitutional principle that they steadily maintained until Independence: Parliament had no right to levy either internal taxes or external taxes for revenue. Because American attitudes were erroneously transmitted to Parliament by Benjamin Franklin and the Rockingham ministry in their efforts to obtain repeal, British politicians such as Charles Townshend misunderstood the nature and depth of colonial resolve. In *Prologue to Revolution; Sources and Documents on the Stamp Act Crisis, 1764-1766* (Chapel Hill, Publ. for the Institute of Early American History and Culture, Williamsburg, Va. by the University of North Carolina Press [1959] 163 p. A reprint, with a new editorial note, of the 1859 edition (Poughkeepsie, N.Y., Platt & Schram, Printers).

New Yorkers had long opposed British control, the author contends, but the intensity of mob violence increased after 1760 when the Sons of Liberty became active. Dawson argues that New York had the distinction in 1764 of organizing the first committee of correspondence and of being host in 1770 to the first battle of the Revolution—Golden Hill.

Rather than forming a mindless, manipulated segment of the lower class, merchant seamen participated actively in demonstrations and acts of violence out of a real sense of grievance. Their behavior during the Revolutionary period indicates an ideological and political awareness that historians generally have failed to recognize.

Bibliography: p. 146-157.

The author's thesis (Ph.D.), *Charleston's Sons of Liberty: a Study of the Mechanic, 1760-1785*, was submitted to the University of South Carolina in 1954 (Micro.AC-1, no. 8945).

While the more conservative merchants supported mercantilism, most craftsmen, choosing Christopher Gadsden as their spokesman, opposed a system that discouraged American manufactures. Planters generally hesitated to commit themselves until a pre-Revolutionary depression persuaded them to join the radical mechanics against the crown. Artisans led the purge of Charleston's Loyalists, only to suffer during the British occupation. After the war they turned to mob violence to better their political status but later supported the Constitution in order to gain stability during a depression. Investigates the rise of a sense of community, the process by which proud British subjects came to think of themselves as Americans. Analyzing the content of four issues each year, the author studies newspapers in Boston, New York, Philadelphia, Williamsburg, and Charleston in order to determine the frequency with which they mention American as opposed to British and other place names. Merritt contends that repetition of symbols, such as Boston, Pennsylvania, or the Chesapeake Bay, indicates the newspapers' general interest in American places, focus within America, and sense of group identity. He finds that the amount of attention given American places increased steadily over the years, with a dramatic rise occurring after 1762. In contrast, the sense of common identity as Americans developed in a cyclic pattern, although its rate of growth also accelerated after 1762. "Bibliographical note": p. 316-318.

Following a review of other kinds of agitation, including riots, the author assesses the role of the press in weakening American loyalty to Great Britain and in fueling the desire for separation. Colonial newspapers grew in number and became more influential by introducing typographic changes, increasing their frequency of publication, and taking stronger stands against British tyrannies. Although Tory editors were bitterly attacked, Schlesinger argues that freedom of the press was strengthened during the Revolutionary era.

Studies the development and political ramifications of the dispute between the Anglican hierarchy in England and dissenting American Congregationalists and Presbyterians over the creation of an episcopate in America. Acting upon inaccurate information supplied by zealous missionaries, the Anglicans tried to enlarge their spiritual empire beyond the limits deemed proper by American custom. During the Stamp Act crisis many dissenters linked Grenville's program with Archbishop Secker's aggressive pursuit of an American bishopric as part of a general scheme to restrict traditional liberties, thus raising the specter of religious oppression. The Church, Bridenbaugh concludes, must share the blame for the loss of the colonies with Parliament, the crown, and the rigid British political system. For a dissenting view, see Thomas P. Reviews the ecclesiastical and political controversies that occurred during the pre-Revolutionary era over the proposed establishment of an Anglican bishopric in America. A large number of disputants, including Jonathan Mayhew, Charles Chauncy, Thomas Bradbury Chandler, and contributors to the *New York Gazette* and *Philadelphia Journal*, carried on the debate until the issue gave way to more pressing matters with the onset of war. Americans eventually broke with the Church of England and founded an Episcopal church under their own bishops. The episcopal question, in Cross' view, sharpened the divisions among the American clergy and, to that extent, was a secondary cause of the Revolution.

Debunks the myth of innocents deliberately slaughtered. The author recounts the mayhem, brawls, riots, and other violence seemingly endemic to Massachusetts after the Stamp Act crisis, the animosity that existed between civilians and soldiers, and the excess of both on that fateful evening in March 1770. Believing that bloodshed could have been delayed but not avoided, Zobel recreates the drama of the soldiers' trials, explores legal strategy, and concludes that rough justice was done. As a counsel for the defense in the trial of the British soldiers, John Adams refused to pursue evidence concerning a premeditated plan on the part of some Bostonians to drive the soldiers out. In so doing, Adams came shockingly close to sacrificing his clients for the sake of the town's reputation.

After surveying aspects of the tea trade, 1760-73, the effect of the Townshend Duties, and the operations of the East India Company, Labaree describes the nature and consequences of resistance to the Tea Act of 1773. Just when their differences with England concerned Americans the least, the tea legislation revived old animosities. Colonists judged the company's tea plan to be part of a conspiracy intended to affirm Parliament's right to tax the colonies.

Because of Boston's long history of agitation, England overreacted to the events of December 16, causing Americans to unite and seek independence.

Attempts to correlate the positions taken in Congress by the members of each colony's delegation—particularly Adams, Dickinson, Jefferson, and Rutledge—to the social and economic situations in the provinces they represented. Such colonies that favored independence as New Hampshire, Massachusetts, Rhode Island, Connecticut, and Virginia, had a declining rate of economic growth and a high level of cultural and institutional homogeneity. Conversely, those that opposed or were hesitant about it, such as New York, New Jersey, Pennsylvania, Delaware, Maryland, and South Carolina, profited from the imperial relation and feared internal disorder.

Angermann, Erich. Ständische Rechtstradition in der amerikanischen Unabhängigkeitserklärung. Historische Zeitschrift, Bd. 200, Feb. 1965: 61-91.

D1.H6, v. 200

In comparing the charges against George III in the Declaration of Independence with similar complaints against monarchy in the Dutch Declaration of Independence of 1581, the trial of Charles I in 1649, and the English Bill of Rights in 1689, the author finds a "tyrannis syndrome" in which the king is criticized for violating ancient rights associated with feudal estates rather than those stemming from natural law.

Combining a close textual analysis of the document itself with a succinct history of the natural rights philosophy on which it rests, Becker traces the evolution of American constitutional theory 1763-76, reviews the drafting of the Declaration, evaluates its literary quality, and discusses the manner in which it was received at home and abroad. In a concluding chapter he describes the subsequent modification of the natural rights philosophy under the impact of 19th-century industrialism and nationalism.

Interprets events immediately preceding the adoption of the Declaration and provides an analysis of the document itself. Finding a close relationship between the development of the controlling authority of the Continental Congress and the evolution of the movement for independence, the author contends that Congress, as the embodiment of union sentiment and the director of national and international affairs, reached the peak of its power in July 1776; thereafter its authority declined as steps were taken to limit its jurisdiction through the Articles of Confederation. In chapters on the Declaration as a campaign document, Friedenwald further concludes that the indictments against George III cannot be sustained upon close investigation.

Bibliographic footnotes.

Traces the gradual emergence of local grievances and radical thought from the Glorious Revolution to the rise of a Revolutionary party after the Seven Years' War. Stressing the economic causes of social discontent, Adams describes attempts by the upper classes to aggrandize their positions at the expense of less fortunate groups. As land speculation grew, wealth became increasingly concentrated in the hands of a relatively small group of men who influenced the decisions of the provincial legislatures and the courts. Those without capital found it difficult to alter their status. The religious outbursts of the 1740's heightened radical sentiment and the lower classes became increasingly self-conscious. In the disputes that arose after 1763 they extended their antagonism for the upper classes to the colonial government and, ultimately, to Great Britain.

Jones, Matt B. Vermont in the making, 1750-1777. Cambridge, Mass., Harvard University Press, 1939. xiv, 471 p. map. F52.J76

Bibliography: p. [441]-457.

Reprinted in Hamden, Conn., by Archon Books (1968).

Concentrating upon the land grant activities of Gov. Benning Wentworth and the conflicts that led to the movement for an independent Vermont, the author traces the history of the area known as the New Hampshire Grants. Jones asserts that Wentworth, for personal gain, knowingly exceeded his authority in granting lands to New Hampshire speculators who were led by the Allen brothers and Remember Baker. Although these adventurers clashed with New York patentees, most people in Vermont accepted the authority of New York's governor. London knew of Wentworth's manipulations and the defects in the Hampshire claims but delayed action so long that Vermonters finally severed all connections and formed a republic in 1777.

Issued also as thesis (Ph.D.)—Columbia University.

After reviewing the origins of the institution, the author studies the town of Windsor in the New Hampshire Grants, summarizes the territory's struggle to gain its independence from New York and establish a new state, and investigates the experiences of the proprietors in Hyde Park, Vt. The character of New England proprieties began to change after 1750, as land speculation and absentee ownership increased sharply. Woodard concludes that the increasing accumulation of capital, pressure of financial problems, colonial wars, and boundary disputes were important factors in the decline of the proprietorship system.

Vol. 3 published in London by J. Murray.

Volume 2 contains an index to volumes 1 and 2. John Wingate Thornton's *Index of Persons and Places Mentioned in Hutchinson's Massachusetts* (New York, 1879. 15 p. F67.H981) refers to the 1795 edition of volumes 1 and 2 and the above, only edition of volume 3.

Volume 3 was edited by the author's grandson John Hutchinson. The original issue, designed for the English market, has a slightly different title and is without a volume number.

Each volume concludes with an appendix of documents. For volume 1, this is largely supplemented by *A Collection of Original Papers Relative to The History of the Colony of Massachusetts-Bay* (Boston, New-England, Printed by T. and J. Fleet, 1769. 576 p. F67.H95 Rare Bk. Coll.). Similar material for the later parts of the *History* was collected by the author but never published.

Contents: v. 1. The history of the colony of Massachusetts-Bay, from the first settlement thereof in 1628. Until its incorporation with the colony of Plymouth, province of Main, &c. by the charter of King William and Queen Mary, in 1691. 1764.—v. 2. Concentrating upon the relationships that developed between the merchants in Boston and in other colonies, the author studies the boycotts of English goods organized in 1765, when merchants used nonimportation to protest unfair trade restrictions, and in 1768–69, when agitators adopted the strategy to enforce their political claims. Although nonimportation succeeded in 1765, its renewal failed; in 1768–69 conservative merchants were unwilling to accept further losses for the sake of constitutional principles.

Shortly after the arrival of Gov. Francis Bernard, Massachusetts radicals began to link their attack upon the monopolization of diverse and profitable offices by an interrelated local oligarchy to the whole pattern of American objections to British colonial policy. Once they gained control of the government, however, the revolutionaries themselves made widespread use of plural officeholding. By 1778 objections to the renewed practice and demands for separation became a major issue in the debates over the provisions of the new Massachusetts Constitution. Brennan concludes that the establishment of separate departments in 1780 resulted more from the attempt to eliminate a specific abuse than from any theory of the separation of powers, even though the selected remedy did contribute to the development of popular control of government.

The extraordinary meeting of town delegates called at the request of Boston has been traditionally viewed as a de facto assembly of the House of Representatives dominated by Boston radical leaders. An examination of the hitherto overlooked delegate list, however, reveals that the convention was a distinct body separate from the House and indicates that the Revolution in Massachusetts had a broad local base.

A detailed study of the creation, development, operation, and influence of the Boston committee. Never an agency of revolution, the committee disseminated information and integrated the ideology the towns came to hold in common—one derived from the rhetoric of the British Commonwealthmen and Puritan covenant theology. Its activities raised the level of political awareness and participation in Massachusetts to the point that the committee could turn its attention to communication between colonies following the tea controversy.

The author's thesis (Ph.D.), *The Road to Revolution in Massachusetts*, was submitted to the University of Wisconsin in 1946.

Attempting to determine the causes of the war, the author investigates the extent of economic, political, religious, and educational democracy in the province and surveys the clashes between Massachusetts and Great Britain over imperial policies. Brown finds that society in Massachusetts was middle-class, property was easily acquired and widely held, and little distance separated the rich from the poor. In addition, most men could vote and were effectively represented. Common people enjoyed the best education available to them anywhere, and there was little dissatisfaction with the degree of religious freedom. He concludes therefore, that the Revolution in Massachusetts was not a struggle to overturn the existing social order but a revolt against British control by Americans who wished to preserve the liberties to which they had become accustomed. For an extensive evaluation, see John H. Cary's "Statistical Method and the Brown Thesis on Colonial Democracy. With a Rebuttal by Robert E. Brown," in the *William and Mary Quarterly*, 3d ser., v. 20, Apr. 1963, p. 251-276.

The author measures the wealth and tenure of officeholders in an effort to shed light on political participation and power in five Massachusetts towns. Hoerder finds that wealthier men held the higher offices for longer periods, especially in Boston, and that officeholding was more equitably distributed in the smaller towns—Worcester, Plymouth, Amherst, and Weston—which tended to exhibit a greater degree of independence and classlessness. The study is based in part on Hoerder's thesis (Ph.D.), *People and Mobs, Crowd Action in Massachusetts During the American Revolution, 1765-1780*, which was presented to the Freie Universität in Berlin in 1971 (700 p. As a result of the conscious imitation of British models, most Massachusetts institutions, as well as those in other provinces, lost the unique features that characterized their early development. During the course of the 18th century this trend drew the colonies ever closer together. The Revolution occurred largely *because* the American colonies had become so thoroughly English.

The author's thesis (Ph.D.), was submitted to Harvard University in 1967.

Basing his study on the public records of 15 towns, the author determines that consensus was the primary value in the social life of 18th-century Massachusetts. Unanimity and agreement were shared goals; dissent and conflict were not tolerated. This pursuit of accommodation and harmony affected all public behavior, especially in the political realm. Zuckerman concludes that the threats to local autonomy implied in the Intolerable Acts drove the communities to resist British authority in an effort to preserve their internal peace and security. In his article "The Zuckerman Thesis and the Process of Legal Rationalization in Provincial Massachusetts," published in the *William and Mary Quarterly*, 3d ser., v. 29, July 1972, p. 443-460, David G. Allen questions whether Zuckerman's sampling of evidence is adequate. A reply by Zuckerman appears on p. 461-468.

Contents that electoral eligibility is a poor index of democratic political participation when, in fact, most town decisions were made at informal meetings and the vote was a mere ratification of predetermined directives rather than a choice among competing interests or ideals. Ironically, however, local politics may indeed have been democratic since the prevailing politics of consensus stressed consultation with the majority in an effort to assure harmony.

The author's thesis (Ph.D.), *The Licentious Republic: Rhode Island, 1760-1776*, was submitted to Brown University in 1954 (Micro AC-1, no. 9828).

Concentrating upon quarrels between the Hopkins and Ward factions, the author investigates the relationship between ongoing provincial controversies and the Revolutionary movement. Annual elections provided Rhode Islanders with a relatively sophisticated political system, a large measure of autonomy within the empire, and, most important, access to a large number of remunerative positions. Desire for the emoluments of office, rather than antagonism between socioeconomic classes, motivated the contenders. Imperial measures, such as parliamentary taxation, not only threatened Rhode Island's quasi-independent status, but also portended the substitution of royal officials for elected ones. The colony revolted, Lovejoy concludes, as much to retain the benefits of party politics as to protect its constitutional rights.

Contents that the struggle for home rule in Rhode Island was not paralleled by internal division between radical agrarian and conservative mercantile interests over who should rule at home. Instead, competition for office between members of the commercial and professional classes of Providence and Newport, led by Stephen Hopkins and Samuel Ward, resulted in a remarkable continuity of leadership in the fight to preserve a system with which Rhode Islanders were well satisfied.

An account of the origin and development of Connecticut's claim to lands in northern Pennsylvania and the Susquehanna Company's protracted disputes with Pennsylvania rivals. Although the company established 17 towns along the Susquehanna River, between 1769 and 1774, on land deeded at Albany in 1754 by sachems of the Six Nations, its claims were eventually rejected in 1795 by the U.S. Circuit Court. In a final settlement, agents of a committee of Pennsylvania landholders and leaders of the company issued 1,745 certificates to Connecticut settlers in the 17 towns representing a total of 288,532 acres of land; Pennsylvania claimants were compensated by land grants in other

areas. See also Boyd's article, "Connecticut's Experiment in Expansion; the Susquehanna Company, 1753-1803," in the *Journal of Economic and Business History*, v. 4; Nov. 1931, p. 38-69.

Traces the decline of Puritan restraint, explains the growth of Yankee individualism, and describes the search for new methods of ordering society in pre-Revolutionary Connecticut. Nascent ambition, masquerading as laudable industry and fueled by an expanding economy, generated scandalous disputes over such matters as property rights, land speculation, and paper money. Traditional values and institutions, already weakened, crumbled during the Great Awakening and the doctrinal and political disputes that followed it. By 1765, there had emerged a Yankee spirit characterized by defensive independence, ambition, and hard-headed rationalism tempered by a concern for the public good and a yearning for the divine.

The author's thesis (Ph.D.), with the same title, was submitted to Columbia University in 1946.

As early as midcentury, religious antagonisms triggered by the Great Awakening divided the colony into conservative west, dominated by Anglicans and Old Light Congregationalists, and radical east, led by New Light Congregationalists who later allied with dissident merchants and lawyers. Beginning with the Stamp Act crisis, the issues raised by British policy and the activities of land speculators, especially the eastern-based Susquehanna Company, solidified the factions into opposing Conservative and Whig parties who vied for control of government. When the death of the ex-Governor Thomas Fitch in 1774 left the Conservatives leaderless, their opposition to the Whigs declined rapidly, leaving only a small group of Tories to contest radical control.

Reviews the disputes between the governor and the assembly, the struggles between the elitist Livingstons and De Lancey factions for control of the government, the growing polarization of radicals and conservatives after the Stamp Act disturbances, and the methods of selecting delegates, committees, and provincial congresses from 1773 to 1776. The author observes that the Revolution in New York resulted from two separate movements. Besides the agitation for home rule, itself a continuation of the long standing controversy between assembly and governor, there was the question of "who should rule at home"—the conservative, privileged aristocracy or the radical, unprivileged freeholder and unfranchised mechanic. By appealing to the radical element for political support and by endorsing popular violence and other extralegal methods in their efforts to unseat the De Lanceys, the Livingstons, concludes Becker, unintentionally opened the way for the rise of the common man in politics. The author's thesis (Ph.D.), *A Factious People: Chapters in the History and Historiography of Colonial New York Politics*, was submitted to Columbia University in 1970.

Concentrating upon four periods of intense political activity between 1690 and 1770, the author surveys the geographic, economic, social, and cultural setting in which contending interest groups evolved into the two unstable parties or factions—moderate Whigs and popular Whigs—of the 1760's. The practical experience in factious politics gained by the colonists gradually shaped the republican ideology that they acquired from English Commonwealthmen and carried New Yorkers to revolution and beyond. For all classes, politics had become a way of life.

Argues that the struggle over who should rule at home was waged by amorphous aristocratic factions grouped around two great rival family clans—the Livingstons and the De Lanceys. From 1761 to 1768 the Livingstons dominated the assembly. In the elections of 1768-69, however, the De Lanceys allied with radical elements in New York who opposed the Townshend Acts and used appeals to fundamental rights and privileges to undermine the popularity of their opponents. Exploiting imperial crises out of political expediency, the De Lanceys drove the Livingstons from power, ruling New York until the war when the Livingstons became the "patriot" party.

Relates incidents between 1750 and 1784 in the lives of three New York lawyers who, despite similar backgrounds, reacted differently to independence. Considered radicals before the Revolution when they supported the Livingston faction against their political rivals, the De Lanceys, the triumvirate disintegrated when protest became revolution—Scott wholeheartedly joined Washington's army, Livingston accepted independence reluctantly but served as war governor of New Jersey, and Smith became the chief justice of Loyalist New York and, later, Quebec.

In the midst of the struggle over whether to continue nonimportation following the repeal of the Townshend Acts, David Hill, an itinerant Massachusetts peddler, brought to New York a shipment of proscribed British goods, which were quickly seized and placed in storage. When the goods were burned by a radically-led mob, Hill successfully brought suit in a Rhode Island court against the conservative merchants who headed the New York nonimportation committee.

Examines the lordship of the manor, the proprietor-tenant relationship, the social and economic welfare of the tenants, and their reactions to important political events. Unencumbered by feudal obligations, the tenants were, in reality, landed entrepreneurs working for a profit. Contrary to the traditional view, Kim finds that most of those who participated in the Revolutionary War fought on the side of their landlords.

Concludes that many small farmers became Tories during the Revolution in the belief that the king would protect them from rapacious landlords. From the beginning, the inequities and frauds that fostered the development of large landed estates were perpetuated by a political system controlled by the great landed families—the Livingstons, Philipses, Van Cortlandts, and Van Rensselaers. Seeing little possibility for redress, small farmers often resorted to violence which culminated in the Albany, Dutchess, and Westchester County riots of 1766 and the fights between Yankees and Yorkers in the Vermont region. Resourceful leaders such as the Allens tied old rivalries to the quest for Vermont statehood and ultimately, to the greater movement for independence. The author's thesis (Ph.D.), *Organization of the Revolutionary Movement in New York State, 1776-77*, was submitted to Columbia University in 1958 (Micro AC-1, no. 58-2599).

Investigates the strengths and weaknesses of the Revolutionary movement just before independence and during the framing of the state constitution in 1777. Because they were a political majority, the Whigs were able to establish a system of extralegal committees and to offset royal authority. Yet the Whig leadership—James Duane, Gouverneur

Morris, John Jay, and Robert R. Livingston—was unable to act forcefully. When challenged by Loyalists and the royal governor, for example, they failed to declare independence and, later, tried to delay constitution-making until an atmosphere of calm prevailed. Despite timid leadership, the Revolutionary movement in New York succeeded because of popular support and because its opponents were weak and disorganized.

A detailed narrative of the assembly's campaign to increase its power at the expense of the governor by controlling the purse. The author suggests that new British tax policies implemented after 1763 threatened the gains made by the lower house and provoked revolution. The assembly triumphed when the constitution of 1776 expanded that body's role and reduced the authority of the governor.

Focuses on forces for change in electoral institutions. In two chapters on the period 1703-88, the author describes the successful efforts of New Jerseyites to reduce voting restrictions imposed by the royal government and ultimately to establish nearly universal manhood suffrage. McCormick concludes that the procedures adopted in Revolutionary New Jersey gave practically unchecked authority to the electorate until the middle of the 19th century.

Focusing upon the ownership and distribution of land, the author recounts the history of the New Jersey proprietorships. Although the Jersey provinces were united as one royal colony in 1702, proprietors were permitted to retain ownership of their land. As a result, settlers and residents found access to land blocked by absentee landlords, ambiguous land titles, and quitrent obligations. The discontent raised by these problems was not alleviated until the Revolution.

The author's thesis (Ph.D.), *Benjamin Franklin and Pennsylvania Politics, 1750-1766*, was submitted to the University of California, Berkeley, in 1959.

Traces the growing animosity between Franklin and the proprietor Thomas Penn; describes the unsuccessful effort of the Quaker-dominated assembly, with Franklin as its spokesman in London, to substitute royal for proprietary rule in Pennsylvania; and assesses the impact of imperial crises upon local politics after the election of 1764. Both Quaker and proprietary interests welcomed a period of uneasy cooperation following the turmoil over the Stamp Act; a defeated Franklin, in turn, concentrated upon nonpolitical pursuits. Even though they disagreed on other issues, the two groups remained loyal to George III until 1776. The new men who led the revolution in Pennsylvania, however, considered Franklin to be part of the old order; hence a political enemy. He had sponsored no reform save royal government and, intending to avoid factions, had led a discredited one. Franklin's image as a venerable scientist-philosopher, however, remained unsullied.

The White Oaks was an association of Philadelphia artisans and mechanics who supported the Quaker party and the movement for royal government until the election of 1770, when they switched their allegiance to Charles Thomson, the colony's strongest advocate of nonimportation, and the Presbyterian party. The participation of the White Oaks in politics indicates that they were not alienated revolutionaries, but ambitious, achievement-oriented workingmen who sought to share in the rewards that their society offered. Following a review of quarrels between proprietor Thomas Penn and the Quaker-led assembly, the author examines the unsuccessful efforts by that body, especially in 1764, to overturn proprietary rule. Hutson contends that Penn's attitude toward the Paxton Boys' uprising convinced Quaker leaders that his regime was morally bankrupt. Assemblymen attacked the proprietary form of government mainly because they were outraged, like Americans in 1776, by restraints imposed by a distant authority. Most Pennsylvanians, however, disliked both external control and the campaign against the proprietor, for they were not directly affected by Penn's actions and were more afraid, in the European tradition, of monarchy per se. He concludes that, as the Quaker party exhausted itself, a new Presbyterian party rose. By 1770, this new party contained all the elements of the group that gained power in 1776. Following a review of ethnic and sectional divisions among Pennsylvanians, the author presents a detailed chronological account of the unsuccessful attempts to substitute royal for proprietary government, the debate over imperial issues, and the adoption in 1776 of a state constitution. Lincoln identifies two opposing groups: a conservative aristocracy of Quaker merchants in the east and a radical but democratic coalition of Scotch-Irish Presbyterians and Germans in the west, plus non-Quaker lower- and middle-class Philadelphians. Both factions opposed measures like the Stamp Act, but conservatives found that popular protest against British authority also threatened aristocratic government. Radicals used extralegal committees, conventions, and congresses to achieve a democratization of Pennsylvania politics in 1776.

The author's thesis (Ph.D.), *The Relations Between Pennsylvania and the English Government, 1696-1760*, was submitted to the University of Pennsylvania in 1908.

In a classic study of British colonial administration, the author first examines the organizational structure and activities of imperial regulatory agencies, including the Board of Trade and vice admiralty courts, and then describes the disputes between proprietor and assembly over political authority, finances, and control of the judiciary. The generosity of William Penn in allowing a unicameral legislature and the isolation of his descendants in England so weakened the proprietary side that the assembly, representing the popular or democratic elements, gained control of the purse. By 1765, the colony was nearly self-governing.

Starting with the Society of Friends in England, the author reviews William Penn's efforts to establish a civil government based on ethical principles and continues the story of the Holy Experiment through the last days of Quaker control over the colony's assembly in 1756. The Quaker majority in that body, with the onset of the French and Indian War, foreshadowed its neutral stand during the Revolution by relinquishing its position of leadership instead of compromising its pacifist beliefs.

Considers four series of events to be facets of a single democratic movement: the Quaker party's struggle to overthrow proprietary government, Franklin's campaign to break the power of the Penn family, the rising tide of criticism directed at the Quaker oligarchy between 1764 and 1776, and the ultimate triumph of the radical Revolutionary party led by Franklin and others. According to Thayer, the Revolution encouraged the spread of leveling principles and the beginning of popular government in Pennsylvania, the only state in which democratic forces became dominant.

In a detailed examination of Quaker political thought and action, the author finds that Quakers who achieved

political power in colonial Pennsylvania balanced the demands of frontier defense and their religious convictions by voting for military funds while abstaining from personal involvement in war. Those of "tender conscience" who saw a paradox in the marriage of belief and political exigency, however, advocated a complete withdrawal from public office as the only means of preserving the Quaker peace testimony. Some Quaker legislators did resign from the assembly during the French and Indian War under pressure from their London brethren, but they returned to office shortly thereafter. Advocates of radical withdrawal triumphed only when the crisis of revolution compelled Quakers to reaffirm their original testimony of obedience to the king and disassociation from violence.

Portrays the diversity of manners and morals within three distinct patterns of life found in the southern colonies between 1730 and 1776. The author describes the old Chesapeake society, which furnished distinguished leaders; the youthful Carolina society, grown rich on indigo and rice; and the lusty backcountry, a frontier that was becoming increasingly rural like eastern Pennsylvania, Maryland, Virginia, and Carolina.

"Bibliographical essay": p. [496]-504.

Analyzing in detail the acquisition of powers by each of the four houses over finance, the civil list, legislative proceedings, and executive affairs, Greene concludes that institutional momentum was primarily responsible for the emergence of the lower house as the center of power in the four southern colonies by 1763. During the pre-Revolutionary struggle the assemblies took the lead in defending the colonies against encroachments by the crown and Parliament and providing political leaders who guided the new nation through the crisis of revolution.

The author's thesis (Ph.D.), *The Background of the Revolutionary Movement in Maryland*, was submitted to Yale University in 1932.

After describing the colony's pre-Revolutionary intellectual climate, social structure, economic life, and status within the colonial system, the author traces the development of the antiproprietary movement beginning in 1733 as it interacted with other factors leading to Maryland's severe reaction to the Coercive Acts. Barker concludes that resistance to prerogative, as exercised by Gov. Horatio Sharpe in the name of Lord Baltimore, invited revolution when it combined with the ideas of the Enlightenment, distress over an ailing tobacco trade, and opposition to burdensome taxation. In balance, neither class struggle nor frontier conditions were significant in Maryland.

development of a native aristocracy in the colony, created conflict between the colonial assemblies and the chief executives, and made government unnecessarily expensive.

In an essay on the response of Virginia's political leaders to the Stamp Act, the author maintains that the plantation system provided the aristocracy with a unique experience in the management of complex business affairs and large numbers of people. Transferring this education in self-government to the larger arena at Williamsburg, the oligarchy imbibed republican theories and played a dominant role in the Revolution.

Virginia on the eve of the Revolution was far more democratic than historians believed, the writers contend. Cheap land and a shortage of labor produced an open, mobile class structure; differences between ranks were slight and could be overcome by those with ambition and ability. Property qualifications were such that most white men could vote. Elected officials were usually from the upper class, but they first had to satisfy a rather broad electorate. Educational opportunity, while limited, seemed not to be an issue between classes. An aristocracy based upon Negro slavery set Virginia apart from the New England colonies, yet it was a matter of race, not class. Since the colony had a middle class, representative democracy before the war, the authors conclude that an internal class conflict neither precipitated the Revolutionary struggle nor produced social change afterward.

Contrary to previous historical opinion, the author finds that the desire to escape the payment of debts to British merchants through immediate and wholesale repudiation played a very minor role in Virginia's decision for independence. In a second article, "Planter Indebtedness and the Revolution in Virginia, 1776-1796," 3d ser., v. 28, July 1971, p. 349-374, Evans shows that the notion of a permanent repudiation of prewar indebtedness to British merchants did not gain majority support among Virginia planters until around 1784.

After sketching the English background, the author studies the authority, functioning, and relative influence of the governor, council, House of Burgesses, judiciary, and officials responsible for land, finance, and defense in an effort to account for the Revolution. He finds that the governor's instructions hardly varied between 1700 and 1775, while the assembly's demands for autonomy increased. Most governors compromised, but some, such as Lord Dunmore, insisted upon strict enforcement; hitherto loyal Virginians were then compelled to secure their rights as Englishmen by force of arms.

Studies the structure and composition of the body, the election of its members, and the kinds of men who served. Never comprising more than 126 burgesses, the assembly was an intimate group of Anglican gentlemen who held large amounts of land, dominated local officeholding, and were closely related by kinship and social and economic ties. Even so, the author finds that they responded to the needs of their lower-class constituents in order to secure reelection. Griffith also analyzes the political controversies of the period 1750-74 and provides biographical sketches of nearly 50 burgesses from seven selected counties—Richmond, Essex, Henrico, Amelia, Albemarle, Frederick, and Augusta.

In volume 2, the author describes the problems engendered by the coming of the Presbyterians and Separate Baptists, the French and Indian War, and the colony's expansion westward. Beginning with the Pistole Fee controversy of 1752 that led to other constitutional conflicts over taxation, including the Parson's Cause or protest against the Two-Penny Act of 1758, Virginians developed the natural rights arguments that they were later to use in justifying the Revolution.
